

School transport is different

Because of the Coronavirus, some people are wearing protective equipment to help them stay safe and healthy. This includes a face mask and gloves.

People may wear these out in the community, at school and even when they stay at home.

The transport staff who drive me to school and drive me home may wear a mask and gloves. I can choose to wear a mask and gloves too if I want to. Wearing masks helps keep everyone healthy and safe.

The transport staff may ask me to clean my hands with hand gel when I get on transport. Cleaning my hands with hand gel helps keep everyone healthy and safe.

People will have to give each other more space, this is known as social distancing. Social distancing is harder in transport, transport staff will help me to do this. Transport staff will tell me where to sit. I will have to stay in this seat for the whole journey. If this makes me feel worried, transport staff will try to help me.

When I get home and when I get to school, I should wash my hands

This is the best thing to do to keep everybody healthy and safe on our journey to school and our journey home.
