Oldham's Monitoring Report April 2018 to March 2019

December 2019

Oldham
Council

	Abbreviations	2
	Executive Summary	4
1	Introduction and Context	6
2	Implementation of the Local Development Scheme	9
3	The effects of the Local Plan	10
4	Implementation of the Statement of Community Involvement	68
5	Effects on social, environmental and economic objectives	70
6	Greater Manchester Development Plan Documents	72
7	Key findings and actions	95
8	Other Monitoring Matters	98
	Appendix 1 Local Housing Statistics	100
	Appendix 2 Change in areas of biodiversity	102
	Appendix 3 Tracking saved UDP Policies	105
	Appendix 4 UDP Phase 1 housing allocations	115

Abbreviations

The following is a list of abbreviations used in this report:

AGMA - Association of Greater Manchester Authorities

AMR – Authorities Monitoring Report

BME – Black and Minority Ethnic

CIL - Community Infrastructure Levy

DCLG –Department for Communities and Local Government

DEFRA - Department for Environment, Food and Rural Affairs

DPD – Development Plan Document

FRA - Flood Risk Assessment

GMCA - Greater Manchester Combined Authority

GMMWPU - Greater Manchester Minerals and Waste Planning Unit

GMSF - Greater Manchester's Plan for Homes, Jobs and the Environment

Ha - Hectares

HMR - Housing Market Renewal

JMDPD – Joint Minerals Development Plan Document for Greater Manchester

JNCC - Joint Nature Conservation Committee

JWDPD – Joint Waste Development Plan Document for Greater Manchester

LDD – Local Development Document

LDS – Local Development Scheme

LLFA - Lead Local Flood Authority

LPA - Local Planning Authority

NDO - Neighbourhood Development Order

NDP - Neighbourhood Development Plan

NPPF - National Planning Policy Framework

OPOL - Other Protected Open Land

PDL - Previously Developed Land

PPS – Planning Policy Statement

RAWP – Regional Aggregate Working Party

SAC - Special Area of Conservation

SCI – Statement of Community Involvement

SBI – Sites of Biological Importance

SPA - Special Protection Area

SPD – Supplementary Planning Document

SSSI - Sites of Special Scientific Interest

SUDS - Sustainable Urban Drainage System

Sqm - Square metres

UDP – Unitary Development Plan

Executive Summary

Local Development Scheme Progress

The Local Development Scheme (LDS) in place at the start of the monitoring period was "Issue 9" (approved in July 2016) and can be viewed on the council's website (https://www.oldham.gov.uk/info/200709/documents_in_the_local_plan/230/local_development_scheme).

i) Performance on the LDS milestones between 1 April 2018 and 31 March 2019 were as follows:

- Greater Manchester's Plan for Homes Jobs and the Environment (GMSF): A revised draft GMSF was published in January 2019 and was consulted upon for 6 weeks. Comments have been collated and will inform preparation of the Publication Plan as appropriate, which is due for consultation in Summer 2020. Adoption is scheduled for December 2021. The revised timetable puts the GMSF back 3 years from the original timetable of adoption of January 2019.

Key Indicator Results

ii) Employment

- 10,734 sqm (gross) of industrial and commercial floorspace was completed. All of this development was on previously developed land.
- Land developed for business and industry was 2.97 ha (gross).
- The total amount of employment land available for industrial and commercial use (Use Classes Order B1, B2 and B8) was 70.56 ha. The total consists of 44.27 ha of Business and Industry; Mixed Use, saved UDP Allocations and 26.29 ha of sites that are not allocations but have planning permission for employment uses and are either unimplemented or under construction.

iii) Housing

- As of 1 April 2019, the borough's five-year housing land supply contains sufficient land to accommodate 2,381 dwellings. This equates to 3.4 year supply of deliverable housing land against the borough's local housing need of 692 dwellings per annum.
- An update of the Strategic Housing Land Availability Assessment (SHLAA) demonstrates that there is a housing land supply of 10,357 dwellings over the remaining plan period.
- In 2018/19 there were 410 net completions.
- 56% of completions during 2018/19 took place on previously developed land. A further 146 dwellings or 36% of all dwellings completed in 2018/19 were on mixed sites which contain both PDL and greenfield land.

iv) **Transport** - Nine travel plans have been secured as a condition of planning permission.

vi) **Heritage** - There was one application for the demolition of Hartford Mill a Grade II Listed Mill, there were six applications granted for the part demolition of listed buildings.

vii) **Biodiversity** – There has been boundary changes to Medlock Headwater; Strinesdale; Medlock Vale; Lumb Clough and Shaw Side, Sites of Biological Importance (SBI's) resulting in an increase of 2.4 hectares.

viii) **Renewable Energy** – 5 out of 17 relevant major applications were granted permission with a condition attached requiring applicants to meet Policy 18. This represents 29% of all relevant applications.

Key Actions

xi) **Collection** - The Monitoring Report identifies a number of key actions designed to improve data collection and the ability of the council to monitor progress against indicators. These actions include working with the council's Development Management section to continue to develop ICT-based monitoring systems.

xii) **Timetables** - The LDS in place at the start of the monitoring period was "Issue 9" (approved in July 2016) and can be viewed on the council's website . However, the preparation of the GMSF and its timetable has had implications for the Council's Local Plan review, so a revised LDS will be published in due course.

1 Introduction and Context

Oldham's Monitoring Report

- 1.1** Oldham's Monitoring Report (AMR) covers the period 1 April 2018 to 31 March 2019 and sets out the five-year housing land position as at 1 April 2019.
- 1.2** The Monitoring Report is the main mechanism for assessing the Local Plan's performance and effects.
- 1.3** The requirement to produce monitoring reports is contained within Section 35 of the Planning and Compulsory Purchase Act 2004 (as amended by para 113 of the Localism Act 2011). The Town and Country Planning (Local Planning) (England) Regulations 2012 - Part 8 Regulation 34 also outlines what should be included within a Monitoring Report. In summary these are as follows:
- Review actual progress against the Local Development Scheme (LDS) timetable.
 - List any adopted or approved Local Plan or Supplementary Planning Documents (SPDs) that were listed in the LDS;
 - Where policies are not being implemented, explain why and set out the steps (if any) to be taken to implement the policy;
 - Specify the number of net additional dwellings (including affordable dwellings) delivered during the report period and since the policy began in any part of the area as relevant;
 - Detail any Neighbourhood Development Orders (NDO) or Neighbourhood Development Plans (NDP) made;
 - Report on financial information relating to Community Infrastructure Levy (CIL) receipts as required under Reg 62(4) CIL Regulations 2012; and
 - Detail action taken under Duty to Co-operate requirements during the report period.
- 1.4 Context**
- 1.5** Oldham is situated in the north east of the Greater Manchester conurbation, four miles from Manchester City Centre and covers an area of 55 square miles. Oldham has a mix of high-density urban areas, suburbs, semi-rural locations and is in a pivotal position between the cities of Manchester and Leeds. It is made up of the districts of Shaw, Royton, Lees, Failsworth, Saddleworth, Chadderton and the town of Oldham itself. It contains a residential population of approximately 235,623 and 96,132 households ⁽¹⁾. Around half the borough is open countryside and the south east corner of the borough falls within the Peak District National Park, providing a unique and high quality rural / semi-rural aspect to the borough.
- 1.6** The borough is one of contrasts, with significant levels of deprivation but also areas of prosperity. Oldham is home to an increasing, young population with a continuing upward trend in educational attainment. It also has a rich and diverse community with 22.5% ⁽²⁾ of the population being from black and minority ethnic (BME) groups, mainly of Pakistani and Bangladeshi heritage.

1 2019 Mid-year Estimates, ONS

2 Census 2011

Map showing the borough in its sub-regional setting

- 1.7 Regeneration, in all its forms - physical, social and economic - plays a huge part in the recent history and future development of the borough. There are still significant challenges that the borough faces on a range of issues including: housing conditions; health; educational attainment; strengthening the economy; raising incomes and tackling pockets of high unemployment.
- 1.8 Oldham is home to a number of high quality higher and further educational facilities including University Campus Oldham, Oldham College, Oldham 6th Form College and the Regional Science Centre Oldham.
- 1.9 There are over 7,295 ⁽³⁾ businesses in Oldham, spanning key sectors including advanced manufacturing, health, construction, digital and creative and financial and professional services. Manufacturing remains an important element of the local economy, including high-technology sectors such as electronic, electrical and instrument engineering. The borough is home to a number of well known and high profile businesses including Trinity Mirror Group, Diodes Incorporated, Ferranti Technologies, Park Cake Bakeries, Innovative Technologies, Ambassador Textiles, and Nov Mono Pumps.
- 1.10 Oldham Town Centre lies at the heart of the borough and is the focus for commercial, retail and education activity, whilst the borough's other centres also contribute to the economic, social and environmental fabric of the borough. The council's ambitions for Oldham Town Centre aim to create a more vibrant, revitalised centre that plays a greater role in Greater Manchester.

- 1.11** By 2035, Greater Manchester aims to be one of the world's leading sub-regions, driving sustainable growth across a thriving north of England. We want to ensure the sustainability of our town centre as a place to work, visit and enjoy: in addition, to be a place where our people can live are able to take maximum advantage of the services, shops, skills and training they need to enjoy an excellent quality of life.
- 1.12** A new vision for Oldham Town Centre has been developed: a vision that is aligned with national, regional and local strategic priorities and has a clear rationale, narrative and focus for everyone to embrace and own. The vision can be defined as 'Our Town Centre: a place that thrives' ... by:
- building quality homes;
 - providing opportunities to learn, develop new skills and gain employment;
 - having a diverse culture, leisure and night time economy;
 - attracting, retaining and growing businesses;
 - ensuring a safer, healthier, and friendly environment; and
 - ensuring it is green, clean and sustainable.
- 1.13** These are all geared towards a host of objectives, including increasing footfall, giving a wider choice of residential options, improving access to work experience and jobs, ensuring a town centre that is easy to navigate and building on our culture and heritage.
- 1.14** A refreshed masterplan setting out different development areas is also now being drawn up. This will feature a mix of residential, education, offices, retail, and green space, as well as an area dedicated to boosting the town centre's night-time economy.
- 1.15** There are three corporate objectives that underpin the delivery of the ambition:
- An inclusive economy where people and enterprise thrive;
 - Thriving communities where everyone is empowered to do their bit; and
 - Co-operative services with people and social value at their heart.
- 1.16** The Greater Manchester Combined Authority (GMCA) and the ten local planning authorities (LPA's) are working together to produce a joint plan to manage the supply of land for jobs and new homes across GM. The Greater Manchester Plan for Homes, Jobs and the Environment (GMSF) will ensure that we have the right land in the right places to deliver the homes and jobs we need up to 2037. It will be an overarching development plan within which GM's ten local planning authorities can identify more detailed sites for jobs and homes in their own area. As such, the GMSF will not cover everything that a local plan would cover and individual districts will continue to provide their own local plans. Further details regarding the GMSF can be found on GMCA's website at www.greatermanchester-ca.gov.uk. A LDS was published in July 2016, setting out the timetable for preparing the Local Plan review as well as details of the GMSF.
- 1.17** These are very ambitious plans that can transform the quality of life enjoyed by those who live, work and visit the borough. The Local Plan is fundamental in the development and delivery of these plans.

2 Implementation of the Local Development Scheme

- 2.1** The Planning and Compulsory Purchase Act 2004 ("the Act") requires LPA's to prepare and publish a Local Development Scheme (LDS), which is a project plan listing all the planning documents that the council proposes to prepare and details their content and timescale for production.
- 2.2** This section of the Monitoring Report therefore examines the progress that the council has made in preparing the Local Plan documents as set out in the LDS project plan covering the monitoring period 1 April 2018 to 31 March 2019 inclusive. It addresses the questions:
- Have the timetables and milestones for Local Development Document preparation set out in the LDS been met?
 - Is progress being made towards them?
 - If not, what are the reasons and what action is being taken to address them?
- 2.3** The assessment of timetables and milestones is undertaken against the LDS that was in force at the start of this monitoring period, which was "Issue 9".

Performance in Preparing Local Development Documents, 1 April 2018 to 31 March 2019.

Local Development Scheme

- 2.4** The LDS in place at the start of the monitoring period was "Issue 9" (approved in July 2016) and can be viewed on the council's website www.oldham.gov.uk. Preparation of the GMSF has resulted in a delay of the Local Plan against the LDS timetable. A LDS update will be published in due course.

Development Plan Documents (DPDs)

Local Plan Review / Site Allocations DPD

- 2.5** Regulation 18 Notification consultation was carried out between 10 July to 21 August 2017. However, the timescales for the production of a revised Local Plan have fallen behind, due to delays in the preparation of the GMSF. A revised LDS, with an updated timescale for the preparation of the Local Plan, will be published in due course.

Other Local Plan Documents

Neighbourhood Plan

- 2.6** Following an application for the designation of the Saddleworth Parish Council boundary as a neighbourhood planning area in the last monitoring period, the Saddleworth Neighbourhood Area was designated in November 2016 and informal consultation has taken place within the monitoring period.

Community Infrastructure Levy (CIL)

- 2.7** Further work on CIL has been put on hold.

3 The effects of the Local Plan

3.1 This section of the Monitoring Report examines the effects that Oldham's planning policies are having by measuring a series of indicators. It covers the period 1 April 2018 to 31 March 2019. The indicators relate to the Joint DPD.

3.2 Key questions to address in this section are:

1. What impact are the policies having on national targets and any other targets identified in LDD's?
2. What significant effects are implementing the policies having on the social, environmental and economic objectives by which sustainability is defined and are these effects as intended?

IMPACTS ON TARGETS AND OBJECTIVES

BUSINESS, INDUSTRY AND THE LOCAL ECONOMY

Indicators

Business, Industry and the Local Economy
Total amount of additional floorspace by type (Joint DPD Indicator 3)
Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by providing employment land which is fit for the 21st century for existing and new businesses (SO3b).
Target: N/A.
Oldham Position: The total floorspace completed during 2018/19 for industrial and commercial uses (use classes B1, B2 and B8) was 10,734 sqm (gross). Of this: <ul style="list-style-type: none">• 70 sqm was developed for B1 uses;• 360 sqm was developed for B2 uses;• 5,924 sqm was developed for B8 uses; and• 4,380 sqm was developed for a mix of B1, B2 and B8 uses.
The total floorspace completed in previous years was as follows: <ul style="list-style-type: none">• 2017/18: 13,416 sqm• 2016/17: 3,565.5 sqm• 2015/16: 2,676 sqm

Business, Industry and the Local Economy

Total amount of additional floorspace by type (Joint DPD Indicator 3)

- 2014/15: 8,976 sqm
- 2013/14: 1,643 sqm

Action needed: None.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council Strategic Planning and Information section.

Business, Industry and the Local Economy

Total Amount of employment floorspace (gross) on previously developed land by type (Joint DPD Indicator 4).

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by ensuring the effective and efficient use of land and buildings (SO1c).

Target: N/A.

Oldham Position: The floorspace developed for employment on previously developed land in 2018/19 was 10,734 sqm (gross), representing 100% of the total developed floorspace.

The total floorspace developed for employment on previously developed land has been 100% for the past five years.

Action needed: None.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council Strategic Planning and Information section.

Business, Industry and the Local Economy

Employment land available by type (Joint DPD Indicator 5).

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by providing employment land which is fit for the 21st century for existing and new businesses (SO3b).

Target: N/A.

Business, Industry and the Local Economy

Employment land available by type (Joint DPD Indicator 5).

Oldham Position: The total amount of employment land available for industrial and commercial use (Use Classes Order B1, B2 and B8) as at 31 March 2019 was 70.56 ha. The total consists of 44.27 ha of saved UDP allocations Business and Industry and Mixed Use and 26.29 ha of sites that are not allocations but have planning permission for employment uses and are either unimplemented or under construction.

We have changed the way we measure this indicator so it is inline with figures provided to Greater Manchester Combined Authority so it is not comparable to previous years.

Action needed: None.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council Strategic Planning and Information section.

Business, Industry and the Local Economy

Employment land lost to other uses (Joint DPD Indicator 6)

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by providing employment land which is fit for the 21st century for existing and new businesses (SO3b).

Target: N/A.

Oldham Position: There were no known losses of large employment sites in 2018/19.

Action needed: The Strategic Planning and Information section will work further with Development Management to improve the monitoring of this indicator, resources permitting.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council Strategic Planning and Information section.

Business, Industry and the Local Economy

Land developed for business and industry (Joint DPD Indicator 7)

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by providing employment land which is fit for the 21st century for existing and new businesses (SO3b).

Target: N/A.

Business, Industry and the Local Economy

Land developed for business and industry (Joint DPD Indicator 7)

Oldham Position: 2.97 ha of land was developed for business and industrial uses in 2018/19. Of this:

- 0.01 ha was developed for B1 uses;
- 0.62 ha was developed for B2 uses;
- 1.26 ha was developed for B8 uses; and
- 1.08 ha was developed for a mix of B1, B2 and B8 uses.

The total land completed in previous years was as follows:

- 2017/18: 5.26 ha
- 2016/17: 1.73 ha
- 2015/16: 0.74 ha
- 2014/15: 2.15 ha
- 2013/14: 0.46 ha
- 2012/13: 4.31 ha

Action needed: None.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council Strategic Planning and Information section.

Business, Industry and the Local Economy

New business registration rate (Joint DPD Indicator 8)

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by addressing the worklessness agenda, tackling deprivation and creating skilled and accessible jobs for local residents (SO3a).

Target: N/A.

Oldham Position: In 2017, 1060 new businesses were formed in Oldham. This is the latest information available.

In previous years business formation was:

Business, Industry and the Local Economy

New business registration rate (Joint DPD Indicator 8)

- 2016: 1500
- 2015: 940
- 2014: 865
- 2013: 965
- 2012: 695

Action needed: None.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council.

Business, Industry and the Local Economy

Overall employment rate (Joint DPD Indicator 9)

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by addressing the worklessness agenda, tackling deprivation and creating skilled and accessible jobs for local residents (SO3a).

Target: N/A.

Oldham Position: Oldham's employment rate for ages 16 - 64 was 68.1% as at March 2019.

In previous years the rate was:

- 2018: 68.1%
- 2017: 67.5%
- 2016: 68.6%
- 2015: 63.3%
- 2014: 63.6%
- 2013: 64.7%

Action needed: None.

Business, Industry and the Local Economy

Overall employment rate (Joint DPD Indicator 9)

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council.

Business, Industry and the Local Economy

Foxdenton developed as a premium employment site (Joint DPD Indicator 46)

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by encouraging and facilitating the development of new and emerging industries (such as high technology, knowledge based, innovative, environmental technologies and creative industries) in appropriate locations (such as Foxdenton, Hollinwood Business District and Chadderton Technology Park) (SO3d).

Target: N/A.

Oldham Position: Development at Foxdenton is coming forward in phases. The first residential phase was completed in the previous monitoring period by Redrow Homes. Phase 2a of the link road will be completed very shortly, enabling the sale of the second residential phase to Countryside Properties to take place. Countryside Properties expect to start building 137 houses in July 2019. The final phase of the link road (phase 2b) and enabling works to construct the new Broadway junction have started on site and the new link road is expected to be completed in its entirety by the end of 2020.

Action needed: None.

Relevant Joint DPD Policies: 1, 4, 13, 14.

Source: Oldham Council Strategic Planning and Information section.

Key issues

- 3.3** There has been a significant decrease in employment land developed this year. The systems in place for monitoring employment land losses need to be developed, and this should be resolved with an updated development management IT system. This is important to provide sufficient evidence for the Council to take development management decisions 'in the round' where it is proposed to release employment land for other uses, typically housing.

Future Actions

- 3.4** Further develop monitoring systems particularly for loss of employment land, to ensure that the policies within the Joint DPD actively promote and enhance the needs of the local economy.

Housing

- 3.5** Some of the indicators and text in this section relate to the five-year housing land supply. The five-year housing land supply is forward looking and covers the period 1 April 2019 to 31 March 2024. In previous years the five-year housing land supply position was rolled forward by 12 months. However, in order to align monitoring processes with the work being carried out on the GM-wide housing land supply, since 2015/16 the supply figure has not been rolled forward. The five-year housing land supply presented in this Monitoring Report is therefore the position as at 1 April 2019.

Housing

Plan period and housing targets; Net additional dwellings – in previous years; Net additional dwellings – for the reporting year; Net additional dwellings – in future years; and Managed delivery target (Joint DPD Indicator 11)

Joint DPD Objective: To provide sufficient housing to meet the needs and demands of the borough's urban and rural communities, including affordable, low cost and high value market housing (SO2 (b)).

Target: Annual average of 289 net additional dwellings (UDP) / At least 289 dwellings per year, net of clearance, on average over the Local Plan period up to 2026 (Joint DPD).

Oldham Position: The Joint DPD set out a housing requirement of 289 dwellings to be delivered per year net of clearance. Since 2018/19 the housing requirement has now been superseded by the standard methodology as introduced by the Ministry of Housing and Local Government (MHCLG) for calculating local housing need. Oldham's current local housing need based on this standard methodology is 692 new homes per year.

Since the publication of the last monitoring report in 2018/19 a number of anomalies in the way housing indicators are monitored have been identified. This has meant 119 dwellings that were either in previous years housing land supplies or previously unrecorded, have been found to be complete as additional new dwellings. The anomalies were due to a number of factors, but have mainly come to light as housing monitoring processes have moved towards an increased use of Council Tax records as a main source of information.

The identified dwellings are included within the table below, which provides an updated position to the table set out in the 2017/18 Annual Monitoring Report. The table below shows the number of net completions since the adoption of the Core Strategy and Joint DPD in 2011, compared to the annual average of at least 289 dwellings, up to 2018/19 where the net completion for this year will be compared to the new housing requirement of 692 homes per year. The below table does not show the previously unrecorded completions for 2008/09, 2009/10 and 2010/11 which totalled 4 dwellings.

Year	Completed (Net)	Variance (against housing requirement)
2011/12	11	-278
2012/13	257	-32

Housing

Plan period and housing targets; Net additional dwellings – in previous years; Net additional dwellings – for the reporting year; Net additional dwellings – in future years; and Managed delivery target (Joint DPD Indicator 11)

Year	Completed (Net)	Variance (against housing requirement)
2013/14	363	74
2014/15	594	305
2015/16	296	7
2016/17	374	85
2017/18	345	56
2018/19	410*	-282
Total	2,650	-65

*This is the actual completions figure for 2018/19. Official MHCLG housing returns will show a higher figure of 502 for 2018/19. This is because the statutory housing completion returns are only able to be amended up to the start of 2017/18, therefore it is not possible to officially record the missed completions prior to the year 2017/18 and as such they have been absorbed into the 2018/19 return. The actual figure for 2017/18 of 345 dwellings completed will be amended within the MHCLG returns for that year (split into the relevant quarter).

The number of net completions has fluctuated over the last eight years. During 2018/19 410 dwellings were completed. After falling in 2015/16, completions increased again from 2016/17 as a number of larger sites began construction. There have also been high levels of clearance that took place as a result of regeneration activity during 2003/04 to 2012/13, along with the changing economic conditions witnessed since 2008/09 that may have had an effect. However, over the last seven years, completions have improved, with an average of 377 dwellings being completed annually.

The number of completions, net of clearance, for 2018/19 was 410. This brings the total number of completions for 2011/12 to 2018/19 to 2,650 dwellings. Based on MHCLGs standard methodology for calculating local housing need, residual (i.e. past housing under-delivery) is already taken into account within the calculation of the housing need figure. As such, to determine the amount of housing to be delivered over the remaining plan period, housing need is multiplied by the amount of years remaining, and minus the completions this year which the new housing need applies to. Therefore, 5,126 dwellings need to be delivered over the remaining plan period ($692 \times 8 = 5,536$ minus 410).

The housing trajectory shows the position regarding the borough's potential housing land supply and is made up of four elements:

1. Completions that have taken place during 2011/12 to 2018/19;

Housing

Plan period and housing targets; Net additional dwellings – in previous years; Net additional dwellings – for the reporting year; Net additional dwellings – in future years; and Managed delivery target (Joint DPD Indicator 11)

2. The five-year deliverable housing land supply from 2019/20 to 2023/2024. This is shown as net additional dwellings over the period and has taken into account projected clearance over the period, of 4 dwellings per annum;
3. For the period beyond 2023/24, projected dwellings are based on the post five year supply contained within the borough's potential housing land supply. An update of the post five-year supply has been carried out to inform this through a full review of the Strategic Housing Land Availability Assessment (SHLAA) and this will inform future housing land supply figures. The net additional dwellings have taken into account projected clearance over the period, which is 4 dwellings per annum; and
4. The annualised net supply which shows that current housing land supply spread out evenly across the period.

The housing trajectory shows that there is potential housing land supply identified to deliver 10,357 dwellings (taking into account a small sites allowance, minus projected clearances - see SHLAA for details) over the remainder of the plan period. This is based on the borough's five-year housing land supply and the update of the SHLAA. The SHLAA can be viewed here⁽⁴⁾.

Housing

Plan period and housing targets; Net additional dwellings – in previous years; Net additional dwellings – for the reporting year; Net additional dwellings – in future years; and Managed delivery target (Joint DPD Indicator 11)

Action needed: Continue to update the borough's five year housing land supply annually and update the council's SHLAA. The Council has also published a Housing Delivery Test Action Plan in order to try and improve the delivery rate of housing in the borough.

Aside from an annual small sites allowance, the council does not set out a specific windfall allowance in the Joint DPD. Consideration will be given to the need to make an allowance for larger windfall sites as part of future reviews of the council's SHLAA and five-year housing land supply in line with national planning guidance.

Relevant Joint DPD Policies: 1, 3, 11.

Housing

New and converted dwellings – on previously developed land (Joint DPD Indicator 13)

Joint DPD Objective: Ensure over the lifetime of the Local Plan up to 2026 that at least 80% of new homes are built on previously developed land across the borough as a whole (SO2(g)).

Target: The Joint DPD sets out a requirement for at least 80% of new dwellings in the borough to be built on previously developed land.

Oldham Position:

In 2018/19, 56% of new and converted dwellings were completed on previously developed land (PDL) in Oldham. This is considerably lower than previous years, however it should be noted that there were another 146 dwellings completed in 2018/19 on mixed sites which contain both PDL and greenfield land. These are not included within the PDL figure. If it were assumed that 50% of these mixed sites were comprised of PDL, then there would have been 74% of new dwellings completed on PDL in 2018/19.

The previously developed land trajectory shows:

1. 89% of all completions during 2003/04 to 2018/19 were on PDL;
2. Projections for the next five years (2019/20 to 2023/24) are based upon sites within the five-year housing land supply. The trajectory shows that 69% of the five-year supply is on PDL; and
3. Overall an average of 71% of all dwellings identified as part of the borough's potential housing land supply (i.e. post five-year supply) are on PDL.

The projections relating to the five-year housing land supply and post five-year supply do not include dwellings to be delivered on sites where there is a mix of greenfield and previously developed land. In terms of the five-year supply there are 334 dwellings on mixed sites (14% of the five-year supply) and 1,239 dwellings on mixed sites in the post five-year supply (17% of the post five-year supply).

Action needed: Continue to encourage new residential development on previously developed land in line with the Joint DPD and specifically consider actions to increase delivery of housing on PDL (through the Housing Delivery Action Plan).

Relevant Joint DPD Policies: 1, 3, 11.

Source: Oldham Council Strategic Planning and Information section.

Housing

Net additional pitches (Gypsy and Traveller) (Joint DPD Indicator 16)

Joint DPD Objective: To provide sufficient housing to meet the needs and demands of the borough's urban and rural communities, including affordable, low cost and high value market housing (SO2 (b)).

Target: N/A

Oldham Position: The number of net additional pitches for 2018/19 is zero, as no pitches were constructed or lost.

Action needed: The Local Plan review will identify a pitch requirement and sites for gypsy and traveller provision as appropriate if there is a clear and demonstrable need based on up to date evidence, in line with the Joint DPD Policy 12.

Relevant Joint DPD Policies: 1, 3, 12.

Source: Oldham Council Strategic Planning and Information section.

Housing

Gross Affordable housing completions (Joint DPD Indicator 15.i)

Joint DPD Objective: Provide sufficient housing to meet the needs and demands of the borough's urban and rural communities, including affordable, low cost and high value market housing (SO2(b)); and

Achieve the right quantity of affordable housing to meet local needs and demands (SO2(c)).

Target: 7.5% of the total development sales value to go towards the delivery of affordable housing where viable in line with Policy 10 of the Joint DPD.

Oldham Position: This indicator continues the approach adopted in the 2011 Monitoring Report and presents information on the gross affordable units completed. Figures quoted below are therefore not comparable with those quoted in previous Monitoring Reports up to 2010.

In 2018/19, 90 new affordable homes were completed. There have been 1,004 affordable homes delivered since 2011/12 - the table below shows the trends:

Year	No. of affordable homes delivered
2011/12	112
2012/13	198
2013/14	202

Housing

Gross Affordable housing completions (Joint DPD Indicator 15.i)

Year	No. of affordable homes delivered
2014/15	280
2015/16	20
2016/17	60
2017/18	42
2018/19	90

Affordable housing delivery was much higher during the years when there was significant activity in the Housing Renewal Areas but, as these sites have been completed, the numbers of new affordable homes being built has reduced.

Action: To support delivery of the council's Affordable Housing Strategy, supporting action plan and the affordable homes delivery programme.

Relevant Joint DPD Policies: 1, 3, 10.

Source: Oldham Council Housing Strategy Delivery Team

Housing

Development density in schemes of 5 dwellings or more (Joint DPD Indicator 14)

Joint DPD Objective: Provide sufficient housing to meet the needs and demands of the borough's urban and rural communities, including affordable, low cost and high value market housing (SO2(b)); and

Make the best use of, and continuing to raise the quality of, our new and existing housing stock (SO2(d)).

Target: N/A

Oldham Position:

Out of 410 dwellings completed during 2018/19, there were 334 dwellings on sites with a capacity of 5 dwellings or more, representing 81% of the total completions.

Densities achieved on these sites were as follows:

- Less than 30 dwellings per hectare = 23.6% (79 dwellings out of 334)

Housing

Development density in schemes of 5 dwellings or more (Joint DPD Indicator 14)

- 30 to 50 dwellings per hectare = 23.6% (79 dwellings out of 334)
- Over 50 dwellings per hectare = 52.7% (176 dwellings out of 334)

Previous year's position:

Due to the monitoring anomalies outlined earlier, the previously quoted position for this indicator was incorrect. In 2017/18, out of 345 dwellings completed during 2017/18, there were 258 dwellings on sites with a capacity of 5 dwellings or more, representing 75% of the total completions.

These figures show that land is continuing to be being used efficiently in Oldham.

Action needed: None.

Relevant Joint DPD Policies: 1,3, 11.

Source: Oldham Council Strategic Planning and Information section.

Housing

Housing completions by size and type (Local Indicator)

Joint DPD Objective: Provide sufficient housing to meet the needs and demands of the borough's urban and rural communities, including affordable, low cost and high value market housing (SO2(b)).

Target: N/A.

Oldham Position: The breakdown of dwellings completed in 2018/19 by house type is shown below:

Detached - 82 (20%)
Semi-detached - 161 (39%)
Terraced - 77 (19%)
Flats - 90 (22%)

The breakdown of dwellings completed in 2018/19 by size is shown below:

1 bedroom - 67 (16%)
2 bedrooms - 80 (20%)
3 bedrooms - 195 (48%)
4 or more bedrooms - 68 (16%)

This shows that 59% of dwellings completed are detached or semi-detached and 64% have 3 or more bedrooms

Housing

Housing completions by size and type (Local Indicator)

Due to the monitoring anomalies identified, an updated position for 2017/18 is that 57% of dwellings completed in that year were detached or semi-detached and 72% have 3 or more bedrooms.

Action needed: Continue to encourage the provision of larger family (three/four plus bed) accommodation as part of the mix of new residential developments. Utilise local evidence, including the Greater Manchester Strategic Housing Market Assessments, Oldham's Local Housing Needs Assessment and Oldham's Housing Strategy, to ensure that housing delivered meets the needs of the local community.

Relevant Joint DPD Policies: 1, 3, 11.

Source: Oldham Council Strategic Planning and Information section.

Housing

Supply of ready to develop housing sites - (Joint DPD Indicator 12)

Joint DPD Objective: Provide sufficient housing to meet the needs and demands of the borough's urban and rural communities, including affordable, low cost and high value market housing (SO2(b)); and

Focus new homes on regeneration areas (including Oldham Town Centre and the former HMR area), also areas within and accessible to the borough's other centres (of Chadderton, Failsworth, Hill Stores, Lees, Royton, Shaw and Uppermill), and rural settlements (such as the Saddleworth villages (SO2(e)); and

Ensure over the lifetime of the Local Plan up to 2026 that approximately 60% of new homes are built in East and West Oldham, with approximately 10% of new homes built in Chadderton, and in Failsworth and Hollinwood, and in Royton, Shaw and Crompton, and in Saddleworth and Lees (SO2(f)).

Target: Five year supply can accommodate borough's housing requirement (to accommodate at least 692 dwellings per year, net of clearance, on average over the Local Plan period up to 2026).

Oldham Position: NPPF requires local planning authorities to demonstrate that they have a five-year supply of deliverable housing land. In Oldham, it also requires an additional buffer of 20% based upon housing delivery, to ensure choice and competition in the market for land.

As of 1 April 2019 the five-year supply contains sufficient land to accommodate 2,381 dwellings (before projected clearance).

In order to determine if this five-year supply of land for housing is adequate, it needs to be compared to the level of housing provision required. This is broken down as follows:

Housing

Supply of ready to develop housing sites - (Joint DPD Indicator 12)

Level of housing provision over plan period (based on Joint DPD)

Housing requirement for the period 2003/04 to 2018/19 ($289 \times 15 + 692 \times 1$)	5,027
Net completions for the period 2003/04 to 2018/19	4,289
Performance against housing requirement up to 2017/18*	-738
Housing requirement for remainder of plan period 2018/19 to 2025/26 (692×8)	5,536
Residual to be delivered over remainder of plan period	N/a**
Estimated clearance up to 2025/26	28
Total housing required for the remainder of plan period ($5,536 + 28$)	5,564
Annual housing requirement up to 2025/26	692**

*Amendment to housing completions for 2017/18 means variance against the Housing Target for 2017/18 is 56, not 24, as completions for 2017/18 were 345 (not 313).

**MHCLGs methodology for calculating local housing need includes an allowance for past under-delivery of housing. As such, the residual from previous years is already considered in the calculation of the 692 homes per year local housing need for Oldham going forward. Therefore the housing requirement for the remainder of the plan period is calculated using the current housing need total for the next 8 years. Projected clearance will be taken out of the supply - explained in the following section.

Level of housing provision over five years

Housing requirement for the period 2018/19 to 2023/24	3,460
Estimated clearance up to 2023/24	20
Total housing requirement for period 2018/19 to 2023/24	3,480

Based on the housing requirement for Oldham, calculated using the standard methodology and taking into account projected clearance, the five-year supply as at 1 April 2019 contains 1,099 fewer dwellings than the level of housing provision required across the period (3,480).

This can be expressed in a number of ways:

As of 1st April 2019, the five-year supply represented 68% of the dwellings required ($2,381 / 3,480 \times 100$)

Housing

Supply of ready to develop housing sites - (Joint DPD Indicator 12)

As of 1 April 2019, there is a 3.4 year supply of deliverable housing land in the borough (2,381/692).

Based on the five-year housing land supply outlined above, it is not possible to provide a buffer of the additional 20% housing requirement set out in NPPF and required through the most recent HDT measurement, to account for under-delivery (moved forward from years 6-10). An additional 20% buffer would produce an annual housing requirement of 830 new homes per year.

The above commentary compares the housing land supply against the housing requirement produced using the Government's recently adopted Standard Methodology for Calculating Local Housing Need. It is acknowledged that the current five-year housing land supply would not meet the local housing requirements, based on this methodology.

Finally, NPPF requires the Monitoring Reports to show how many sites have been delivered from the five-year supply. This can only be demonstrated retrospectively.

The five-year supply published in 2017/18 Monitoring Report contained 2,725 dwellings. During 2018/19, 482 of these dwellings were completed.

A revision to the 2017/18 position is below:

The five year supply published in the 2016/17 Monitoring Report contained 283 sites, comprising 2,743 dwellings. During 2017/18, 272 of these dwellings were delivered.

Action needed: Implement the actions within the Housing Delivery Action Plan to increase the supply of deliverable five-year housing land supply, to be able to identify a supply which is able to meet the new housing requirement (692 dwellings per year) and the relevant buffer in line with the NPPF.

Relevant Joint DPD Policies: 1, 3.

Source: Oldham Council Strategic Planning and Information section.

Housing

Dwellings cleared (Joint DPD Indicator 17)

Joint DPD Objective: Integrate the Oldham Rochdale Housing Market Renewal Pathfinder's and the council's housing objectives, policies, programmes, masterplans and initiatives (SO2(a)).

Target: N/A

Oldham Position: During 2018/19 nine dwellings were lost. One of these was demolished, two were lost through residential conversion and six were lost through change of use from residential to another use.

Since 2006/07 there have been 1,508 dwellings demolished/ lost. This is an average of around 116 dwellings per annum.

Housing

Dwellings cleared (Joint DPD Indicator 17)

Clearance levels have been high in previous years, reaching their highest in 2010/11 due to the regeneration activity that has taken place within the borough.

Levels of clearance will be kept under review although it is expected that these will continue at a marginal rate over the plan period.

Action needed: None.

Relevant Joint DPD Policies: 1, 3, 11.

Source: Oldham Council Strategic Planning and Information section.

Housing

Reduction in the vacancy rate (Joint DPD Indicator 18)

Joint DPD Objective: Make the best use of, and continuing to raise the quality of, our new and existing housing stock (SO2(d)).

Target: 3% vacancy rate.

Oldham Position: This indicator is now being monitored annually from 1st October to 30th September, to align vacancy rate monitoring with other departments in the council. The figures for October 2011 onwards are therefore not comparable with those quoted in previous Monitoring Reports. The latest figures are:

- Total stock as at 2019 = 96,958
- Total vacant as at 1st October 2019 = 2,117
- % Vacant as at 1st October 2019 = 2.18%
- Total stock as at 1st October 2018 = 96,366
- Total vacant as at 1st October 2018 = 2,180
- % Vacant as at 1st October 2018 = 2.26%

There has been a small decrease in the percentage of long term vacancies from 2018 to 2019.

Action needed: None.

Relevant Joint DPD Policies: 1, 3.

Source: Oldham Council Housing Strategy Delivery Team.

Housing

Number of properties added to stock which have 3+bedrooms in HMR area (Joint DPD Indicator 19)

Joint DPD Objective: Integrate the Oldham Rochdale Housing Market Renewal Pathfinder's and the council's housing objectives, policies, programmes, masterplans and initiatives (SO2(a)); and

Focus new homes on regeneration areas (including Oldham Town Centre and the former HMR area), also areas within and accessible to the borough's other centres (of Chadderton, Failsworth, Hill Stores, Lees, Royton, Shaw and Uppermill), and rural settlements (such as the Saddleworth villages (SO2(e))

Target: at least 70% of properties completed to have 3+ bedrooms to be in a HMR area

Oldham Position: Whilst HMR no longer exists it is still considered important to monitor the number of 3+ bedrooms coming forward, particularly in terms of illustrating how we are delivering a mix of housing.

Within the former HMR areas, there were 115 dwellings completed in 2018/19 with 3+ bedrooms (53% of a total of 219 dwellings completed in these areas), representing 28% of all completions.

Action needed: None.

Relevant Joint DPD Policies: 1, 3 and 11

Source: Oldham Council Strategic Planning and Information section.

Key Issues

- 3.6** A total of 410 dwellings (net) were completed over the period 1 April 2018 to 31 March 2019. During 2018/19 nine dwellings were lost. One of these was demolished, two were lost through residential conversion and six were lost through change of use from residential to another use.
- 3.7** MHCLGs methodology for calculating local housing need includes an allowance for past under-delivery of housing. As such, the residual from previous years is already considered in the calculation of the 692 homes per year local housing need for Oldham. Based on this housing requirement, calculated using the standard methodology and taking into account projected clearance, the five-year supply as at 1 April 2019 contains 1,099 fewer dwellings than the level of housing provision required across the period (3,480).
- 3.8** As of 1 April 2019, the borough's five-year supply contains sufficient land to accommodate 2,381 dwellings. This represents a 3.4 year supply of deliverable housing against the current housing requirement. Based on this supply it is not possible or practicable to provide a 20% buffer to account for under-delivery and ensure market flexibility (as set out in NPPF and required by the most recent HDT measurement) within this 5-year period. If a buffer were to be applied, Oldham's Housing Need would be 830 new homes per year.

- 3.9** The significant step change in the annual housing requirement, from 289 to 692 new homes per year, means that there has been under delivery of housing when the annual completions are compared to the housing requirement in 2018/19. Whilst the previous levels of housing completions have been able to meet the housing requirement set out in the Joint DPD, going forward in order to meet this increased housing need, a significant increase in the number of housing completions is required. A Housing Delivery Action Plan has been prepared to drive and deliver a growth in housing delivery, ensuring the right homes are delivered in the right places to meet local housing needs. This is available to view at: [Oldham Housing Delivery Action Plan](#)
- 3.10** The Housing Delivery Action Plan has been prepared to increase the delivery of housing across the borough, this includes measures such as:
- Improving capacity and processes;
 - Increasing the delivery of sites within our housing land supply, in particular on previously developed land (brownfield); and
 - Delivery of the Council's ambitions to improve and increase the housing offer within Oldham.
- 3.11** The Action Plan will be reviewed regularly and updated annually to ensure actions are delivered as appropriate.
- 3.12** 56% of all completions during 2018/19 for new residential development were on previously developed land. This is significantly lower than previous years due to a high number of completions on mixed sites (containing both infill and greenfield land), however the focus for new residential development will remain on previously developed land in line with the requirement set out in the Joint DPD and the Council will ensure that actions to increase the delivery of housing on previously developed land are implemented, in line with the Housing Delivery Action Plan.
- 3.13** The proportion of detached and semi-detached properties being built has remained the same as the year before (59% of all completions were detached or semi-detached in 2018/19 and 2017/18). The number has increased since 2014/15 (when only 49% were detached or semi-detached). The proportion of terraced properties has decreased from last year (19% in 2018/19 and 30 % in 2017/18). The proportion of three and four bedroomed plus properties has decreased to 64% of all completions (from 75% in 2017/18). The need for larger family accommodation continues, along with the need to encourage development of higher value aspirational housing that will provide opportunities for existing residents and attract new residents to the borough. The supply and delivery of new houses and apartments in the borough will continue to be monitored.

Future Action

- Continue to update the council's five-year deliverable housing land supply annually in line with NPPF and regularly update the council's SHLAA to inform the preparation of the GMSF and the emerging Local Plan review.
- Whilst each application will be treated on its planning merits, proposals for residential development on greenfield sites will (whether new proposals or where the renewal of planning permission is sought) continue to be resisted unless there are other relevant material considerations.

- The focus for new residential development will remain on previously developed land and the council will ensure that actions to increase the delivery of housing on previously developed land are implemented (as set out in the Housing Delivery Action Plan).
- Planning applications for the conversion and change of use of agricultural buildings to residential use and which are technically classified as greenfield developments (because agricultural buildings are not regarded as “previously developed land”) continue to be treated on their planning merits.
- The Local Plan will identify sites for gypsy and traveller provision, as appropriate, if there is a clear and demonstrable need based on up to date evidence in line with the Joint DPD Policy 12.
- Encourage the provision of larger family (three/four plus bed) accommodation and higher value, aspirational, housing as part of the mix of new residential developments.
- Utilise local evidence, including the Greater Manchester Strategic Housing Market Assessment, Oldham's Local Housing Needs Assessment and the recently adopted Housing Strategy, to ensure that housing delivered meets the needs of the local community.

3.14 In past years key actions have been that 'Saved' UDP Phase 2 Housing Allocations are not brought forward and released for development and that preparation of the SPD on the “Release of UDP Phase 2 Housing Allocations” will be rolled forward twelve months (with its preparation subject to the conclusions of the next Monitoring Report). These actions have, however, been superseded now that work is progressing on the GMSF, the emerging Local Plan review and the current housing land supply position. The phasing arrangements set out in the UDP no longer apply and the site allocations will be reviewed as part of the emerging Local Plan.

Transport

Indicators

Transport
Number of travel plans secured as a condition of planning permission (Joint DPD Indicator 26).
Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by reducing the need to travel and encouraging walking, cycling and the use of public transport (SO1e).
Target: N/A.
Oldham Position: Nine travel plans were secured as a condition of planning permissions in 2018/19.
The number of travel plans secured as a condition of planning permissions in previous years were:
2017/18: 8
2016/17: 7

Transport
Number of travel plans secured as a condition of planning permission (Joint DPD Indicator 26).
2015/16: 8
2014/15: 8
2013/14: 11
2012/13: 6
Action needed: None.
Relevant Joint DPD Policies: 1, 5, 17.
Sources: Oldham Council Strategic Planning and Information section.

Key Issues

3.15 There are currently no issues linked with this indicator. There was only one less travel plan requested compared to last year.

Access to services
i) Number of minor⁽⁵⁾ residential developments with access to at least 2 key services (Joint DPD Indicator 23i)
ii) Number of major⁽⁶⁾ residential developments with access to at least 3 key services (Joint DPD Indicator 23ii).
Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by guiding development to the most accessible and sustainable locations (SO1d).
Target: N/A.
Oldham Position: 68% of minor residential developments in 2018/19 had access to at least two key services. 71% of major residential developments in 2018/19 had access to at least three key services. Previous years:

5 The definition of minor development can be found in Policy 5 of the Joint DPD

6 The definition of major development can be found in Policy 5 of the Joint DPD

Access to services i) Number of minor⁽⁵⁾ residential developments with access to at least 2 key services (Joint DPD Indicator 23i) ii) Number of major⁽⁶⁾ residential developments with access to at least 3 key services (Joint DPD Indicator 23ii).
2016/17: 66% minor and 80% major 2015/16: 72% minor and 95% major 2014/15: 66% minor and 98% major 2013/14: 69% minor and 78% major 2012/13: 90% minor and 91% major
Action needed: None.
Relevant Joint DPD Policies: 1, 5, 16, 17.
Sources: Oldham Council Strategic Planning and Information section.

Key Issues

- 3.16** The percentage of major residential developments with access to three or more key services has varied since 2012/13. There is a need to continue to ensure that new residential developments have access to key services.

Future Action

- 3.17** The council will continue to raise awareness of the importance of accessibility to key services for new residential developments.
- 3.18** The policies within the Joint DPD aim to ensure that new developments are in the most accessible locations with good transport links and make use of travel plans in major new developments.

5 The definition of minor development can be found in Policy 5 of the Joint DPD

6 The definition of major development can be found in Policy 5 of the Joint DPD

LOCAL SERVICES

Town Centre Uses

Indicators

Local Services – Town Centre Uses
Total amount of floorspace for 'town centre uses' (Joint DPD Indicator 10)
Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by facilitating appropriate developments in Oldham Town Centre, the centres of Chadderton, Failsworth, Hill Stores, Lees, Royton, Shaw and Uppermill, and along transport corridors (SO3e).
Target: N/A.
Oldham Position: In 2018/19 a new system was implemented to monitor the 'town centre' uses. A database has been compiled of approved 'town centre use' applications in 2018/19 of over 500sqm. This year there were no completions from the database, however as the database grows and the developments start, this is expected to change in future years. Aldi at Chadderton did have a completion on an extension in the monitoring period, however it was below 500sqm.
Action needed: Processes to be put in place to ensure future monitoring of indicator.
Relevant Joint DPD Policies: 1, 4, 15.
Sources: Oldham Council Strategic Planning and Information section.

Key Issues

3.19 There is a continued need to locate 'town centre uses' in or near to centres.

Future Action

3.20 Processes are to be put in place to ensure future monitoring of the indicator improves as appropriate.

MINERALS

Indicators

Minerals – Primary Land Won Aggregates

Production of primary land won aggregates by mineral planning authority (Joint DPD Indicator 32 and Joint Minerals DPD Indicator M1).

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting the sustainable management of minerals through the prudent use, recycling, conservation and safeguarding of mineral resources. Developments will have regard to the Greater Manchester Joint Minerals DPD (SO1j).

Target: N/A

Oldham Position: The Greater Manchester Minerals and Waste Planning Unit (GMMWPU) has provided an aggregated figure for Greater Manchester, Halton, Warrington and Merseyside for 2018.

Aggregate crushed rock landbank as at 31 December 2018:

- Permitted reserves: 17.5 million tonnes
- Annual apportionment requirement 2005-2020: 0.85 million tonnes
- Landbank: 29.2 years

Aggregate land-won sand and gravel landbank as at 31 December 2018:

- Permitted reserves: 1.2mt
- Annual apportionment requirement 2005-2020: 0.3 million tonnes
- Landbank: 4 years.

The GMMWPU has provided further information, including trends, on this indicator. Please see Section 6 'Greater Manchester Development Plan Documents'.

Action needed: None.

Relevant Joint DPD Policies: 1, 8.

Source: Greater Manchester Mineral and Waste Planning Unit.

Minerals – Secondary/Recycled Aggregates

Production of secondary and recycled aggregates by mineral planning authority (Joint DPD Indicator 33 and Joint Minerals DPD Indicator M2).

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting the sustainable management of minerals through the prudent use, recycling, conservation and safeguarding of mineral resources. Developments will have regard to the Greater Manchester Joint Minerals DPD (SO1j).

Minerals – Secondary/Recycled Aggregates
Production of secondary and recycled aggregates by mineral planning authority (Joint DPD Indicator 33 and Joint Minerals DPD Indicator M2).
Target: N/A.
<p>Oldham Position:</p> <p>2018 (million tonnes):</p> <ul style="list-style-type: none"> Crushed rock sales: 0.65 Crushed rock reserves: 17.5 Sand and gravel sales: 0.26. Sand and gravel reserves: 4.0. <p>The GMMWPU has provided further information, including trends, on this indicator. Please see Section 6 'Greater Manchester Development Plan Documents'..</p>
Action needed: None.
Relevant Joint DPD Policies: 1, 8.
Source: Greater Manchester Minerals and Waste Planning Unit.

Key Issues

3.21 Oldham is dependent on the GMMWPU and the Regional Aggregate Working Party's (RAWP) annual monitoring and the DCLG for aggregate figures. These figures provide an aggregated figure for Greater Manchester, Halton, Warrington and Merseyside. They cannot be assigned to individual boroughs for confidentiality reasons.

WASTE

Indicators

Waste
Capacity of new waste management facilities by waste planning authority (Joint DPD Indicator 35).
<p>Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting sustainable waste management through the waste hierarchy. Developments will have regard to the Greater Manchester Joint Waste DPD (SO1k).</p>
Target: N/A

Waste

Capacity of new waste management facilities by waste planning authority (Joint DPD Indicator 35).

Oldham Position: During 2018/19 there were no planning permissions granted for new waste management facilities.

Action needed: None.

Relevant Joint DPD Policies: 1, 7.

Sources: Oldham Council Strategic Planning and Information section.

Waste

Amount of municipal waste arising, and managed by management type by waste planning authority (Joint DPD Indicator 34).

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting sustainable waste management through the waste hierarchy. Developments will have regard to the Greater Manchester Joint Waste DPD (SO1k).

Target: 33% of household waste managed by recycling and composting.

Oldham Position: All figures reported are for Household Waste only. All figures come from Waste Data Flow which is verified by the Environment Agency and DEFRA.

Total Amount of Household Waste Arisings 2018/19: 66,972 tonnes.

Of the total household waste 29,901 tonnes was managed by recycling and composting.

Total amount of household waste managed by landfill: 0 tonnes. 37,072 tonnes now incinerated.

The overall recycling rate in Oldham for 2018/19 was 44.65%.

In previous years the recycling rate was:

2017/18: 44.69%

2016/17: 42.53%

2015/16: 39%

2014/15: 38%

2013/14: 37%

2012/13: 36.76%

Waste

Amount of municipal waste arising, and managed by management type by waste planning authority (Joint DPD Indicator 34).

Action needed: None.

Relevant Joint DPD Policies: 1, 7.

Sources: Oldham Council.

Key Issues

3.22 There are currently no issues linked with this indicator. The Joint Waste DPD was adopted on 1 April 2012. The Joint Waste DPD contained a number of additional indicators to monitor the effectiveness of the plan policies.

Future Action

3.23 The policies within the Joint DPD and the Joint Waste DPD continue to recognise the importance of sustainable waste management.

FLOOD PROTECTION AND WATER QUALITY

Indicators

Flood Protection and Water Quality

Number of planning permissions granted contrary to Environment Agency advice on flooding and water quality grounds (Joint DPD Indicator 28i).

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by avoiding development within areas of flood risk and where necessary controlling and mitigating the impact and residual risks. Developments will have regard to the findings of the Oldham Strategic Flood Risk Assessment (SO1h).

Target: None

Oldham Position 2018/19: There were no Environment Agency objections on the basis of water quality.

Since 2012/13 (the full monitoring year following adoption of the Joint DPD) there have been no objections on water quality grounds from the Environment Agency (EA).

In 2018/19 there were four planning applications which received EA objections on the basis of flood risk. One of these applications was withdrawn and three applications were granted planning permission. The EA confirmed that they were satisfied with the revised flood risk assessments

Flood Protection and Water Quality

Number of planning permissions granted contrary to Environment Agency advice on flooding and water quality grounds (Joint DPD Indicator 28i).

submitted for two of the three planning applications granted. However one application for one dwelling was granted where the EA objection was not recorded and therefore not addressed. Notwithstanding this, a FRA should have been requested prior to the application being validated.

Since 2012/13 there have been EA objections on flood risk grounds each year. During 2017/18 and 2018/19 there has been one application each year granted contrary to the advice of the EA. In 2017/18 this was for an allotment including a shed which fell outside of Flood Zone 2 and in 2018/19 the application was for one dwelling.

Action needed: Continue to ensure that Environment Agency and Lead Local Flood Authorities (LLFA) advice is addressed.

Relevant Joint DPD Policies: 1, 19.

Source: Environment Agency and Oldham Council Development Management.

Key Issues

- 3.24** This year monitoring has raised the issue that officers need to be clear when a Flood Risk Assessment is required and ensure that this is received before the application is validated.

Flood Protection and Water Quality

Number of new developments where agreed with the council incorporated Sustainable Urban Drainage System (SUDS) (Joint DPD Indicator 28ii).

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by avoiding development within areas of flood risk and where necessary controlling and mitigating the impact and residual risks. Developments will have regard to the findings of the Oldham Strategic Flood Risk Assessment (SO1h).

Target: 100% of developments (where agreed with the council)

Oldham Position 2018/19:

A provisional figure of four schemes using SUDs in their development scheme has been given. However, the figure cannot be confirmed this year due to the unexpected loss of the officer who previously provided this information. Systems and processes have been updated to ensure that this figure is easily obtainable in the future.

SUDs consents approved in previous years:

Flood Protection and Water Quality

Number of new developments where agreed with the council incorporated Sustainable Urban Drainage System (SUDS) (Joint DPD Indicator 28ii).

- 2017/18: 41 applications checked for SUDS. Fifteen of these used SUDS in their development scheme.
- 2016/17: 33 applications checked for SUDS. Five of these used SUDS in their development scheme.
- 2015/16: 31 applications checked for SUDS. Six of these used SUDS in their development schemes.
- 2014/15: 32 applications checked for SUDS. Six of these used SUDS in their development schemes.
- 2013/14: 33 applications checked for SUDS. Sixteen of these used SUDS in their development schemes.
- 2012/13: Three developments used SUDS in their schemes.

Action needed: None.

Relevant Joint DPD Policies: 1, 19.

Source: Oldham Council, Highway Assets and Network

Key Issues

3.25 The key issue this year is to ensure that the Lead Local Flooding Authority (LLFA) and the council have systems and processes in place to monitor SUDS in the future. There is a need to encourage more SUDS to address surface water flood risk, particularly as part of Green Infrastructure and the promotion of its multi-functional benefits.

Future Action

3.26 The LLFA is now a statutory consultee on major planning applications and will address surface water flood risk and SUDS.

BIODIVERSITY

Indicators

Biodiversity
i) Change in areas of biodiversity importance (Joint DPD Indicator 38i); and
ii) Improved local biodiversity (Joint DPD Indicator 38ii).
Joint DPD Objective: To improve and value the borough's environment by protecting, conserving and enhancing the character and quality of the borough's landscapes and townscapes, its natural assets and heritage, green infrastructure, biodiversity and geodiversity, and its built heritage and historic environment, including their wider settings (SO4b).
Target: N/A
<p>Oldham Position: In 2019 the council received a Sites of Biological Importance (SBI) update report from Greater Manchester Ecology Unit (GMEU) for 2017. This resulted in boundary changes at Medlock Headwater and Strinesdale (Grade B); Medlock Vale and Lumb Clough (North) (Grade C) and Shaw Side (Grade C) equating to +2.4 hectares.</p> <p>Previous years:</p> <p>2017/18: one SBI deleted at Royton Moss resulting in 2.3 hectares loss. Plus designation of a Regionally Important Geodiversity Site (RIGS) at Glodwick Brickpit.</p> <p>2016/17: no changes reported.</p> <p>2015/16: extent of SBI's increased by 2.3 hectares.</p> <p>2014/15: extent of SBI's increased by 3.6 hectares.</p> <p>2013/14: extent of SBI's decreased by 0.1 hectares.</p> <p>2012/13: extent of SBI's increased by 43.2 hectares.</p> <p>Defra publishes data on the 'Single data list 160-00 Proportion of local sites where positive conservation management is being or has been implemented'. The latest figures were supplied to Defra in 2019 by Oldham Council and show that in Oldham, 100% of local sites (41) are under positive conservation management.</p> <p>Previous years:</p> <p>2017/18: 100% of local sites (41) are under positive conservation management.</p> <p>2016/17: 100% of sites (41) under positive conservation management.</p> <p>2015/16: 100% of sites (41) under positive conservation management.</p> <p>2014/15: 100% of SBIs under positive conservation management.</p> <p>2013/14: no data.</p>

Biodiversity

i) Change in areas of biodiversity importance (Joint DPD Indicator 38i); and

li) Improved local biodiversity (Joint DPD Indicator 38ii).

2012/13: 100% of sites (9 SBIs) under positive conservation management.

The Joint Nature Conservation Committee (JNCC) UK reports changes to Special Areas of Conservation (SAC) and Special Protection Areas (SPA). In 2018/19 there were no changes reported to SACs/SPA. Since 2013/13 there have been qualitative changes to the SACs/SPA.

There have been no changes to SSSIs in the monitoring year. Since 2013/13 there have been qualitative changes to the SSSIs.

Action needed: None.

Relevant Joint DPD Policies: 1, 6, 21.

Source: Defra, Natural England and Joint Nature Conservation Committee

Key Issues

3.27 Biodiversity and habitat management runs through everything we do across our countryside estate, and so from none / limited intervention to major schemes and projects all sites are positively managed in relation to conservation and biodiversity.

3.28 Since 2012/13 there has been a significant increase in the extent of Sites of Biological Importance and the borough has gained a Regionally Important Geodiversity Site.

Future Action

3.29 Ensure that biodiversity is enhanced through biodiversity net gain proposals emerging from central government and GMSF and the Local Plan review.

RENEWABLE ENERGY

Renewable Energy

Renewable energy generation installed (Joint DPD Indicator 31)

Local Indicator: Percentage of large developments incorporating low carbon generation.

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by supporting carbon neutral developments by following the principles of the zero carbon hierarchy (SO1a).

Target: N/A.

Renewable Energy

Renewable energy generation installed (Joint DPD Indicator 31)

Oldham position: Joint DPD Policy 18 requires major developments to meet energy targets over and above Part L Building Regulations. In 2018/19, 5 out of 17 relevant major applications were granted permission with a condition attached or details included within the application requiring applicants to meet Policy 18. This represents 29% of applications.

Previous years:

2017/18: 27%

2016/17: 65%

2015/16: 60%

2014/15: 81%

2013/14: 86%

2012/13: 71%

Over the past year there have been 17 major developments completed or partially completed (housing schemes) which were required to meet energy reduction targets (seven were implemented under UDP Policy NR3.3 requiring 10% of energy from renewable sources and eleven were developed under Joint DPD Policy 18).

For the schemes where information is available, the following technologies were stated to be installed:

- Former Parkfield House, 580 Ripponden Road: 3 houses completed. Scheme is providing 15% improvement over Building Regulations Part L through fabric first approach.
- Land at London Road, Derker: 35 houses completed - target (18.96%) to be exceeded through the use of fabric improvements.
- Former Failsworth Mill: 27 houses completed - over 15% reduction to be achieved through fabric first approach and solar PV panels.
- Lancaster Club - 48 houses completed - fabric first approach.
- Land at Mortimer Street - 13 houses completed - fabric first approach
- 40 Bow Street - 9 houses completed - fabric first approach and PV panels to meet 15% target.
- Land at Ward Lane: one house completed - target to be met through a fabric first approach and PV panels.
- Former St. Augustine of Canterbury Royal Catholic High School, Grange Avenue: 2 houses completed - target to be achieved through fabric improvements.
- Land off Wellington Road - 2 houses completed - fabric first approach.

Renewable Energy

Renewable energy generation installed (Joint DPD Indicator 31)

- Crossley Estate - 5 houses completed - each property to be built to code level 3 and solar thermal.
- Land at Schofield Street, Ashton Road and Copsterhill Road - one house completed - Photovoltaics to be provided on each of the houses within phase 1.
- Land at Alfred Street, Castleton Street and Edward Street - nine houses completed - Photovoltaics to be provided on each of the houses within phase 1.
- Primrose Bank Estate (Magnolia Gardens): 16 houses completed - proposed target to be achieved through fabric improvements and solar thermal energy.

Action needed: None.

Relevant Joint DPD Policies: 1, 18.

Source: Oldham Council, Strategic Planning. Ofgem.

Key Issues

3.30 The percentage of applications with a condition attached requiring development to meet Policy 18 is 29%. This is significantly lower than previous years. There has been confusion around whether the policy had been superseded at a national level due to the Government's previous intention to introduce zero carbon homes. Strategic Planning is working with Development Management to clarify the policy position.

Future Action

3.31 Ensure the policy is applied until superseded.

GREEN BELT AND OPEN LAND

Green Belt

Number and type of developments in the Green Belt (Joint DPD Indicator 36)

Joint DPD Objectives: To improve and value the borough's environment by ensuring appropriate land management in the open countryside and Green Belt that has regard to the needs of the rural economy (SO4d); and

To improve and value the borough's environment by maintaining Green Belt boundaries, and permitting only appropriate developments (SO4e).

Target: N/A.

Green Belt

Number and type of developments in the Green Belt (Joint DPD Indicator 36)

Oldham Position: There were 100 applications approved in the Green Belt during 2018/19. These included:

- Householder developments: 36
- Minor other: 25
- Minor dwellings: 11
- Change of use: 12
- Certificate of Lawfulness: 9
- Listed building consent: 7

Previous years (number of applications approved in the Green Belt):

2017/18: 84

2016/17: 79, including one major residential application.

2015/16: 97

2014/15: 105, including one major residential application.

2013/14: 84, including one major retail, distribution and servicing application.

2012/13: 105.

Action needed: None

Relevant Joint DPD Policy: 1, 22.

Source: Oldham Council Strategic Planning and Information section.

Key Issues

3.32 The number of applications granted is slightly higher than the past few years. There were no major developments in the Green Belt permitted last year.

3.33 Generally applications approved in the Green Belt are minor in nature.

Future Action

3.34 The council should continue to protect Green Belt in line with policies of the NPPF and the Local Plan.

Other Protected Open Land
Number and type of developments in Other Protected Open Land (Joint DPD Indicator 39i)
Joint DPD Objective: To improve and value the borough's environment by identifying 'Other Protected Open Land' and 'Land Reserved for Future Development' (SO4f).
Target: N/A.
<p>Oldham Position: A search for applications within Other Protected Open Land (OPOL) in 2018/19 highlighted that there were five applications granted on sites including OPOL. These applications included:</p> <ul style="list-style-type: none"> • Two householder applications for extensions; • Insertion of a rear dormer window; • One application for a safeguarding lobby to a school entrance. • New secondary school with associated landscaping, parking etc. The development does not introduce built development into the part of the site designated as OPOL. It was considered the application was acceptable. <p>Number of planning applications granted on OPOL in previous years:</p> <ul style="list-style-type: none"> • 2017/18: 3 • 2016/17: 3 • 2015/16: 5 • 2014/13: 8 • 2013/14: 6 • 2012/13: 3
Action needed: None.
Relevant Joint DPD Policy: 1, 22.
Source: Oldham Council Strategic Planning and Information section.

Key Issues

3.35 Over the years the number of planning applications has fluctuated but has been fewer than ten each year. The developments granted above were all considered to be acceptable.

3.36 There has been a large housing development granted outside of the monitoring period, this will be reported on in next year's monitoring period.

Future Action

- 3.37** The council should protect designated OPOL from development unless the proposed development is appropriate, small scale or ancillary development close to existing buildings within the OPOL, which does not affect openness, local distinctiveness or visual amenity in line with the Local Plan policy. There are however three OPOL designations proposed for development in the draft GMSF.

Land Reserved for Future Development

Number and type of developments in Land Reserved for Future Development (Joint DPD Indicator 39ii)

Joint DPD Objective: To improve and value the borough's environment by identifying 'Other Protected Open Land' and 'Land Reserved for Future Development' (SO4f).

Target: N/A.

Oldham Position: There were no applications granted within Land Reserved for Future Development (LRFD) in 2018/19.

There have been no applications granted within LRFD since 2012/13.

Action needed: None.

Relevant Joint DPD Policies: 1, 22.

Source: Oldham Council Strategic Planning and Information section.

Key Issues

- 3.38** There are no issues linked with this indicator. There is one LRFD site at Bullcote Lane, Shaw allocated within the Joint DPD. There have been no applications granted on the allocation since the Joint DPD was adopted. It does however form part of a proposed strategic allocation in the draft GMSF.

Future Action

- 3.39** The council should ensure that any development on LRFD is only granted where it would be acceptable in the Green Belt and not prejudice the later development of LRFD beyond the life of the Joint DPD, whilst still designated as LRFD.

Landscape Character
Number of planning applications refused on landscape character grounds (Joint DPD Indicator 27)
<p>Joint DPD Objective: To improve and value the borough's environment by protecting, conserving and enhancing the character and quality of the borough's landscapes and townscapes, its natural assets and heritage, green infrastructure, biodiversity and geodiversity, and its built heritage and historic environment, including their wider settings (SO4b).</p>
<p>Target: 100% of planning applications that do not protect and / or enhance landscape character, where appropriate, should be refused.</p>
<p>Oldham Position:</p> <p>During 2018/19 there was one planning application refused on matters relating to landscape character. This was a hybrid application for land at Knowls Lane. The proposal was for 265 dwellings and a link road. The application was re-submitted outside the monitoring period and subsequently approved.</p> <p>Previous years:</p> <p>2017/18: 0</p> <p>2016/17: 4</p> <p>2015/16: 6</p> <p>2014/15: 4</p> <p>2013/14: 5</p> <p>2012/13: 2</p> <p>2011/12: 2</p>
<p>Action needed: None.</p>
<p>Relevant Joint DPD Policy: 21</p>
<p>Source: Oldham Council Strategic Planning and Information section.</p>

Key Issues

- 3.40** Monitoring shows that proposals are being refused on matters relating to landscape character in the past.

Future Action

- 3.41** The Joint DPD aims to ensure that the borough's landscape is conserved and enhanced when assessing planning applications.

CONSERVATION

Conservation
<p>i) Number and percentage of listed buildings and Scheduled Ancient Monuments on the English Heritage 'Heritage at Risk Register' (Joint DPD 22i)</p> <p>ii) Number/extent of Conservation Areas (Joint DPD 22ii)</p> <p>iii) Number of listed buildings and number of buildings in conservation areas lost through new development proposals (Joint DPD Indicator 22iii).</p>
<p>Joint DPD Objective: To improve and value the borough's environment by protecting, conserving and enhancing the character and quality of the borough's landscapes and townscapes, its natural assets and heritage, green infrastructure, biodiversity and geodiversity, and its built heritage and historic environment, including their wider settings (SO4b).</p>
<p>Target: No loss</p>
<p>Oldham Position in 2018/19:</p> <p>i) There are ten buildings in the borough on the Historic England at Risk Register. These are:</p> <ol style="list-style-type: none">1. Church of St. Mark with Christchurch, Glodwick Road, Glodwick - The church is generally in very bad condition with the roof and high level stonework of particular concern;2. Church of St. Margaret, Chapel Road, Hollinwood - Three Historic England / Heritage Lottery Fund Repair Grant for Places of Worship projects have been completed, addressing the failings of the tower, the north roofs and the west window. The current project to repair slate roofs and problems associated with rot and lost plaster commenced on site in the autumn of 2018;3. Church of St Chad, Church Lane, Saddleworth - There is a significant fault with the east window, where the tracery has bowed due to presence of rusting iron dowels within the joint positions;4. Christ Church, Friezland, Church Road, Saddleworth (Grade II) - Extensive areas of damp noted, especially to the base of the tower. Extensive paint and plaster loss with high risk of wet and dry rot to roof timbers. The works are being supported by the Heritage Lottery Fund's Grant for Places of Worship scheme;5. Foxdenton Hall, Foxdenton Lane, Chadderton - Discussions are ongoing with Oldham Council regarding the schedule of repair works and finding a long-term use for the building;6. 1-5 Hollins Road, Oldham - At risk due to poor condition of the roof, which is allowing considerable water ingress;

Conservation

i) Number and percentage of listed buildings and Scheduled Ancient Monuments on the English Heritage 'Heritage at Risk Register' (Joint DPD 22i)

ii) Number/extent of Conservation Areas (Joint DPD 22ii)

iii) Number of listed buildings and number of buildings in conservation areas lost through new development proposals (Joint DPD Indicator 22iii).

7. Union Street United Reformed and Methodist Church, Union Street, Oldham - In poor condition. A first phase of work has been undertaken with the support of the Heritage Lottery Fund's Grants for Places of Worship scheme. A second phase should complete a comprehensive repair programme;
8. Church of St Stephen and All Martyrs, St Stephen's Street, Oldham - further phase of making good the interior is needed to complete the restoration. The building has been a victim of heritage crime;
9. Church of St John, Oldham Road, Failsworth - Slate roofs to the nave and aisles remain in a vulnerable condition; and
10. St Paul's Methodist Church, Rochdale Road, Shaw and Crompton - Vacant church and condition is declining.

Church of St Chad, Foxdenton Hall and 1 – 5 Hollins Road are Grade II* listed and the remaining are Grade II.

In previous years the number of listed buildings on the heritage at risk register has been:

2017/18: 10 buildings

2016/17: 9 buildings

2015/16: 10 buildings

2014/15: 7 buildings

2013/14: 6 buildings

2012/13: 6 buildings

There are no Scheduled Ancient Monuments in the borough on the Historic England at Risk Register. This has remained the same since the Joint DPD was adopted.

ii) There are 36 conservation areas covering 250.79 ha. This has remained the same since the Joint DPD was adopted. However, 'Oldham Town Centre' conservation area is on the 'Heritage at Risk' list.

An updated Conservation Area Appraisal and Management Plan for Oldham Town Centre has been carried out and adopted as a Supplementary Planning Document in August 2019. This has included four extensions to the conservation area totalling 4.04 hectares. This variation has been

Conservation

i) Number and percentage of listed buildings and Scheduled Ancient Monuments on the English Heritage 'Heritage at Risk Register' (Joint DPD 22i)

ii) Number/extent of Conservation Areas (Joint DPD 22ii)

iii) Number of listed buildings and number of buildings in conservation areas lost through new development proposals (Joint DPD Indicator 22iii).

designated under Section 69 of the Planning (Listed Buildings and Conservation Areas) Act 1990. However, until the reviewed Local Plan is adopted these extensions cannot be shown on the Local Plan Proposals Map and will be treated as a material planning consideration. It is hoped that the Management Plan will help to remove Oldham Town Centre Conservation Area from the 'Heritage at Risk' register.

iii) An assessment of the planning applications approved for 2018/19 shows:

Loss of listed buildings:

- Hartford Mill - complete demolition of listed building in association with outline application for residential development. Whilst loss of the mill is regrettable the benefits were considered to outweigh the harm.

The following applications related to Listed Building alterations that included removal of part of the listed buildings or buildings / structures within their setting:

- Werneth Grange - application included external works, including removal of 1st floor link corridor and canopy, replacement of external staircase. It was considered that the proposed alterations would have less than substantial harm to the significance of the existing asset, enabling the optimum use and thus delivering a public benefit
- Butterhouse, Dobcross - application includes removal of blue slate roof, replacement of windows, removal of plaster in study. It was considered that the proposals preserved the special interest and its setting of the Grade II listed building.
- Mayfield House, Springhead - application includes demolition of timber outbuilding. It was considered that the proposals would not cause harm to the heritage asset. The removal of the existing structure and replacement in the scale of the garage, and the implementation of sympathetic external finishing materials and fenestration would enhance the setting of the listed building.
- Thurston Clough Farm - the application includes removal of some areas of external walls - it was considered that the proposed development would cause 'less than substantial' harm to the heritage asset i.e. the Grade II listed building.

Conservation

i) Number and percentage of listed buildings and Scheduled Ancient Monuments on the English Heritage 'Heritage at Risk Register' (Joint DPD 22i)

ii) Number/extent of Conservation Areas (Joint DPD 22ii)

iii) Number of listed buildings and number of buildings in conservation areas lost through new development proposals (Joint DPD Indicator 22iii).

- Former Oldham Library - the application includes removal of first floor slab and removal of sections of flooring and staircases. It was considered that the conversion of the Library building will bring a vacant Grade II Listed Building back into use, contributing to the character and appearance of the Conservation Area and the wider town centre.
- Sykes Cottage, Holly Grove - the proposal includes demolition of existing garage. It was considered that the demolition of the pre-fab concrete garage, to be replaced with a timber outbuilding of modest scale would serve to 'enhance' the setting of the Grade II heritage asset and the wider Holly Grove Conservation Area.

There was one application for demolition of buildings in conservation areas. This was for the removal of part of an existing front boundary wall. It was determined that the works would have no significant impact on the character and appearance of Uppermill Conservation Area.

Previous years (for both part demolitions of listed buildings and/or their settings and demolition in conservation areas):

- 2017/18: Listed buildings - three applications; conservation areas - zero applications.
- 2016/17: Listed buildings- four applications; conservation areas - two applications;
- 2015/16: Listed buildings - two applications; conservation areas - one application;
- 2014/15: Listed buildings - six applications; conservation areas - three applications; and
- 2013/14: Listed buildings - two applications; conservation areas - eight applications.

Action needed: None. Policy 24 of the Joint DPD states that the council will protect, conserve and enhance heritage assets and their settings.

Relevant Joint DPD Policies: 1, 24.

Source: Oldham Council Strategic Planning and Information section.

Key Issues

- 3.42** The number of buildings on the "at risk" register has remained the same since last year. There is a need for a positive strategy to promote the use of heritage assets and to support their repair, restoration and enhancement. The Oldham Town Centre Conservation Area Appraisal and Management Plan Supplementary Planning Document has been adopted which should help to remove the Town Centre from the at risk register.
- 3.43** The number of demolitions approved relating to listed buildings and their settings and buildings within conservation areas is higher than last year. However, generally the number of applications fluctuates but remains fewer than 10 applications each year for listed buildings and conservation areas.
- 3.44** Hartford Mill was given approval for full demolition. The Officer's report explains that the proposal will result in the loss of a landmark building although the mill is not a unique example of its kind. The building has been vacant for over 25 years, during which time its condition has deteriorated, and market conditions have not resulted in viable re-use opportunities coming forward. It is evident that the condition of the mill is unlikely to ever be restored due to the cost and lack of viability of doing so. No viable re-use for the mill can be found. The gap between the cost and value is increasing over time. Therefore the mill is likely to continue to deteriorate and continue to attract negative behaviour and a negative image of Oldham.
- 3.45** The remaining approvals for listed building consent related to small alterations which were considered to be positive in terms of enhancing the listed buildings and their settings.

Future Action

- 3.46** Continue to ensure that the policies within the Joint DPD protect, conserve and enhance the borough's heritage assets.

HEALTH, EDUCATION AND COMMUNITIES

Health
Number of health and well-being centres started and/or completed (Joint DPD Indicator 40).
Joint DPD Objective: To create safer and stronger inclusive communities by improving the health and well-being of the borough's population by facilitating programmes such as the new health and well-being centres and facilities in accessible locations (SO5h).
Target: Number determined by Primary Care Trust Programme.
Oldham Position: There were no facilities constructed or under construction in the current monitoring period.
Action needed: None.
Relevant Joint DPD Policies: 1, 2.

Health

Number of health and well-being centres started and/or completed (Joint DPD Indicator 40).

Source: Oldham Council.

Health

Adult participation in sport (Joint DPD Indicator 41i).

ii) Children and young people's participation in high-quality PE and sport (Joint DPD Indicator 41ii).

Joint DPD Objective: To create safer and stronger inclusive communities by improving the health and well-being of the borough's population through the provision of quality and accessible open spaces, sport and recreation facilities (SO5g).

Target: i) The council target for this indicator is 20%.

Oldham Position:

i) Information on Sport and Physical Activity levels for Oldham's population (Adults 16+) are now available through Sport England's Active Lives Survey. The latest results (2017/2018) are as follows:

- 31.6% of Oldham's population do less than 30 minutes of physical activity per week - classed as 'inactive'. No significant change since last year.
- 12.5% of Oldham's population do 30-149 minutes of physical activity per week - classed as 'fairly active'. No significant change since last year.
- 55.9% of Oldham's population do 150+ minutes of physical activity per week - classed as 'active'. No significant change since last year.

Source: *Sport England's Active Lives Survey 2017/18 (Data update: Table 4 Levels of Activity November 2017- November 2018)*.

ii) There is no information regarding children and young people's participation in high quality PE and sport for the year 2018/19.

Oldham's position 2015/2016:

i) Adult participation (aged 16 and over) in sports and recreation three times a week for 2015/16: 18.9%

Oldham's position 2014/2015:

i) Adult participation (aged 16 and over) in sports and recreation three times a week for 2014/15: 17.5%

Health

Adult participation in sport (Joint DPD Indicator 41i).

ii) Children and young people's participation in high-quality PE and sport (Joint DPD Indicator 41ii).

Oldham's position 2013/2014:

i) Adult participation (aged 16 and over) in sport and recreation (3 x 30 minutes per week): 22.3%.

Oldham's position 2012/2013:

i) Adult participation in sport and recreation (3x30 minutes per week): 17.6% of the population aged 16 and over.

Action needed: N/A

Relevant Joint DPD Policies: 1, 2, 6, 23.

Source: Sport England. Oldham Council.

Key Issues

3.47 In the monitoring year, the percentage of Oldham's adults (aged 16+) doing more than 150 minutes of activity per week and classed as 'active' is the lowest in Greater Manchester. At 55.9% (2017/18) it is also below the Greater Manchester average of 60.6%. Therefore, there has been a significant change in Oldham's position in Greater Manchester in terms of the percentage of the population classed as 'active' by Sport England since 2015/2016.

3.48 However, as the new indicator data source has only been used for this monitoring period and the previous two periods, it would not be possible to fully identify trends for this indicator related to adult participation in sport and recreation. Therefore, further monitoring periods are needed to be able to identify and comment on trends occurring in Oldham for this indicator, however, after three years, it is apparent that "active participation" in sport etc is lowering over time.

3.49 As explained above comparable data beyond the monitoring period of 2016-17 is not available for this indicator because the method of gathering data related to this indicator ceased. As the new source of information for this indicator measures activity in a different context the indicator data prior to 2016/17 cannot be directly compared to the position now. However, prior to 2016/17 the amount of adults participating in sport and recreation per week, was fairly consistent across four monitoring periods.

Future Action

3.50 The council should continue to apply Local Plan policies 1, 2, 6 and 23 to protect existing indoor and outdoor sports provision and to support the development of new sports provision as appropriate.

Health
Healthy life expectancy at 65 (Joint DPD Indicator 42).
Joint DPD Objective: To create safer and stronger inclusive communities by improving the health and well-being of the borough's population through the provision of quality and accessible open spaces, sport and recreation facilities and improving the health and well-being of the borough's population by facilitating programmes such as the new health and well-being centres and facilities in accessible locations (SO5g).
Target: N/A
<p>Oldham Position:</p> <p>Healthy Life Expectancy (HLE) remaining at 65:</p> <ul style="list-style-type: none"> Male: 9.6 years (2015-17), Previous figures - 9.1 years (2014-2016), 9.2 years (2013-2015) and 9.8 years (2012-2014). Female: 9.1 years (2015-17), Previous figures - 10.7 years (2014-2016), 8.3 years (2013-2015) and 8.6 years (2012-2014). <p>(ONS Health State Life Expectancies)</p> <p>Life Expectancy at Birth:</p> <ul style="list-style-type: none"> Male: 77.2 years (2015-17). Previous figures - 77.0 years (2014-2016), 77.2 years (2013-2015) and 77.3 years (2012-2014). Female: 80.9 years (2015-17). Previous figures - 80.5 years (2014-2016), 80.7 years (2013-2015) and 80.7 years (2012-2014). <p>(Public Health Outcomes Framework)</p>
Action needed: N/A
Relevant Joint DPD Policies: 1, 2, 6, 23.
Source: Oldham Council, ONS, Public Health Outcomes Framework

Key Issues

- 3.51** HLE for males is slightly higher than the previous years figure, whilst life expectancy at birth for males is slightly higher than the previous years' figures and both have decreased each year since 2012. HLE has decreased slightly for females since the previous year, but varies little since 2012. Life expectancy at birth for females has increased since the previous monitoring year.

- 3.52** HLE is calculated from mortality data and from the annual population survey that includes self-reported health status / limiting illness and so are in part subjective as responses are based on people's perceptions and expectations regarding their health (at a particular point in time). Secondly, the period spent in 'not healthy' would occur more towards the end of life, therefore where there is more of the ageing population (compared to previous years) and not improving access to health services and care, there would be more people with limiting long term illness and reporting poor health. Area deprivation and socio- economic factors also impact on HLE.
- 3.53** It should be noted that the figures for HLE and Life Expectancy at Birth are averages and mask the differences and inequalities across population groups and areas in the borough.

Future Action

- 3.54** There is the need to ensure that developments are located close to key services and good public transport networks and access to open space and leisure centres to encourage people to use active modes of travel and have access to sports and recreation and GPs and also to reduce air pollution. There is also a need to reduce deprivation so that people have more disposable income to access healthy food. Access to quality housing is also important.

Education

Number of education related developments started and/or completed (Joint DPD Indicator 43).

Joint DPD Objective: To promote economic diversification, growth and prosperity and the sustainable economic regeneration of the borough by supporting the borough's transforming education agenda to improve education and skills: by i) facilitating improvements to the borough's schools through programmes such as the Primary Capital Programme. ii) facilitating higher and further education proposals such as those of the University Campus Oldham, the Oldham College and the Oldham Sixth Form College including the development of the Regional Science Centre Oldham in Oldham Town Centre (SO3g).

Target: Number determined by Local Education Authority.

Oldham Position:

There was three education related developments under construction in the monitoring year 2018/19:

- Greenfield Primary School;
- Oldham Academy North; and
- Crompton House High School.

There has also been one education related development granted planning permission in the monitoring year 2018/19:

- Saddleworth High School.

Action needed: N/A

Education

Number of education related developments started and/or completed (Joint DPD Indicator 43).

Relevant Joint DPD Policies: 1, 2.

Source: Oldham Council.

Key Issues

3.55 There are no key issues related to this indicator.

Future Action

3.56 The council should support proposals for education related development in line with Policy 2 and other relevant policies in the Joint DPD.

Communities

Number of people who are engaged in the Local Plan consultation process (Joint DPD Indicator 1).

Joint DPD Objective: To create safer and stronger inclusive communities by promoting community cohesion (SO5a).

Target: To engage as many people and organisations in the Local Plan consultation process in line with the council's adopted Statement of Community Involvement (SCI)

Oldham Position: There are 459 people, agencies and organisations on the Local Plan mailing list and therefore engaged in the Local Plan consultation process.

2017/18: 1,609

2016/17: 1,609

2015/16: 1,578

2014/15: 1,545

2013/14: 1,299

2012/13: 1,218

Action needed: Council to continue to encourage people, agencies and organisations to subscribe to the Local Plan mailing list.

Relevant Joint DPD Policies: All policies.

Communities

Number of people who are engaged in the Local Plan consultation process (Joint DPD Indicator 1).

Source: Oldham Council Strategic Planning and Information section.

Key Issues

- 3.57** There has been a significant drop in the number of people registered on the mailing list and therefore engaged in the Local Plan consultation process. This is primarily down to the introduction of the GDPR legislation which led to the removal of the majority of the addresses registered.

AIR QUALITY AND DEVELOPMENT

Air Quality and Development

Number of days of Air Pollution (Joint DPD Indicator 30)

Annual Average Nitrogen Dioxide

Joint DPD Objective: SO1 To mitigate and adapt to climate change, and to promote sustainable development in the borough by minimising the impact of motorised traffic on the global climate and on local air quality (SO1g); and

To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting the prudent use, appropriate reclamation where necessary and sustainable management of natural resources (land, soil, air and water) and man-made resources (SO1I).

Target: Annual mean nitrogen dioxide (NO₂) target = 40 microgrammes per cubic metre (ugm³).

Oldham Position:

Number of Days in Greater Manchester where pollution was moderate or higher

Air Quality Band	2018	2017	2016	2015	2014	2013	2012	2011
Low	344	353	355	349	344	348	334	332
Moderate	20	10	11	14	14	12	26	31
High	1	0	0	2	6	4	5	1
Very High	0	2	0	0	1	1	1	1

Air Quality and Development

Number of days of Air Pollution (Joint DPD Indicator 30)

Annual Average Nitrogen Dioxide

Air Quality Band	2018	2017	2016	2015	2014	2013	2012	2011
Total number of days where pollution was moderate or higher	21	12	11	16	21	17	32	33

The overall air pollution index is determined by the highest concentration of 5 pollutants in the area. These are nitrogen dioxide, sulphur dioxide, ozone, particles <2.5 ug in diameter, and particles <10 ug.

The above figures are based on actual monitoring data from the Greater Manchester area, including the monitoring station in Oldham at Shaw, Crompton Way. Health advice is given for people who are at risk from elevated levels of air pollution, for example adults and children with lung or heart problems. Defra produce daily air pollution forecast tweets from @DefraUKAir so that people who may be affected by poor air quality can take relevant action. More information on pollution bands is available on the Defra website www.uk-air.defra.gov.uk/air-pollution/daq

The Air Quality monitoring station on Crompton Way, Shaw recorded an annual average Nitrogen Dioxide Level in 2018 of 28µg/m³ and there were no hourly averages above 200µg/m³ in 2018.

The annual average for PM₁₀ (particle matter - fine dust of 2.5 to 10 mm in diameter) this station in 2018 was recorded as 19µg/m³ and there were no recorded 24 hour averages greater than 50µg/m³ in 2018.

Previous year's annual mean Nitrogen Dioxide levels were:

- 2017: 36 ug/m3 (across 13 sites)
- 2016: 29.0 ug/mg (average across seventeen sites)
- 2015: 34.6 ug/m3 (average across ten sites)
- 2014: 32.4 ug/m3 (average across seven sites)
- 2013: 30.07 ug/m3 (average across seven sites)
- 2012: 31.8 ug/m3 (average across seven sites)
- 2011: 32.3 ug/m3 (average across nine sites. Three sites did not have a recording). This year's recording was not comparable with previous years due to a change in monitoring processes
- 2010: 33.3 ug/m3 (average across 10 sites. Two sites did not have a recording)
- 2009: 46.5 ug/m3 (average across 10 sites. Two sites did not have a recording)

Air Quality and Development

Number of days of Air Pollution (Joint DPD Indicator 30)

Annual Average Nitrogen Dioxide

- 2008: 42.5 ug/m3 (average across 12 sites)
- 2007: 41.3 ug/m3 (average across 12 sites)

Action needed: None.

Relevant Joint DPD Policies: 1, 9.

Source: Oldham Council Environmental Health.

Key Issues

3.58 The level of Nitrogen Dioxide was the lowest recorded since 2007.

3.59 However, the number of days in Greater Manchester where pollution was moderate or higher is much higher than the past six years, although it has generally improved since 2011.

3.60 The number of days where pollution is moderate or higher is affected primarily by meteorological conditions that allow pollution concentrations to build up. An example would be when there are dry still days, particularly if there is a temperature inversion, which means that the pollution can't disperse. There are even some occasions when pollution is brought in from far away (e.g. Saharan dust which can contribute to elevated pollution concentrations). The Moors fires may also have contributed to this, although this has not been confirmed.

Future Action

3.61 Ensure that new development minimises motorised traffic and the impact on air quality and encourage developments to be energy efficient and use low carbon energy. The policies within the Joint DPD aim to protect and improve local environmental quality.

Air Quality and Development

Per capita emission estimates, industry, domestic and transport sectors (previously NI186) (Joint DPD Indicator 44)

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by supporting carbon neutral developments by following the principles of the zero carbon hierarchy (SO1a);

To mitigate and adapt to climate change, and to promote sustainable development in the borough by minimising the impact of motorised traffic on the global climate and on local air quality (SO1g); and

Air Quality and Development

Per capita emission estimates, industry, domestic and transport sectors (previously NI186) (Joint DPD Indicator 44)

To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting the prudent use, appropriate reclamation where necessary and sustainable management of natural resources (land, soil, air and water) and man-made resources (SO1i).

Target: 48% reduction in emissions on the 1990 baseline (750.36kt CO₂)

Oldham Position: The latest information is for 2017 when there were 3.4 tonnes of per capita emissions.

The sources of this were:

Commercial – 227.9 kilotonnes (kt)

Domestic – 323.5 kt

Transport – 247.8 kt

Grand total - 798.8 kt

Previous years (tonnes per capita):

- 2016: 3.5 tonnes
- 2015: 3.7 tonnes
- 2014: 3.9 tonnes
- 2013: 4.4 tonnes
- 2012: 4.6 tonnes
- 2011: 4.2 tonnes
- 2010: 4.8 tonnes
- 2009: 4.6 tonnes
- 2008: 5.1 tonnes
- 2007: 5.3 tonnes
- 2006: 5.5 tonnes

Action needed: None

Relevant Joint DPD Policies: 1, 9, 18.

Air Quality and Development

Per capita emission estimates, industry, domestic and transport sectors (previously NI186) (Joint DPD Indicator 44)

Source: Department of Energy and Climate Change July 2017

Key Issues

3.62 The figures for 2017 give a 45% reduction on the 1990 baseline, which for the sixth year running gives us significant progress and keeps us on track to meet the target of a 48% cut by 2020.

Future Action

3.63 The policies within the Joint DPD help to guide development to accessible locations, and promote and encourage the use of public transport, walking and cycling and low carbon energy. There is the need to continue to reduce emissions. There is a need to ensure that the Local Plan review helps to deliver the Greater Manchester Clean Air Plan.

CONTAMINATED LAND

Contaminated Land

Number of sites remediated as a result of planning permission (Joint DPD Indicator 29)

Joint DPD Objective: To mitigate and adapt to climate change, and to promote sustainable development in the borough by promoting the prudent use, appropriate reclamation where necessary and sustainable management of natural resources (land, soil, air and water) and man-made resources (SO1i).

Target: N/A.

Oldham Position:

The council is unable to provide monitoring information this year due to the absence of the officer who would normally provide this information.

Number of sites remediated in previous years:

2017/18: 39

2016/17: 24

2015/16: 35

2014/15: 8

2013/14: 5

Action needed: None.

Contaminated Land

Number of sites remediated as a result of planning permission (Joint DPD Indicator 29)

Relevant Joint DPD Policies: 1, 9.

Source: Oldham Council Environmental Health section.

Key Issues

3.64 The council has been unable to provide the monitoring information this year. There is the need to ensure monitoring systems are in place for this indicator.

3.65 There has generally been a significant increase in sites remediated since 2013.

Future Action

3.66 The policies within the Joint DPD will help protect and improve local environmental quality.

DESIGN

Urban Design

Number and percentage of major planning applications refused on poor design grounds. (Joint DPD Indicator 21)

Joint DPD Objective: To mitigate and adapt to climate change and to promote sustainable development in the borough by ensuring the sustainable and high quality design and construction of all new developments (SO1b).

Target: 100% of applications with poor design quality should be refused.

Oldham Position: There was one major planning application refused on design grounds in the monitoring year 2018/19

Number of applications refused on design grounds in previous years:

2017/18: 2

2016/17: 2

2015/16: 3

2014/15: 1

2013/14: 0

2012/13: 1

Action needed: Continue to encourage high quality design in developments.

Urban Design

Number and percentage of major planning applications refused on poor design grounds. (Joint DPD Indicator 21)

Relevant Joint DPD Policies: 1, 20.

Source: Oldham Council.

Key Issues

3.67 The number of major planning applications refused on design grounds has remained relatively low, indicating that most major planning applications are achieving acceptable design. However there is no effective measure of monitoring this indicator other than checking any major planning applications that have been refused.

Future Actions

3.68 The Council will look at ways to improving the effective monitoring of this indicator.

Indicators that are no longer monitored

3.69 The Joint DPD was adopted in November 2011. The Monitoring Report monitors indicators from the Joint DPD, Joint Waste DPD and the Joint Minerals DPD only. For information, the indicators that were monitored previously are:

- Windfall completions (housing);
- Public transport accessibility of new residential development to key services (Primary Schools, Secondary Schools, GP's, hospitals, employment areas and major retail centres);
- Amount of eligible open spaces managed to Green Flag award standard;
- Net change in the extent of protected open space;
- Number of Air Quality Management Areas;
- Number of quality bus corridors;
- Number of potentially contaminated sites in the borough;
- Number of applications relating to contaminated sites;
- Extent of derelict and underused land;
- Number of Local Nature Reserves and Country Parks;
- Number of domestic burglaries per 1,000 households;
- Percentage of vehicle crimes per 1,000 population;
- Number of cyclists involved in road accidents;

- Number of pedestrians involved in road accidents;
- Extent of cycleway and footpath provision;
- Number of wind turbine applications granted and refused planning permission; and
- Previously developed land that has been vacant or derelict for more than 5 years (Joint DPD Indicator 2)

3.70 In addition, this year the following indicators have not been possible to monitor due to the necessary information not being available, lack of resources and changes in monitoring processes:

- Amount of completed non-residential development within Use Classes A, B and D complying with car parking standards set out in the local plan. (Joint DPD Indicator 25);
- Building for Life Assessments (Joint DPD Indicator 20);
- Local Services - Open Space: i) Extent of protected (Joint DPD Indicator 37i); and ii) Percentage of quality and accessible open spaces meeting local standards (Joint DPD Indicator 37ii); and
- Improved street and environmental cleanliness (Joint DPD Indicator 45).

3.71 These indicators will be re-visited each year in case circumstances change and an update provided in future Monitoring Reports as appropriate.

3.72 Finally, Joint DPD Indicator 24 'Extension of Greater Manchester's light rail network, 'Metrolink', to the borough', has been removed as the Metrolink extension was completed in 2014.

4 Implementation of the Statement of Community Involvement

Analysis of responses to Local Plan consultations

- 4.1** The latest Statement of Community Involvement (SCI) was adopted in March 2019. The SCI sets out how the council will involve the community and stakeholders in the preparation of the Local Plan and in the consideration of planning applications.
- 4.2** Section 10 of the SCI (Review and Monitoring) explains that the council will monitor the SCI to see how effective it is in terms of involving the community in the preparation of the Local Plan. The table below looks at the Local Plan consultations undertaken during the monitoring period 1 April 2018 to 31 March 2019. It also includes any consultation that has taken place from April to November 2019 (outside the monitoring period).
- 4.3** The table sets out the consultation techniques used for each document, the number of people/organisations consulted, the response rate and an analysis of the equalities monitoring. (Note: The number of people consulted can vary for each consultation - this is because the Local Plan Mailing List is an evolving list with new people added and others removed throughout the year at consultee requests). It identifies any problems or issues and sets out any further actions required in order to improve our engagement and consultation with the community and stakeholders.

Local Plan Document / Consultation dates	Consultation Techniques Used	Number of people / organisations consulted	Response Rate	Equalities Breakdown	Effective / problems identified / any change required
Greater Manchester Spatial Framework Revised Draft - January 2019	Consultation was led by the GMCA. Drop in events were held at 11 venues in and around Oldham.	Please refer to the GMCA Consultation Summary published in October 2019 for more information.	Please refer to the GMCA Consultation Summary published in October 2019 for more information. 					adopted in August 2019 with no significant changes.

5 Effects on social, environmental and economic objectives

5.1 The council developed a Sustainability Appraisal (SA) toolkit for the Local Plan which identified 35 sustainability objectives under the following four aims:

- Social progress which recognises the needs of everyone;
- Effective protection of the environment;
- Prudent use of natural resources; and
- Maintenance of high and stable levels of economic growth and employment.

5.2 It is considered that these four themes provide an appropriate means of assessing the effects of the above policies, objectives and targets.

Social progress which recognises the needs of everyone

5.3 Key objectives under this heading include the need:

- To promote community cohesion in the borough.
- To promote mixed, balanced and inclusive sustainable communities.
- To improve the health of the borough's population.

5.4 The indicators show that:

- As at July 2019 the number of people, agencies and organisations on the Local Plan Mailing List was 459; and
- The proportion of completions consisting of three or more bedrooms was 64% during 2018/19.

Effective protection of the environment

5.5 Key objectives under this heading include the need:

- To ensure the effective and efficient use of all types of land and buildings in the most sustainable locations.
- To protect and improve the borough's green infrastructure, biodiversity and geodiversity.
- To minimise the impact of, and mitigate against flooding.
- To contribute to reducing the effects of climate change.

5.6 The indicators show that:

- 100% of industrial and commercial floor space developed over the last year involved the reuse of previously developed land;
- 56% of completions during 2018/19 took place on previously developed land. A further 146 dwellings or 36% of all dwellings completed in 2018/19 were on mixed sites which contain both PDL and greenfield land;
- There was one application approved that the Environment Agency had submitted an objection to; and
- In 2018/19, 5 out of 19 relevant major applications were granted permission with a condition attached or details included within the application requiring applicants to meet Policy 18 on Renewable Energy, representing 29% of applications.

Prudent use of natural resources

5.7 Key objectives under this heading include the need:

- To provide high quality design and sustainable construction.
- To manage waste sustainably, to minimise waste and its production, and increase reuse, recycling and recovery rates.
- To protect and improve the quality of land and soil.

5.8 The indicators show that:

- There was one major planning application refused on design grounds during 2018/19; and
- 44.65% of household waste arisings were dealt with through recycling or composting.

Maintenance of high and stable levels of economic growth and employment

5.9 Key objectives under this heading include the need:

- To promote the sustainable economic performance of the borough.
- To improve the economic well-being of the borough's population.
- To protect and enhance the vitality and viability of Oldham Town Centre and the centres of Chadderton, Failsworth, Hill Stores, Lees, Royton, Shaw and Uppermill.
- To improve education and skills levels of the borough's population.

5.10 The indicators show that:

- 10,734 sqm of business and industrial development was completed during 2018/19; and
- Employment rate as at March 2019 was at 68.1%, which has not changed since last year.

6 Greater Manchester Development Plan Documents

Greater Manchester Joint Waste Development Plan Annual Monitoring Report 2017-2018

- 6.1** The text below in relation to waste has been prepared on behalf of Oldham Council by Greater Manchester Minerals and Waste Planning Unit (GMMWPU).

Introduction

- 6.2** This is the fifth Authority Monitoring Report (AMR) collating information to allow for the assessment of the performance of planning policies in the Greater Manchester Joint Waste Development Plan Document (Waste Plan), which was adopted on 1st April 2012.
- 6.3** This AMR covers the 12-month period from 1st April 2018 to 31st March 2019. However, the targets in the Waste Plan run from January – December and the data used to inform the AMR (namely the Environment Agency Waste Data Interrogator (WDI)) covers the calendar year 2018.
- 6.4** The Waste Plan forms part of the statutory development plan for the following Authorities:
- Bolton Metropolitan Borough Council;
 - Bury Metropolitan Borough Council;
 - Manchester City Council;
 - Oldham Council;
 - Rochdale Metropolitan Borough Council;
 - Salford City Council;
 - Stockport Metropolitan Borough Council;
 - Tameside Metropolitan Borough Council;
 - Trafford Metropolitan Borough Council; and
 - Wigan Metropolitan Borough Council.
- 6.5** This AMR reports on behalf of the ten authorities.

Background to the Waste Plan

- 6.6** The Association of Greater Manchester Authorities (AGMA) agreed to produce a Joint Waste Plan in 2006. AGMA consists of all ten Greater Manchester Authorities. The Waste Plan forms part of each Authority's statutory development plan and runs from 2012 to 2027. It was prepared on behalf of the 10 Greater Manchester Authorities by Urban Vision's Minerals and Waste Planning Unit.
- 6.7** The purpose of the Waste Plan is to set out a waste planning strategy to 2027 which enables the adequate provision of waste management facilities in appropriate locations for Local Authority Collected Waste, commercial and industrial waste, construction, demolition and excavation waste, and hazardous waste. The Waste Plan includes a set of plans identifying the potential locations for development of future waste management facilities within each of the ten Authorities. It also includes a set of development management policies which will assist in the consideration of waste planning applications.

- 6.8** This AMR monitors the policies in the Waste Plan to determine the extent to which they are being effectively implemented. Paragraph 062 Reference ID 61-062-20190315 of the National Planning Practice Guidance states that:
- 6.9** *‘To be effective plans need to be kept up-to-date. The National Planning Policy Framework states policies in local plans and spatial development strategies, should be reviewed to assess whether they need updating at least once every 5 years, and should then be updated as necessary.’*
- 6.10** Following the same logic, a review of the Greater Manchester Waste Plan was undertaken in 2018. The review highlighted the need to update parts of the plan and this was picked up throughout the previous iteration of the Waste Plan AMR.
- 6.11** However, this review has not yet been published for examination, and has therefore not been adopted. As a result, this AMR will assess the effectiveness of the policies against the original targets detailed in the adopted 2012 Waste Plan. That said, the work undertaken in producing the review has highlighted the need to update parts of the Waste Plan and this is picked up throughout this AMR.

Policy 1: Commercial and Industrial Waste: Energy Recovery Capacity

- 6.12** This policy sets out the identified capacity requirements for energy recovery under which planning permission will be granted. The target and variance for capacity required in this reporting year is:

Target – capacity required (tonnes)	Variance
2017: 354,000	Capacity is 10% more or less than the capacity required for the year in question

- 6.13** There are currently no new energy recovery facilities in Greater Manchester which provide capacity for handling these wastes. The Barton Combined Heat and Power Plant (CHP), a proposed 20MW biomass-fired plant located on land owned by Peel Group adjacent to the Manchester Ship Canal near Trafford Park surrendered its permit. Trafford Council approved planning permission for amendments to the scheme design in 2016. The plant was to consume approximately 200,000 tonnes of biomass per annum and was due to be operational by 2019. A Certificate of Lawfulness application was approved in August 2018 to confirm that development had been commenced lawfully but the future of this site is now in doubt as development has ceased.
- 6.14** Additional capacity is available outside the Plan area at the Inovyn plant at Runcorn which is contracted to accept pelletised fuel processed from the Greater Manchester Waste Disposal Authorities’ residual Local Authority Collected Waste (LACW). The facility has capacity to handle up to 850,000 tonnes of refuse derived fuel (RDF) annually and generates up to 70MW of electricity and up to 51MW of heat. A number of other Energy from Waste facilities including sites in St Helens and Lancashire have planning permissions in place but are still at an early stage of development.
- 6.15** Wigan has a separate waste disposal contract which results in treatment of residual LACW into solid recovered fuel (SRF) for Energy from Waste facilities, but both thermal and nonthermal treatment occur outside the Plan area. No update on this contract has been provided in for the period 2018/19.

- 6.16** Unfortunately monitoring performance is complicated because movements of waste to Energy from Waste (EfW) facilities are not reported in sufficient detail that the origins can be identified, and facilities are not covered by returns recorded through the WDI due to the different permitting system.

Action

- 6.17** The capacity of energy recovery available and required will be reviewed as part of the AMR update annually and picked up through the more detailed future review of the Needs Assessment. Information will be monitored at a regional level with other Waste Planning Authorities in the North West (NW) to assess what capacity is permitted within the region and how this can be utilised to meet local needs.

Policy 2: Non Hazardous Waste: Disposal

- 6.18** This policy sets out the identified capacity requirements for non-hazardous landfill under which planning permission will be granted. The target and variance for capacity required in this reporting year is:

Target – capacity required (tonnes)	Variance
2017: 2,234,000	Capacity is 10% more or less than the capacity required for the year in question

- 6.19** The WDI 2018 identifies three non-hazardous landfills in Greater Manchester; however, two of these, Harwood Landfill (Bolton) and Whitehead (Wigan), only accept inert waste, despite the EA permits allowing for non-hazardous waste. However, as evidence suggests that these landfill sites accept inert waste only, the Waste Plan will continue to monitor the sites as providing inert capacity.
- 6.20** That said, in 2016, planning permission was granted for the early closure of the Whitehead site with restoration to be completed by 2020 so that it can be used for the planting and harvesting of bio-crops. Therefore, all remaining non-hazardous waste void space at the site has been lost. The early closure of Whitehead Landfill is directly linked to a drop in the demand for landfill. Similarly, the identified extension for Pilsworth, as identified in the Plan, may not come forward due to a lack of demand. As part of the review of the Waste Plan, Viridor were contacted in regard to existing policies in the Waste Plan; the operator indicated that they have no plans to take forward the extension to Pilsworth and proposals at Whitehead were lost following the sale of the site in 2016. With this site now closed, and with only 10 years left on the current permission at Pilsworth, future years are likely to show a greater reliance on exportation of non-hazardous waste. A review and update of the waste Needs Assessment is required to better understand the implications of the loss of the allocations in the Waste Plan.
- 6.21** According to the WDI, Pilsworth South landfill accepted a total 317,590 tonnes of nonhazardous waste in 2018. 4.5. The Waste Plan identified a capacity gap of 2,618,000 tonnes for non-hazardous waste disposal in 2018. The capacity gap was based on an available capacity identified as 450,000 tonnes per annum. Both factors should be reviewed as part of the next Needs Assessment update as clearly the situation has changed since 2012..

Action

- 6.22** The void space will be reviewed annually as part of the monitoring of the Waste Plan. The loss of the proposed extension sites in the Waste Plan was flagged up as part of the review, indicating that work on an updated Waste Needs Assessment is required to better understand what the likely landfill need for Greater Manchester will be for the remainder of the Plan period, and if Pilsworth is sufficient to meet the non-hazardous capacity requirement. Inputs into Harwood will also be reviewed in detail to see if material imported continues to be inert.

Policy 3: Hazardous Waste: Disposal Capacity

- 6.23** This policy sets out the identified capacity requirements for disposal under which planning permission will be granted. The target and variance for capacity required in this reporting year is:

Target – capacity required	Variance
2017: no additional capacity required	Capacity is 10% more or less than the capacity required for the year in question

- 6.24** No additional disposal capacity for hazardous waste was permitted in 2018/19. As no capacity was identified as being required, the variance is 0%. The existing capacity is sufficient to meet current needs and no new requirement is identified. It is not clear if any extension will come forwards at all to Pilsworth South, and no guarantee that if this does it will include a further cell to take such waste, Viridor have indicated that this would be a decision based on market need nearer the time. If Pilsworth does not come forward for an extension of time, then there will be a gap in provision from 2028 when the site is currently scheduled to close (when the extant planning permission lapses).

Action

- 6.25** Any new data on throughputs will be used to inform a Needs Assessment update. If throughputs have been lower than expected, then this could extend the life of Pilsworth. This will be reported when data on this has been captured through the update to the Waste Needs Assessment. As discussed above, it is noted that future provision of Stable Non-Reactive Hazardous Cells (SNRHC) for disposal of hazardous waste at Pilsworth will be linked to the further extension of this site; Viridor have previously indicated that this is not going to happen and have asked for this information to be removed from the Waste Plan.

Policy 4: Site Allocations

- 6.26** This policy sets out the seven sites which have been identified as potentially suitable for built waste management facilities (Watersmeeting C South Triangle, Bolton; 226-228 Waterloo Street, Bolton; Land off Mossdown Road, Oldham; Land at Millstream Lane, Clayton Bridge, Oldham; Plot 5, Bredbury Parkway, Stockport; Land adjacent to Tank Farm Chemical Treatment Works, Trafford; and CA Site, Makerfield Way, Wigan). The target and variance for capacity required in this reporting year is:

Target	Variance
Planning permission is only granted for developments identified as appropriate in the Waste Plan. The highest level of recycling is demonstrated by the applicant.	Less than 100% of appropriate applications granted permission/demonstrate the highest level of recycling.

- 6.27** No new planning permissions were granted / refused in 2018/19 on the site allocations as defined in the Waste Plan.

Action

- 6.28** The review of the Waste Plan has indicated that the site allocations policy has not helped to deliver any new waste infrastructure, with most sites being delivered on mix on land in allocated areas and on unallocated land. This policy has effectively resulted in the safeguarding of land for waste use which could potentially come forward for non-waste development, see details under the safeguarding policy.

Policy 5: Area Allocations

- 6.29** This policy sets out the areas which have been identified as potentially suitable for built waste management facilities. The target and variance for capacity required in this reporting year is:

Target	Variance
Planning permission is only granted for developments identified as appropriate in the Waste Plan. The highest level of recycling is demonstrated by the applicant.	Less than 100% of appropriate applications granted permission/demonstrate the highest level of recycling.

- 6.30** No applications came forward in allocated areas on 2018/19.

- 6.31** Ten applications, which will result in additional waste management capacity, were determined which were not within a site or area identified in the Waste Plan. These applications were assessed in line with Waste Plan Policy 10.

Action

- 6.32** No action required. The review of the Waste Plan has indicated that the area allocations policy has helped to deliver new waste infrastructure, but the majority have come forward on unallocated sites. This indicates that this policy is not working as it should and this issue needs to be addressed through a review of the Waste Plan

Policy 6: Inert Residual Waste Disposal

- 6.33** This policy sets out the criteria under which permission will be granted for inert residual waste disposal.

Target	Variance
Planning permission is only granted for developments identified as appropriate in the Waste Plan. The highest level of recycling is demonstrated by the applicant.	Less than 100% of appropriate applications granted permission/demonstrate the highest level of recycling.

- 6.34** As reported within last year's AMR, Offerton Sand and Gravel Quarry in Stockport is no longer active and has been partially infilled with waste. There is no current intention to extract the remaining mineral reserve and so any remaining landfill void space has been lost.

- 6.35** The assumed remaining permitted void space is as below:

Site Name	2017 remaining capacity (tonnes)
Harwood Quarry Landfill Site	1,506,984
Morleys Quarry	499,490
Pilkington Quarry	997,182
Whitehead Landfill	1,000,000

Action

6.36 No action is required.

Policy 7: Non Hazardous Residual Waste Disposal

6.37 This policy sets out the sites which have been identified as potentially suitable for non-hazardous residual waste disposal. The target and variance for capacity required in this reporting year is:

Target	Variance
Planning permission is only granted for developments identified as appropriate in the Waste Plan. The highest level of recycling is demonstrated by the applicant.	Less than 100% of appropriate applications granted permission/demonstrate the highest level of recycling.

6.38 No new planning permissions for non-hazardous residual waste disposal were granted / refused in 2018/19. As previously explained, Whitehead landfill will no longer be receiving any non-hazardous residual waste.

6.39 The void space is as below:

Site Name	District	2015 remaining capacity
Pilsworth South Landfill	Bury	6,781,482

Action

6.40 No action is required.

Policy 8: Requirements for Combined Heat and Power

6.41 This policy sets out a requirement for waste management facilities that have the potential to utilise biogas or energy from waste technologies to provide combined heat and power (CHP) unless it can be demonstrated that they have the potential to deliver important waste infrastructure.

Target	Variance
Eligible energy recovery facilities generate heat and energy	Less than 75%

6.42 As discussed above, the future of Barton Renewable Energy Plant Combined Heat and Power Plant is now in doubt, but the situation will be kept under review. 10.3. Heineken UK operates a biomass plant at their Royal Brewery in Moss Side, Manchester, which burns locally sourced woodchip to generate electricity to supply all of the site's energy requirements (up to 37,600MWh annually). In the future more equipment will be added to allow the plant to burn spent grain, a by-product of the brewing process.

6.43 No new applications for CHP have been permitted in 2018/19..

Action

6.44 No action is required.

Policy 9: Restoration and Aftercare

6.45 This policy sets out a requirement for applications for landfill/ landraise to demonstrate that the site will be adequately restored.

Target	Variance
Restoration and aftercare will be carried out in accordance with Annex A of MPG7 to meet standards required by DEFRA for restoration to agriculture, Forestry Commission Bulletin 110 for restoration to forestry and Natural England for restoration to nature conservation.	Non compliance with the standards

6.46 No new permissions were granted for the disposal of inert waste in 2018/19.

Action

6.47 No action is required.

Policy 10: Unallocated Sites

6.48 This policy sets out the criteria under which applications for waste management facilities on unallocated sites will be permitted.

Target	Variance
Planning permission is granted for developments which contribute to achieving the Waste Plan and take place on sites considered appropriate by the Plan.	Non compliance with the standards
HRA Screening is applied to applications for waste management facilities on unallocated sites and site based mitigation is implemented where appropriate.	Less than 100% of applications granted permission
	Less than 100% of appropriate applications apply HRA Screening

6.49 Two applications (see Table below) which would result in a change in waste management capacity which are not within a site or area identified in the Waste Plan were approved in 2017/18.

Applications on unallocated sites

Job No and App No	Council	Site Address	Proposal	Decision
02201/17	Bolton	Former Biffa site, Lyon road industrial estate, moss road, Kearsley, Bolton, BL4 8NB	Change of use from sui generis (vehicle Storage/maintenance) to sui generis (waste transfer Facility).	Approved 16/01/2018
01710/17	Bolton	Unit 1a, Slater Lane, Bolton, BL1 2TQ	Use for breaking of vehicles and the storage, sorting and processing of scrap metal with associated office facilities.	Approved on appeal 6/3/2018

6.50 For reference, planning application 03549/18 was approved on 16/05/2018 for the Change of Use from Waste Transfer Facility to Heating Element Manufacture at Unit 10 Edge Fold Industrial Estate, Bolton. However, the Waste Transfer Facility has been relocated to Lyon Road Industrial Estate, Bolton resulting in no change in capacity.

Action

6.51 No action is required.

6.52 It has been noted through the review of the Waste Plan that the majority of new applications for waste sites have been on unallocated sites, with the remainder (around 40%) within areas of search. This has highlighted a need to review the existing allocations to assess if they are fit for purpose or of a new approach to identifying land for waste development is required.

Policy 11: Safeguarding of Allocated Sites

6.53 This policy sets out the requirement to safeguard sites allocated for waste management in the Waste Plan and safeguarding of sites required for the delivery of the Municipal Waste Management Strategies.

Target	Variance
Sites of key importance for the achievement of the Waste Plan Retained	100% of sites retained

6.54 The following HWRCs have been closed, and the sites either sold or returned to Districts so the capacity does not need to be safeguarded for delivery of the Waste Strategy.

- Blackhorse Street (Bolton)

- Union Road (Bolton)
- Clifton Road/Drinkwater Park (Bury)
- Peel Lane (Rochdale)
- Chandos Street (Oldham)

6.55 Wigan Waste Disposal Authority have identified two sites for safeguarding:

- Kirkless Waste Transfer Station and HWRC, Makerfield Way, Ince WN2 2PR
- Organic Waste Transfer Station, Makerfield Way, Ince WN2 2PR

6.56 For information purposes the Wigan Residual Waste Treatment contract commenced 1st April 2015, which is a 25-year contract to manage waste, transfer stations, HWRC's and bulking facilities with FCC Waste Services UK Ltd. The treated residual waste goes to SSE Ferrybridge as fuel. Wigan also has several short-term contracts in place to transport and process paper; cardboard and waxed cardboard food and drink containers; glass bottles; plastic bottles and tubs; cans; and green and food waste.

6.57 The Recycling and Waste Management PFI Contract held between the Greater Manchester authorities and Viridor Laing (Greater Manchester) Ltd (VLGM) finished before time and the waste authority is currently out to contract for delivering future options. It does not anticipate any changes/reduction in the number of facilities that will operate in the future. Ownership of VLGM has now passed to Zero Waste Greater Manchester (Formerly GMWDA) and it has been renamed Greater Manchester Combined Waste and Recycling (GMCWR). Through the renamed company GMCWR the provision of the existing operations contract with Viridor Waste (Greater Manchester) Ltd as an interim position allowing for the continuation of service whilst re-procurement happens. This interim contract was to last for approximately 18 months until at least 31st March 2019. On 31st March 2019, GMCWR signed a new operating contract with Suez Recycling and Recovery Ltd with the new contracts to commence on 1st June 2019..

Action

6.58 No action is required.

Policy 12: Safeguarding Existing Waste Management Capacity

6.59 This policy sets out how existing waste management capacity will be safeguarded. Applications for non-waste uses on sites with a permitted waste use will be permitted where it is demonstrated (by the applicant) that there is no longer a need for the facility, that the capacity will be met elsewhere in Greater Manchester, or that there is an overriding need for the non-waste development in that location.

Target	Variance
Sites of key importance for the achievement of the Waste Plan Retained	100% of sites retained

6.60 No such applications were determined in 2018/19.

Action

6.61 No action required.

Monitoring of Scenario 2 of the Needs Assessment

6.62 A Waste Needs Assessment was prepared to inform the development of the Waste Plan. This illustrated the impacts of increasing recovery and recycling of Commercial and Industrial Waste (C&I) and Construction, Demolition and Excavation Waste (CD&E) on future capacity requirements against maintaining the status quo. Members of the ten Greater Manchester Authorities agreed to adopt Scenario 2 (Maximised Recycling and Recovery) as outlined in the following table:.

Target	Variance
Achievement of Scenario 2 targets: 100% of the recyclable C&I waste going to landfill is recycled, 50% of the possibly recyclable C&I waste is recycled and 25% remaining use for energy recovery by 2015.	Year specific targets not achieved

6.63 Since the Waste Plan was published, new targets have been introduced by the EU which the UK committed to delivering. The new targets require the recovery of at least 70% by weight of Construction and Demolition waste (C&D) by 2020.

6.64 The National Waste Management Plan and National Planning Policy for Waste (NWMP) was also introduced following the adoption of the Waste Plan but does not include any C&I targets. An update to the Needs Assessment will need to look at the specific requirements of the circular economy targets, including the diversion from landfill requirements (10% to landfill by 2030).

Performance rates for 2016/17.

	Waste arisings (tonnes)	Recycling rate	Diversion from landfill rate	Landfill rate
Greater Manchester	1,191,080	47.9%	92.35%	7.65%
Wigan	138,839	53.5%	99.9%	0.01%

Action

6.65 Work to meet the 2020 (LACW) targets.

Conclusion

6.66 The data is not showing evidence of increased movements to RDF/SRF production, yet waste to landfill is dropping considerably. This could possibly be a result of increased waste reduction and prevention measures. Landfill tax increased from £88.95 per tonne to £91.35 per tonne from April 2019.

6.67 There is likely to be a shortfall in landfill provision during the plan period if Pilsworth does not get extended as discussed above. At present, an extension of time is more likely for this site with the operator indicating that the current proposal for increased capacity should be removed from the Waste Plan. This could require an increase in export of waste to landfill outside Greater Manchester and potentially the North West. The Greater Manchester councils fulfil the Duty to

Cooperate by regularly liaising with other authorities with regards to waste matters and the unit have been working with all NW Waste Planning Authorities to prepare a position paper on landfill in the region.

- 6.68** The targets in the Waste Plan have not changed as a consequence of the changes in tonnage to landfill discussed above. However, the targets and figures in the Waste Plan do not now reflect the requirements of the Circular Economy and as explained in the Defra Resource and Waste Strategy, the targets that authorities will need to meet will change in future. These changes will impact on the viability of the Plan and an update to the Needs Assessment will be required to assess if local capacity can meet expected changes in demand.

Greater Manchester Joint Minerals Development Plan Annual Monitoring Report 2017-2018

- 6.69** The text below in relation to minerals has been prepared on behalf of Oldham Council by GMMWPU.

Introduction

- 6.70** This is the fifth Authority Monitoring Report (AMR) collating information to allow for the assessment of the performance of planning policies in the Greater Manchester Joint Minerals Plan (Minerals Plan), which was adopted on 26th April 2013.

- 6.71** This Monitoring Report covers the 12 month period from 1st April 2018 to 31st March 2019.

- 6.72** The Minerals Plan forms part of the statutory development plan for the following Authorities:

- Bolton Metropolitan Borough Council;
- Bury Metropolitan Borough Council;
- Manchester City Council;
- Oldham Council;
- Rochdale Metropolitan Borough Council;
- Salford City Council;
- Stockport Metropolitan Borough Council;
- Tameside Metropolitan Borough Council;
- Trafford Metropolitan Borough Council; and
- Wigan Metropolitan Borough Council.

- 6.73** This Monitoring Report reports on behalf of the ten authorities.

- 6.74** Within Greater Manchester (GM) there is a supply of low-quality aggregate but a limited supply of the type of high-quality aggregates that are needed to ensure continued economic expansion of GM. Therefore, GM relies heavily on imports from Mineral Planning Authorities (MPAs) outside of the plan area to meet its high-quality aggregate needs.

- 6.75** Just one quarry in GM produces brick clay for use in engineering and facing bricks (Harwood Quarry, Bolton). There is currently a brickworks operated by Wienerberger in Denton, Tameside which relies on 50% imported clay from Mouselow Quarry in Glossop, Derbyshire, and 50% clay supplied from Harwood Quarry. An application for an extension to the Mouselow site to extract 850,000 tonnes was approved on 2nd April 2019. That said, as reserves at Harwood

are due to be depleted by 2026, there is still not likely to be enough brick clay to guarantee the 25-year supply required by National Planning Policy Framework. This is discussed later in the report.

- 6.76** Considering the above, GM will continue to work closely with the MPAs which export material to the area to ensure that material can continue to be sourced to meet its ongoing needs in a sustainable manner throughout the plan period. Furthermore, the use of recycled aggregates and secondary mineral products will be encouraged wherever possible to reduce the need for imports and promote sustainable use of raw materials..

Background to the Minerals Plan

- 6.77** The Association of Greater Manchester Authorities (AGMA) agreed to produce a Joint Minerals Plan in 2009. AGMA consists of all ten Greater Manchester Authorities. The Minerals Plan forms part of each Authority's statutory development plan and runs from 2012 to 2027. It was prepared on behalf of the 10 Greater Manchester Authorities by Urban Vision's Minerals and Waste Planning Unit.

- 6.78** The purpose of the Minerals Plan is to set out a minerals planning strategy to 2027 in order to deliver a steady and sustainable supply of minerals, safeguard mineral resources, enable Greater Manchester to contribute to its sub-regional apportionment of aggregates and facilitate greater use of recycled aggregates and secondary mineral products. The Minerals Plan includes a set of plans identifying the locations of Mineral Safeguarding Areas within each of the ten Local Planning Authorities. It also includes a set of development management policies which will assist in the consideration of minerals planning applications.

- 6.79** This Monitoring Report monitors the policies in the minerals Plan to determine the extent to which they are being effectively implemented.

- 6.80** Paragraph 008, Ref ID: 12-008-20140306 of the National Planning Practice Guidance states that:

"To be effective plans need to be kept up-to-date. Policies will age at different rates depending on local circumstances, and the local planning authority should review the relevance of the Local Plan at regular intervals to assess whether some or all of it may need updating. Most Local Plans are likely to require updating in whole or in part at least every 5 years. Reviews should be proportionate to the issues in hand. Local Plans may be found sound conditional upon a review in whole or in part within 5 years of the date of adoption."

- 6.81** In 2018, work was undertaken to produce a review of the Minerals Plan in line with the guidance above. However, this review has not yet been published for examination, and has therefore not been adopted. As a result, this AMR will assess the effective of the policies against the original targets detailed in the adopted 2013 Minerals Plan. That said, the work undertaken in producing the review has highlighted the need to update parts of the Minerals Plan and this is picked up throughout this AMR.

Core Output Indicators through the Minerals Plan

- 6.82** This data is measured on a level which includes all ten Greater Manchester Authorities, the five Merseyside Authorities plus Halton and the local authority of Warrington. For reasons of commercial confidentiality it is necessary to combine the data from these 17 areas.

Indicator M1 Production of primary land won aggregates by mineral planning authority

- 6.83** This measures production of primary land won aggregates by mineral planning authority against the North West Aggregate Working Party (NW AWP) apportionments. This links with Objective 4i and Policies 2 & 3 of the Minerals Plan.

Sand and gravel

- 6.84** It is not possible to disclose the land won reserves figure for sand and gravel for 2018 due to reasons of confidentiality as, within the monitoring period, there was only one sand and gravel quarry in the Greater Manchester sub-region with permitted reserves contributing to the landbank. However, it has been possible to provide a 3-year average reserve figure for 2016, 2017 and 2018, and this has been used in the landbank calculations. At present, there are insufficient reserves of sand and gravel to meet the current apportionment.
- 6.85** The sand and gravel landbank is below the 7-year minimum requirement as laid out in paragraph 207(f) of the revised NPPF (2019) and will be fully depleted during the Plan period unless additional proposals for minerals extraction come forward and planning permissions are granted for the release of additional reserves.

Greater Manchester, Merseyside and Warrington aggregate land-won sand and gravel landbank as at 31st December 2018

	Landbank as at 31.12.2017(years)	Permitted reserves as at 31.12.2018 (mt)	Annual apportionment requirement 2005-2020 (mt)	Landbank as at 31.12.2018 (years)
Greater Manchester, Merseyside and Warrington	Below 7 years	1.2	0.3	4 years

- 6.86** Again, to protect confidential figures for sales of land won sand and gravel, a 3-year average sales figure for 2016, 2017 and 2018 has been used. Sales averaged out at 0.26mt, slightly above the ten-year average of 0.25mt. Although there has been a slight upturn in recent years, sales continue to be below the apportionment and levels of future provision will be addressed through the Local Aggregates Assessment.
- 6.87** Data from the 4-yearly Mineral Surveys conducted by British Geological Survey (BGS) and the Ministry for Housing, Communities and Local Government (MHCLG), indicates that the sub-region continues to rely heavily on imported aggregates, with 76% of sand and gravel consumed in 2009 originating from outside the sub-region, either from elsewhere in the North West or beyond; this figure remained the same in the 2014 Survey. The next Survey will be carried out in 2020, based on sales and reserves reported for the 2019 calendar year. The Mineral Survey will provide updated information on movements of aggregates and will identify if the reliance on imports has increased due to the lack of local provision.

Crushed Rock

- 6.88** Reserves of crushed rock are depleting year on year and additional permissions for its extraction will be required in the medium to long term. The crushed rock landbank is, however, currently above the 10-year minimum requirement as laid out in the revised NPPF (2019).

Greater Manchester, Merseyside and Halton and Warrington aggregate crushed rock landbank as at 31st December 2018

	Permitted reserves as at 31.12.2017 (mt)	Annual Apportionment requirement 2005 - 2020 (mt)	Landbank as at 31.12.2017 (years)
Greater Manchester, Merseyside and Warrington	17.5	0.85	29.2

- 6.89** Table 3 below shows that sales of crushed rock in 2018 were 0.65mt, above the ten-year average of 0.6mt but below the three-year average of 0.77mt. The sub-region is heavily reliant on imported high quality crushed rock, as the material extracted within the subregion is generally of a poor quality. The sub-region imported 92% of crushed rock consumed in 2009, this increased to 93% for 2014.
- 6.90** Communication and co-operation with those authorities that export primary aggregates into the sub-region will be important. Paragraph 27 of the revised National Planning Policy Framework (2019) states that to demonstrate effective and on-going joint working, strategic plan-making authorities should prepare and maintain one or more Statements of Common Ground, documenting the identified cross-boundary matters, and setting out the progress in co-operating to address these issues.
- 6.91** Local Aggregate Assessments had not been fully introduced when the Minerals Plan was written and so the plan does not reflect the requirement to consider imports and exports of materials. The plan is therefore currently lacking in detail of the likely scale of material required to meet expected demand over the plan period and from where this will be sourced.
- 6.92** As part of the work undertaken in 2018 to review of the Minerals Plan, operators with existing operational quarries in the North West were contacted to ascertain if there was any interest in developing new sites, both crushed rock and sand & gravel, for mineral extraction or extensions to existing sites within Greater Manchester in the future. Two operators responded to state that they would be interested, should they be able to find suitable sites, and another with an existing site in the area stated that they would be interested in extending that site. A further operator met with a member of the Minerals and Waste Planning Unit and stated that they were in negotiations with landowners in relation to three potential sites within GM for future mineral extraction.

Indicator M2 production of secondary and recycled aggregates by mineral planning authority

- 6.93** This indicator measures production of secondary and recycled aggregates by mineral planning authority. This links with Objective 4iii of the Minerals Plan. Current data is considered unreliable. Estimates are made using information from primary aggregate reserves and sales to identify any trends which may link to the production of secondary and recycled aggregates. Table 3 and 5 indicate a general downward trend in sales of aggregate since 2007, whilst reserves of crushed rock showed a slight increase up to 2014 but a small decrease year on year from that point on. That said, an application was received in 2018 for the extension of time to Buckton Vale Quarry up to 2042. This application is still pending and will be reported on in the next AMR but could potentially reverse the downward trend seen in recent years.

6.94 Sand and gravel reserves have tended to fall and are currently below the required 7 years landbank and are likely to remain that way. The general fall in sales and reserves of crushed rock may indicate an increased use of secondary and recycled aggregate in the region in place of local primary aggregates. Reserves of sand and gravel have been depleted as reserves at Morleys Quarry have been worked out.

Greater Manchester, Merseyside and Warrington aggregate crushed rock sales 2007-2018

Aggregate Crushed Rock Sales (million tonnes)												
Monitoring period	AM07	AM 08	AM 09	AM 10	AM 11	AM 12	AM 13	AM 14	AM 15	AM 16	AM 17	AM 18

Greater Manchester, Merseyside and Warrington aggregate sand and gravel reserves 2007-2018

Aggregate Sand and Gravel Reserves (million tonnes)												
Monitoring period	AM07	AM 08	AM 09	AM 10	AM 11	AM 12	AM 13	AM 14	AM 15	AM 16	AM 17	AM 18
Land-won	5.15	5.8	6.1	4.85	4.76	4.52	4.27	3.86	3.70	c.	c.	4.0
Total reserves	5.15	5.8	6.1	4.85	4.76	4.52	4.27	3.86	3.70	c.	c.	4.0

6.95 A significant proportion of the wastes recycled for aggregate use are recycled at demolition/construction sites using mobile processing plants and indeed often reused onsite. Estimates of Construction, Demolition and Excavation (CD&E) waste which can be used as recycled aggregates can be obtained from the Environment Agency's Waste Data Interrogator. However, this data does not cover materials managed at exempt sites or material which is managed on site and therefore does not enter the waste stream, therefore this can only provide an estimate of recycled aggregates. Each year the Environment Agency releases data for the previous year. The current data set for reporting is for calendar year 2018.

6.96 The Waste Data Interrogator (WDI) for 2018 shows that in Greater Manchester the amount of CD&E waste handled in the area increased from 3.152mt in 2017 to 3.232mt in 2018. In comparison, the amount produced in 2017 was 2.72mt indicating that Greater Manchester processes more CD&E waste than it produces.

Total Construction, Demolition & Excavation Waste Handled in Greater Manchester

Construction and Demolition waste (million tonnes)						
Monitoring Period	2013	2014	2015	2016	2017	2018
Total C&D waste	2.731	2.887	2.868	2.863	3.152	3.232

Data taken from EA WDI.

Minerals Plan Policies Review

Policy 1: The Presumption in Favour of Sustainable Minerals Development

6.97 This policy states that positive consideration will be given to minerals development which accords with the policies set out in the Minerals Plan and with all other relevant local plan policies and that such development will be permitted unless material considerations indicate otherwise. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of mineral development planning applications permitted in line with presumption in favour of sustainable development	100%

6.98 No applications were permitted in the year 2018/19 for minerals development. However, there is currently a Section 73 application pending consideration at Morleys Quarry, Wigan, to vary some of the planning conditions relating to the 2008 approval to extend the winning of clay and sand until 2024..

Policy 2: Key Planning and Environmental Criteria

6.99 This policy states that minerals development will be permitted where any adverse impacts on a list of criteria are avoided or can be appropriately mitigated. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of mineral development planning applications permitted compliant with the requirements of the policy	100%

6.100 As above, no applications were permitted during the monitoring period, as such there is null effect on this indicator for 2018/19.

Policy 3: Primary Extraction of Aggregate Minerals (implements of objectives 1 & 4i)

6.101 This policy states the conditions under which applications for extraction/and or processing of sand, gravel or sandstone/gritstone within the Areas of Search and the conditions for outside Areas of Search planning permission will be permitted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of applications for primary extraction of aggregate minerals permitted compliant with the requirements of the policy.	100%

6.102 There were no relevant planning applications for mineral extraction permitted during the monitoring period and so this target is not applicable.

Policy 4: Natural Building Stone (implements objectives 1 & 4ii)

6.103 This policy states the conditions under which proposals for the working of natural building stone will be supported and what evidence the proposals must be supported by. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of natural building stone excavation permitted compliant with the requirements of the policy.	100%

6.104 There were no relevant planning applications for mineral extraction permitted during the monitoring period and so this target is not applicable.

6.105 Paragraph 16, Ref ID: 27-016-20140306 of the updated National Planning Practice Guidance (NPPG) states:

6.106 *“Mineral planning authorities should recognise that, compared to other types of mineral extraction, most building stone quarries are small-scale and have a far lower rate of extraction when compared to other quarries. This means that their local environmental impacts may be significantly less. Such quarries often continue in operation for a very long period and may be worked intermittently but intensively (“campaign working”), involving stockpiling of stone.”*

6.107 Neither Policy 4 nor its supporting text at Paragraphs 3.27 to 3.32 of the Minerals Plan recognise the low extraction rates and long operating periods of such quarries and so may need to be updated to comply with the NPPG.

Policy 5: Primary Extraction of Non Aggregate Minerals (implements objectives 1 & 4ii)

6.108 The policy states the conditions under which proposals for the development of non -aggregate minerals will be permitted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of applications for primary extraction of non aggregate minerals permitted compliant with the requirements of the policy.	100%

6.109 There were no relevant planning applications for mineral extraction permitted during the monitoring period and so this target is not applicable.

6.110 As a requirement of national planning policy, minerals planning authorities need to be able to demonstrate a 25 year supply of brick clay reserves. Reserves at Harwood Quarry are due to be depleted towards 2026 and so the sub-region is falling short of this target. Weinberger's Denton Brickworks Factory in Manchester sources 50% of its brick clay from Harwood Quarry and 50% from a quarry in Derbyshire. The Brickworks operator has requested assistance in identifying new potential sites for clay extraction within the sub-region. This could be achieved through a review of the Minerals Plan to identify any potential suitable sites with the assistance of the minerals industry. As part of the work previously undertaken for the review of the Minerals Plan, discussions have taken place with operators within the region, a number of which have indicated an interest in seeking to provide additional reserves of brick clay to continue to support the Brickworks, proposals for which could be delivered through the review of the Minerals Plan. The situation remains the same now as it was in 2017, although this issue has been highlighted in a Statement of Common Ground with Derbyshire County Council.

6.111 It may be necessary to update Policy 5 and/or its supporting text to reflect the guidance outlined in the revised NPPG, with reference to the need to identify the remaining stocks of permitted reserves and how these may act as a strong indicator of an urgent need.

Policy 6: Unconventional Gas Resources (implements objectives 1 & 5)

6.112 The policy states the conditions under which applications for exploration and appraisal, and production wells for unconventional gas resources will be permitted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of unconventional gas resources developments permitted compliant with requirements of the policy.	100%

6.113 There were no relevant applications for unconventional gas resources developments permitted during the monitoring period.

6.114 In order to comply with the NPPF, Policy 6 should be updated to distinguish between the three phases of development, rather than group them together with the same assessment criteria.

Policy 7: Peat (implements objective 1)

6.115 The policy states the conditions under which applications for peat extraction will be granted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of peat extraction developments permitted compliant with the requirements of the policy.	100%

6.116 There were no applications for peat extraction developments permitted during the monitoring period.

Policy 8: Mineral Safeguarding Areas (implementing objective 1, 2 and 3)

6.117 The policy states that all non-mineral development proposals within the Mineral Safeguarding Area should extract any viable mineral resources present in advance of construction. The policy also states the requirements for proposals for non-mineral development within the Mineral Safeguarding Areas that do not allow for the prior extraction of minerals. It is also stated that all non-mineral development proposals outside the Mineral Safeguarding Areas where the potential for prior extraction to take place has been identified should seek to extract any viable mineral resources present in advance of construction. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of non mineral development permitted within the MSA (falling within the policy thresholds) which do not needlessly sterilise mineral resources.	100%

6.118 There have been no non-mineral developments permitted within the MSA that would needlessly sterilise mineral resources. There were a large amount of smaller applications that came forward within Mineral Safeguarding Areas of GM. However, by reason of their approval, it was considered that none of the permitted non-mineral development was contrary to Policy 8. For reference purposes, the following table includes some illustrative examples of larger applications that came forward within the 2018-2019 monitoring period which have yet to be determined:

Application No.	Location	Proposal	Decision
00997/17	Hulton Park, Bolton	Full planning application for restoration works to Hulton Park and existing structures & heritage assets within it	Committee 22 March 2018. Call in inquiry 1 Oct 2019. Report submitted to Secretary of State on or before 09/03/2020.
04766/18	Land west of Wingates industrial estate Chorley Road,	Outline application for strategic employment development for industrial (class b1c/b2), storage and distribution class b8) and/or research and development (class b1b) uses each with ancillary office space (class b1a) parking and associated facilities, (class d1) ancillary food and drink (class 3/a4/a5)	Committee in October 2019 but was deferred. It is hoped to go back to committee in January

Policy 9: Sustainable Transport of Minerals (implements objective 3)

6.119 This policy states that developers will be encouraged to transport minerals via the most sustainable transport mode wherever practicable and allows for transport of minerals by road where the use of more sustainable transport is not practicable and the existing highway network is able to accommodate traffic generated by the proposal. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of mineral development permitted utilising most sustainable transport modes in compliance with the policies of the Minerals Plan.	100%

6.120 No new site permissions were granted for minerals extraction.

Policy 10: Reworking of Colliery Spoil Tips (implements objectives 1 & 5)

6.121 This policy states the conditions under which applications for the reworking of colliery spoil tips will be permitted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of applications for reworking colliery spoil tips permitted compliant with the requirements of the policy.	100%

6.122 There were no applications for reworking colliery spoil tips permitted during the monitoring period.

Policy 11: Protecting Existing Mineral Sites/Infrastructure (implements objectives 1, 2, 4 & 5)

6.123 This policy protects existing mineral sites and infrastructure from new development and states the conditions under which development likely to have an unacceptable impact on mineral sites and infrastructure will be permitted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of non mineral related development permitted within a distance that could affect existing mineral sites/infrastructure, in the absence of justification provided by the developer as set out within the policy.	100%

6.124 No applications were permitted that could affect existing mineral sites/infrastructure, in the absence of justification provided by the developer as set out within the policy.

Policy 12: Protecting quarries important for maintaining historic buildings (implements objectives 1, 2, 4 & 5)

6.125 This policy states that impact upon quarries important for maintaining historic buildings will be considered and states the conditions under which development likely to have an unacceptable impact on the future use of a quarry will be permitted. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of mineral related development permitted in line with the restoration and aftercare requirements.	100%

6.126 There were no relevant planning applications permitted during the monitoring period.

Policy 13: Restoration and aftercare (implements objective 1)

6.127 This policy states that applications for minerals extraction will be permitted where they are accompanied by appropriate proposals for site restoration and aftercare. The indicator and target for the monitoring of this policy is:

Indicator	Target
% of mineral related development permitted in line with the restoration and aftercare requirements.	100%

6.128 During the monitoring period, no new applications were determined for the extraction of aggregates. Significant work has been undertaken at Morleys Hall to facilitate effective restoration through landfill of the former sandpit, however through monitoring it has been noted that restoration is not in line with the agreed planning permission. The unit and Council have been working with the operator to rectify this and recent visits have shown considerable improvements to conditions on site; however, an application will be required to ensure the site is restored properly..

Petroleum Exploration and Development Licence (PEDL) update

6.129 On the 18th August 2015, the Oil and Gas Authority (OGA) and Department of Energy & Climate Change (DECC) published a Habitat Regulations Assessment (HRA) of the 14th Onshore Oil and Gas Licensing Round. The Oil and Gas Authority announced on 17th December 2015 that all 159 onshore blocks under the 14th Onshore Oil and Gas Licensing Round are being formally offered to successful applicants.

6.130 Of those blocks formally offered, 7 blocks fall wholly or partially within Greater Manchester;

1. Bolton Ref SD6, Operator: Osprey
2. Bolton & Bury Ref SD71, Operator: Hutton
3. Bury & Rochdale Ref SD81, Operator: Hutton
4. Wigan, SD50, Operator: Aurora
5. Bolton & Wigan Ref SD60d, Operator: Hutton
6. Bolton & Salford, SD70, Operator: Hutton
7. Trafford, SJ78, Operator: Ineos

6.131 There is also an existing and retained PEDL in place (Ref PEDL 193; Operator IGAS) partly in Salford/Trafford/Manchester City. Igas run the Davyhulme site where permission was granted for 25 years in 2015 but at which there has not yet been any activity. PEDL193 also includes Ineos' Barton Moss site which has a well and side-track drilled, but work is currently suspended.

6.132 The Minerals and Waste Planning Unit within Urban Vision has invited industry representatives to visit the team to discuss their intentions for petroleum exploration within Greater Manchester. Only one representative has so far accepted the invitation and met with the Unit. It is assumed that the other license holders have no plans to explore potential resources within the sub-region in the short term.

6.133 The Department for Energy and Climate Change Onshore Oil and Gas interactive map shows the released licence areas and can be accessed at: <https://deccedu.maps.arcgis.com/apps/webappviewer/index.html?id=29c31fa4b00248418e545d222e57ddaa>

Actions

6.134 Over the monitoring period the targets for all policies have either been met or no applications have been approved which would cover said policies. As mentioned in paragraph 1.1, a 5-year review of the Minerals Plan was due to be published during the 2018/19 monitoring period, however, this review is separate to annual monitoring and looks at whether the Plan is delivering its aim and objectives whilst meeting the needs of Greater Manchester. The review undertaken in 2018 identified a number of areas where policies are not considered compliant with national policy and should be reviewed through any update to the Minerals Plan.

6.135 As highlighted at the beginning of the report, Greater Manchester has a limited supply of high-grade aggregates and so relies on imports from surrounding Minerals Planning Authorities for this material. Greater Manchester must continue to liaise with the surrounding Minerals Planning Authorities regarding movement of such minerals.

7 Key findings and actions

Implementation of Policies

- 7.1** This section of the Monitoring Report analyses whether Oldham's planning policies are being implemented. Where they are not, the reasons are examined and if action is needed to rectify the situation.
- 7.2** From analysing the indicators within Section 3, 'The effects of the Local Plan', it is possible to highlight policies that may not be being effectively implemented or interpreted correctly and / or are not hitting their targets. Below is a list of indicators that may need to be further examined for their effectiveness or how they are being implemented. This may lead to an action plan being drawn up to deal with how we go forward.
- 56% of completions during 2018/19 took place on previously developed land. A further 146 dwellings or 36% of all dwellings completed in 2018/19 were on mixed sites which contain both PDL and greenfield land.
 - Renewable energy installed. Major developments are required to meet energy targets over and above Part L building regulations, in 2018/19 only 29% of majors fulfilled this requirement.
- 7.3** These indicators will be kept under review and appropriate steps taken, where necessary, to improve their performance.

Action needed to address gaps in information

- 7.4** The key actions under this heading are:
- To continue working with the council's Development Management section to ensure that data is entered into the planning applications management system to facilitate the closer monitoring of the use of policies in decision-making. This is likely to be improved in early 2020 once the implementation of a new Development Management IT system is rolled out.
 - To further develop monitoring systems for relevant indicators as appropriate, including the loss of employment land, vacant previously developed land and open space. This is likely to be improved in early 2020 once the implementation of a new Development Management IT system is rolled out.
 - To look at how the Council can effectively monitor the Contaminated Land and SUDS indicators in future years.

Action needed to respond to indicators

- 7.5** The key housing related actions under this heading are:
- Continue to update the council's five year deliverable housing land supply annually in line with NPPF and to carry out a full review of the council's SHLAA to inform preparation of the GMSF and the emerging Local Plan review;
 - Whilst each application will be treated on its planning merits, proposals for residential development on greenfield sites will (whether new proposals or where the renewal of planning permission is sought) continue to be resisted unless there are other relevant material considerations;

- Planning applications for the conversion and change of use of agricultural buildings to residential use and which are technically classified as greenfield developments (because agricultural buildings are not regarded as “previously developed land”) continue to be treated on their planning merits;
- The Local Plan will identify sites for gypsy and traveller provision, as appropriate, if there is a clear and demonstrable need based on up to date evidence in line with the Joint DPD Policy 12;
- Encourage the provision of larger family (three/four plus bed) accommodation and higher value, aspirational, housing as part of the mix of new residential developments; and
- Utilise local evidence, including both the Greater Manchester and Oldham’s Strategic Housing Market Assessments, to ensure that housing delivered meets the needs of the local community.

7.6 The key actions associated with town centre uses are to ensure that processes are put in place to ensure future monitoring of the indicator improves as appropriate.

7.7 The key action associated with Flood Protection and Water Quality is to continue to engage with the LLFA on major application in order to address surface water flood risk and SUDS.

7.8 The key action associated with Biodiversity is to ensure that the Biodiversity Net Gain proposals emerging from central government and the GMSF are embedded within the local plan process in Oldham.

7.9 The key action in relation to Renewable Energy is to ensure that the policy is applied until it is superseded.

7.10 The key action associated with OPOL is to continue to protect designated OPOL from development unless the proposed development is appropriate, small scale or ancillary development close to existing buildings within the OPOL, which does not affect openness, local distinctiveness or visual amenity in line with the Local Plan policy, unless material considerations suggest otherwise.

7.11 The key action associated with Land Reserved for Future Development is that the council should ensure that any development on LRFD is only granted where it would be acceptable in the Green Belt and not prejudice the later development of LRFD beyond the life of the Joint DPD, whilst still designated as LRFD.

7.12 The key action associated with Landscape Character is to ensure that the borough's landscape is conserved and enhanced when assessing planning applications.

7.13 The key action associated with Conservation is to ensure that the policies within the Joint DPD protect, conserve and enhance the borough's heritage assets.

7.14 The key actions associated with Health are:

- The council should continue to apply Local Plan policies 1, 2, 6 and 23 to protect existing indoor and outdoor sports provision and to support the development of new sports provision as appropriate; and
- There is the need to ensure that developments are located close to key services and good public transport networks and access to open space and leisure centres to encourage

people to use active modes of travel and have access to sports and recreation and GPs and also to reduce air pollution. There is also a need to reduce deprivation so that people have more disposable income to access healthy food. Access to quality housing is also important.

7.15 The key actions associated with Education is to ensure that the Council continues to support proposals for education related development.

7.16 The key actions associated Air Quality and Development are:

- Ensure that new development minimises motorised traffic and the impact on air quality and encourage developments to be energy efficient and use low carbon energy. The policies within the Joint DPD aim to protect and improve local environmental quality; and
- There is the need to continue to reduce emissions. There is a need to ensure that the Local Plan review helps to deliver the Greater Manchester Clean Air Plan.

7.17 The key actions associated with Urban Design are to ensure the Council look at ways of improving the effective monitoring of the indicator

Action needed to update timetables in the Local Development Scheme

7.18 The LDS in place at the start of the monitoring period was "Issue 9" (approved in July 2016) and can be viewed on the council's website www.oldham.gov.uk. Preparation of the GMSF has resulted in a delay of the Local Plan against the LDS timetable. A LDS update will be published in due course.

Action needed to respond to new policy/prepare new development plan documents

7.19 The key actions under this heading are:

- To continue working with GMCA partners on preparation of the GMSF;
- To continue working on the preparation of the Local Plan review, including a revised Proposals Map, as appropriate, in line with preparation of the GMSF; and
- Review existing indicators and monitoring processes as part of the Local Plan review as appropriate.

Action needed to respond to master planning activity

7.20 As part of the council's plans for regeneration there has been, and will continue to be, a considerable amount of master planning activity taking place in the borough, such as the Oldham Town Centre Masterplan.

7.21 At present it is not proposed that any of these masterplans will be progressed as Local Plan Area Action Plans or SPDs. They are however implemented and reflected through the Core Strategy where appropriate and will be taken into account when preparing the emerging Local Plan Review.

8 Other Monitoring Matters

Neighbourhood Development Order and Neighbourhood Development Plans

- 8.1** In November 2016 Saddleworth Neighbourhood Area was designated. Informal consultation and information gathering has been on-going since then. During 2019/20 a survey will be distributed to residents and businesses.

Community Infrastructure Levy (CIL)

- 8.2** The council has determined not to proceed with a CIL schedule at this time and therefore no monitoring has, or will take place in this regard.

Duty to Co-operate

- 8.3** All consultations that have been undertaken in the monitoring period have been carried out in accordance with the adopted SCI, with all the relevant Statutory Consultees contacted for comments.
- 8.4** In relation to the preparation of the Local Plan, the Council has been working with all ten Greater Manchester Authorities on the GMSF. As part of the replacement Local Plan process, the Council issued a Regulation 18 Notice and met with, and had contact with, a number of organisations and neighbouring authorities in the interests of Duty to Cooperate and as part of preparing for the Issues and Options stage.

Organisation / Local Authority	Strategic Issues Considered	Who the issue was discussed with and how	Date	Outcome of discussion
Saddleworth Parish Council	Progressing neighbourhood plan.	Saddleworth Strategic Planning meeting	On-going (Monthly)	Actions to progress neighbourhood plan. Minutes are published on the Parish Council website.
Environment Agency	To discuss flood risk and water quality issues.	Environment Agency, Strategic Planning, Development Management	25 April 2018	To continue to keep each other informed on EA policy, Local Plan progress and development management issues.
Historic England	Heritage	Oldham Council and Historic England	27th June 2018	To consider how mills can be promoted in Oldham.
Kirklees Metropolitan Borough Council	Regulation 18 Notification (Duty to Co-Operate)	Meeting to discuss possible Issues and Options	13th July 2018	To continue to keep each other informed on Local Plan progress.
Calderdale Metropolitan Borough Council	Regulation 18 Notification (Duty to Co-Operate)	Meeting to discuss possible Issues and Options	19th July 2018	To continue to keep each other informed on Local Plan progress.

Organisation / Local Authority	Strategic Issues Considered	Who the issue was discussed with and how	Date	Outcome of discussion
Peak District National Park Authority	Regulation 18 Notification (Duty to Co-Operate)	Meeting to discuss possible Issues and Options	26th July 2018	To continue to keep each other informed on Local Plan progress.
Rochdale Borough Council	Regulation 18 Notification (Duty to Co-Operate)	Meeting to discuss possible Issues and Options	9th August 2018	To continue to keep each other informed on Local Plan progress.
Manchester City Council	Regulation 18 Notification (Duty to Co-Operate)	Meeting to discuss possible Issues and Options	15th August 2018	To continue to keep each other informed on Local Plan progress.
Historic England	Heritage	Oldham Council and Historic England	16th August 2018	To start developing a tender for a mills strategy.
Tameside Metropolitan Borough Council	Regulation 18 Notification (Duty to Co-Operate)	Meeting to discuss possible Issues and Options	30th August 2018	To continue to keep each other informed on Local Plan progress.
South Pennines Group	South Pennines Group discussing matters relating to landscape, ecology, energy etc	Districts that are members of the South Pennines Group.	7th December 2018	To continue to keep each other informed on Local Plan progress.
GMCA, Conservation Officers Groups, Greater Manchester Archaeology Service, Oldham Council	Heritage evidence	Meetings with members of GM Heritage group.	1st March 2019	To progress actions on heritage evidence to support preparation of the Local Plan.
GMEU / Natural England	Biodiversity Net Gain	Workshop on Biodiversity Net Gain for GM districts	28th March 2018	To embed Biodiversity Net Gain in the Local Plan and local decision making.

Appendix 1 Local Housing Statistics

Net House Building 2003/04 to 2018/19

Year	Completed	Cleared	Net Change	Variance from Housing Requirement*
2003/04	497	227	270	-19
2004/05	285	150	135	-154
2005/06	386	254	132	-157
2006/07	577	262	315	26
2007/08	599	200	399	110
2008/09	505	102	403	114
2009/10	227	307	-80	-369
2010/11	389	324	65	-224
2011/12	231	220	11	-278

Appendix 3 Tracking saved UDP Policies

The UDP was adopted in July 2006. The policies were further `saved` by the Secretary of State in May 2009 (for an unspecified period of time) until replaced by the relevant part of the Local Plan. The table below lists the UDP policies that have remained unaffected by the adoption of the Joint DPD, the Greater Manchester Waste DPD and the Greater Manchester Minerals DPD. They will continue to be `saved` until replaced by the relevant part of the Local Plan or GMSF.

UDP `saved` policies

UDP Policy No.	UDP Policy Name	Local Plan document which may review the UDP policy
B1	BUSINESS AND INDUSTRIAL LAND ALLOCATIONS	Local Plan review and/or JWDPD and/or JMDPD
B1.1	Business and Industrial Allocations	Local Plan review and/or JWDPD and/or JMDPD
B1.2	Business and Office Allocations	Local Plan review and/or JWDPD and/or JMDPD
B1.3	Mixed Use Allocations	Local Plan review and/or JWDPD and/or JMDPD
D1.5	Protection of Trees on Development Sites	Local Plan review
D1.12	Telecommunications	To be determined
H1.1	Housing Land Release – Phase 1	Local Plan review
H1.2	Housing Land Release – Phase 2	Local Plan review
OE1.8	Major Developed Site in the Green Belt	Local Plan review / GMSF
OE1.11	Farm Diversification	To be determined
TC1.1	Allocated Site	Local Plan review
TC1.2	Allocated Site	Local Plan review

Now that the Joint DPD, the Greater Manchester Waste DPD and the Greater Manchester Minerals DPD, have been adopted a number of the 2006 UDP have been superseded. These are detailed in the table below.
