Regeneration takes time and therefore it is assumed that the positive effects will increase over time.	No mitigation needed. Policies within PfE and the Local Plan such as those on housing mix and tenure, communities and design aim to address this objective.	None

The policy scored a mixture of neutral, positives and significantly positive scores. Some effects were cross boundary, due to the fact Oldham Town Centre attracts people from outside of the borough, but the majority were local. Some of the effects went from positive to significantly positive over time due to the fact that regeneration can be a lengthy process and therefore it is assumed that the positive effects will increase over time. No mitigation or enhancements to the policy were required as a result of the IA.

In terms of the HRA the policy has been screened out. No Likely Significant Effect on any European Site is anticipated from the operation of this Policy.

The policy scored a mixture of neutrals, positives and significantly positive scores. No mitigation was needed to manage potentially adverse effects. However, when considering IA9 on flood risk it was considered that the wording of the policy could be enhanced from 'appropriate greening' to 'appropriate multi-functional green infrastructure' to ensure many benefits are delivered from greening and to ensure that the IA process results in net gain in line with NPPF. It was considered that this would also enhance the policy against IA objectives IA1 and IA2 on green infrastructure and open space.
