1 Introduction

Purpose of the Report

- 1.1. This Action Plan provides an analysis of housing delivery across Oldham and identifies potential housing delivery issues within Oldham (set out in Part 1). Part 2 (which is contained in a separate document) sets out how the council intends to improve delivery to ensure that we provide a diverse Oldham Housing Offer which is attractive and meets the needs of different sections of the population at different stages of their lives.
- 1.2. The Housing Delivery Test (HDT) was introduced by the Government as a monitoring tool to demonstrate whether local areas are building enough homes to meet their housing need. The HDT measures net additional dwellings provided over the past three years against the number of homes required over the same period. Results on performance for each local planning authority in England are published annually.
- 1.3. The consequences of failing the Test are set out in the revised National Planning Policy Framework (NPPF) and are:
 - less than 95% an Action Plan must be prepared.
 - less than 85% the Local Planning Authority (LPA) must identify a 20% buffer of additional deliverable sites for housing on top of their existing 5-year housing land supply. This is in addition to an Action Plan and can be taken from the 6-10 and 10 years plus supply, moved forward.
 - less than 75% the presumption in favour of sustainable development must be applied. This is in addition to the 20% buffer and Action Plan.
- 1.4. The latest HDT results were published on 19 December 2024¹, by the Ministry of Housing Communities and Local Government (MHCLG) using the previous three complete financial years of 2020/21, 2021/22 and 2022/2023. The results for Oldham are shown in Table 1 below.

Table 1: Housing Delivery Test: 2023 Measurement (published December 2024)

	Total number of homes required (2020-2023)	Total number of homes delivered (2020-2023)	Housing Delivery Test: 2023 Result	Housing Delivery Test 2023 Consequence
Oldham	1,542	1,406	91%	Action Plan

_

¹ HDT Results 2023: Housing Delivery Test: 2023 measurement - GOV.UK

- 1.5. The number of homes required in 2020/21 was 461. The number of homes required in 2021/22 was 677. The number of homes required in 2022/23 was 404. Therefore, the total number of homes required for 2020-2023 was 1,542 homes.
- 1.6. It is important to note that the impact of Covid-19 on housing delivery has been considered and is reflected in the 2023 results, as the 'number of homes required' was reduced within the 2020/21 year by 4 months. The thresholds for consequences for under-delivery have been maintained, as set out in NPPF (see paragraph 1.3 above).
- 1.7. Oldham Council has delivered 91% of the homes required over the measurement period. As a result, considering the HDT consequences, the council is required to prepare an Action Plan to assess the cause of under-delivery and identify actions to increase delivery in future years.
- 1.8. An Action Plan is intended to be a practical document, focused on effective measures aimed at improving delivery within an area underpinned by local evidence and research of key issues. This Action Plan updates the previous Action Plan published in July 2024 and is Oldham's fifth plan.

Relationship to other Strategies and Plans

1.9. This Action Plan complements several existing council aims, plans, policies and strategies which together provide a framework for the delivery of the council's housing priorities. These are summarised below.

Oldham's Housing Crisis

- 1.10. In February 2024 Oldham Council declared a housing crisis. The national housing crisis is having a local impact within Oldham. As is set out within section 2 of this document, there are several components of the national housing crisis, including a significant under-supply of housing, worsening affordability (and a lack of affordable housing options), an ageing population and the increased cost of living.
- 1.11. These issues are being experienced within Oldham. Currently there is a need for 7,954 homes on the Council's Housing Needs Register, but only 816 homes available. (approximately 68 per month).
- 1.12. There are increasing numbers of people in temporary accommodation between June 2021 and February 2025 the number of people in temporary accommodation increased by over 300%. Further analysis of Oldham's housing needs is contained within section 2 of this document.
- 1.13. There is a particular need for social homes within Oldham that provide a truly affordable housing option.
- 1.14. The number of social homes being built across England has dramatically reduced over the past decade. Shelter have reported that the severe lack of social housing is the main cause of England's housing crisis. Social homes being sold off and not replaced, insufficient funding for social homes compared to other types of affordable products (including shared ownership and affordable rent – as defined by NPPF), and not

- building enough social homes, are identified as the main reasons for the distinct shortage of social homes² across England.
- 1.15. As part of their 'let's build social housing' campaign, Shelter have stated that if the government supported the delivery of 90,000 social homes per year across the country, this would lead to significant improvements in the housing crisis and ensure people have a solid foundation to lead happy and healthy lives.
- 1.16. At a Housing Roundtable event³, Oldham Council committed to doing our bit to resolve the housing issues being experienced within Oldham, by delivering 500 social homes, with the support of council partners, over the next five years. Further information about the event is set out within section 5 of this document.
- 1.17. In addition to the commitment to deliver social homes, our response to the housing crisis includes a series of other priorities which are aimed at meeting local housing needs, including tackling empty homes through bringing them back into use, and identifying a residential pipeline of future housing sites across the borough and supporting their delivery for a range of housing types.
- 1.18. This Action Plan is framed in the context of Oldham's housing crisis declaration and actions within this Action Plan (contained in part 2) are directly related to meeting Oldham's local housing needs. Further information and progress on the actions are included within part 2 of this Action Plan.

Oldham's Housing Strategy

- 1.19. The Council's Housing Strategy 2019⁴ aims to provide a diverse Oldham Housing Offer that is attractive and meets the needs of different sections of the population at different stages of their lives.
- 1.20. The Housing Strategy sets out the opportunities that the council, and its partners, have to improve our housing offer and our place offer. These include:
 - Building new homes at a level which increases the housing choices available so that more people can find a suitable home in a place they like and at a price they can afford.
 - The delivery of a broader range of housing tenure and type, particularly in the most disadvantaged areas, to reduce social and economic segregation and achieve a better mix of incomes.
 - Explore new housing development models, such as a Local Housing Company and alternative financial incentive schemes.

https://england.shelter.org.uk/support_us/campaigns/lets_build_social_housing#:~:text=A%20severe%20lack%20of%20social,to%20lead%20happy%2C%20healthy%20lives.

^{1.1. &}lt;sup>3</sup> Oldham Council Housing Roundtable Event, February 2024:

https://www.oldham.gov.uk/news/article/2618/tackling the housing crisis 500 new social homes coming to oldham announced at oldham housing roundtable event

⁴ Oldham's Housing Strategy, Oldham Council 2019, available at: https://www.oldham.gov.uk/info/200584/housing strategies and research

- 1.21. To meet these challenges, and more, the Housing Strategy sets out a series of actions, which include those around:
 - Building more homes to provide greater choice in type, size, tenure and affordability.
 - Partnerships with committed developers and registered housing providers to build homes and better places.
 - Improving the viability of difficult sites with developers.
 - Support for self-build and co-operative community-led models of housing. The council's direct role in the delivery of new homes.
 - Improve coordination between housing and planning.
- 1.22. These actions are supported by a delivery plan which facilitate their implementation. The Housing Delivery Test Action Plan is not intended to repeat the Housing Strategy Delivery Plan but supports its implementation as appropriate.
- 1.23. As part of the Housing Strategy, a Local Housing Needs Assessment (LHNA) was prepared⁵. This provided an in-depth analysis of Oldham's housing market and housing needs. An update of the LHNA (2024) has been prepared and will be available online in due course. Findings from the updated LHNA are noted throughout this Action Plan where appropriate.
- 1.24. The council intends to refresh the Housing Strategy in the near future to respond to the housing crisis and to embed the findings of the LHNA update. This will inform future Housing Delivery Action Plans as appropriate.

Creating a Better Place (Oldham Council)

- 1.25. 'Creating a Better Place' is an ambitious plan for Oldham. Creating a Better Place focuses on building more homes for our residents, creating new jobs through town centre regeneration, and ensuring Oldham is a great place to visit with lots of family-friendly and accessible places to go.
- 1.26. Creating a Better Place aims to deliver around 2,000 new homes in the town centre designed for a range of different budgets and needs, new job and entrepreneur opportunities, new leisure, retail and cultural facilities and a new park.

Oldham Town Centre Development Plan Framework (Oldham Council & Muse)

- 1.27. Building on the vision of Creating a Better Place, Oldham Council has partnered with Muse, the place maker, to deliver transformational change for the town centre⁷.
- 1.28. Informed by Oldham Council's wider regeneration initiatives and planning policy context (both adopted and emerging), the Framework⁸ sets out a series of town centre

⁸ Oldham Town Centre Development Framework: https://oldhamtownliving.co.uk/wp-content/uploads/2024/11/DP824-Oldham-Development-Framework-NOV-2024-WEB.pdf

- wide development principles together with site specific design principles and illustrative proposals for defined council owned assets across the town centre.
- 1.29. The Development Framework will act as a guide to future development across the town centre and considers infrastructure interventions and technical studies to assist in the delivery of the key sites. The Framework identifies 8 sites across the Town Centre, with indicative capacities and delivery timescales within the SHLAA. The Framework will also inform relevant policies and site allocations within the Local Plan Review.

Oldham's Local Plan

1.30. The current Local Plan⁹ was adopted in November 2011. The council is in the process of reviewing the Local Plan. A new <u>Draft Local Plan</u>¹⁰ was consulted upon in 2024 and the feedback will be used to prepare the Publication Plan. Updates on the Local Plan timetable will be made available on the council's website¹¹ and as part of the Local Development Scheme¹².

'Places for Everyone' Joint Development Plan Document

- 1.31. Places for Everyone (PfE) is a joint development plan for nine Greater Manchester districts (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan).
- 1.32. It sets out how the nine districts should develop up until 2039 and:
 - Identifies the amount of new development that will come forward across the nine districts, in terms of housing, offices, industry and warehousing, and the main areas in which this will be focused.
 - Supports the delivery of key infrastructure, such as transport and utilities.
 - Protects the important environmental assets across the nine districts.
 - Allocates sites for employment and housing outside of the existing urban area;
 and
 - Defines a new green belt boundary for the nine districts.
- 1.33. Places for Everyone was adopted by all nine districts on 21 March 2024, becoming part of Oldham's statutory development plan from this date¹³.
- 1.34. PfE sets out the housing requirement for each of the nine districts and also identifies the housing land supply, the distribution of housing land, the phasing of new housing development, and includes policies on affordability, type, size and design of new housing and housing density.

¹² Local Development Scheme (2023):

Housing Delivery Action Plan - Part 1

Approach

- 1.35. The remainder of the Action Plan includes the following:
 - Housing need, delivery and supply analysis (contained in Part 1);
 - A summary of findings and key issues related to housing delivery (contained in Part 1);
 - Key actions and responses for improving housing delivery (contained in Part 2);
 and
 - Project management and monitoring arrangements (contained in Part

2 Housing Needs

2.1. This section provides an analysis of housing need issues, including affordable housing and housing for the elderly, in the borough.

A National Picture

- 2.2. There is a need to deliver housing to meet specific housing needs, such as homes for older people, affordable homes and homes for families.
- 2.3. There are several significant issues affecting housing demand and provision at a national level which offer perspective to some of the acute housing issues being experienced in Oldham.
- 2.4. England has an ageing population. The proportion of people aged 65 years and over rose from 16.4% in 2011 to 18.6% in 2021¹⁴. Whilst people are living longer, the number of years people can expect to live in good health (without a disabling illness) is declining¹⁵. There are also inequalities in healthy life expectancy based on deprivation. With those living in more deprived areas also living shorter lives, this means that they spend a smaller proportion of their lives in good health, compared to people living in less deprived areas.
- 2.5. There is a national under-supply of housing. According to research there is a need for around 370,000 new homes per year in England, of which 145,000 should be affordable (up to 2031). The government has committed to reaching a supply of 370,000 homes per year. 16. However, during 2023/24 around 221,070 new homes were supplied (similar to 2022/23). Housebuilding is not occurring at the rate required to meet housing needs.
- 2.6. Housing affordability is worsening. House prices have become less affordable over time with long term house price growth contributing to reduced affordability.
- 2.7. The latest published ONS figures (March 2023) show that in 2022, full-time employees in England could expect to spend around 8.3 times their annual earnings buying a home¹⁷. Another recent report¹⁸ found this to be even higher, in that the average house in the UK currently costs 9.1 times average annual earnings. In terms of the north-west, house prices are around 7.5 times the average annual earnings.
- 2.8. Interest rates have also been increasing since the start of 2022, meaning the cost of mortgage repayments is increasing, further impacting affordability. However, the rate began to fall in July 2024 and is steadily decreasing.

https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/ageing/articles/profileoftheold erpopulationlivinginenglandandwalesin2021andchangessince2011/2023-04-03#:~:text=2.-Population%20ageing,from%2016.4%25%20to%2018.6%25

¹⁶ Planning overhaul to reach 1.5million: Planning overhaul to reach 1.5 million new homes - GOV.UK

¹⁷ ONS Housing Affordability (2023 release):

^{18 &#}x27;What 175 years of data tell us about house price affordability in the UK', Schroders 2023: https://www.schroders.com/en/global/individual/insights/what-174-years-of-data-tell-us-about-house-priceaffordability-in-the-uk/

- 2.9. The cost of renting is also increasing between January 2024 and January 2025 private rental prices paid by tenants increased by 8.7% across the UK. Around 40% of adults reported finding it very, or somewhat, difficult to afford their rent or mortgage payments in the latest pooled period (2023)¹⁹.
- 2.10. ONS research has found that when asked what the most important issues facing the UK are, adults citied 'cost of living' most often and 'housing' fifth. 16% of adults reported that increased rent or mortgage costs has contributed to their overall increased cost of living (amongst the price of food shopping, gas and electricity and the price of fuel)²⁰.
- 2.11. In terms of financial resilience (measured as being able to withstand a 25% fall in household employment income over a three-month period), over one quarter (27%) of households could not cover this. Households which were most likely to report this, and therefore considered the least financially resilient, were lone parents with dependent children (55%), renters (48%), households with a Black, African, Caribbean, or Black British head (53%), households where the head had a routine or semi-routine occupation (46%) and households where the head had a limiting disability or longstanding illness (34%)²¹.

Oldham Context

Demographic

- 2.12. In terms of demographics, Oldham's population was estimated to be 246,130²² in 2023.
- 2.13. According to the Councils Service projections, Oldham's population is projected to reach 258,929 by 2033 a 5% increase from the 2023 population²³. High birth rates within the Pakistani and Bangladeshi communities, along with internal and international migration, will be major influences in Oldham's population growth.

²³ Joint Strategic Needs Assessment: https://www.jsnaoldham.co.uk/profile/

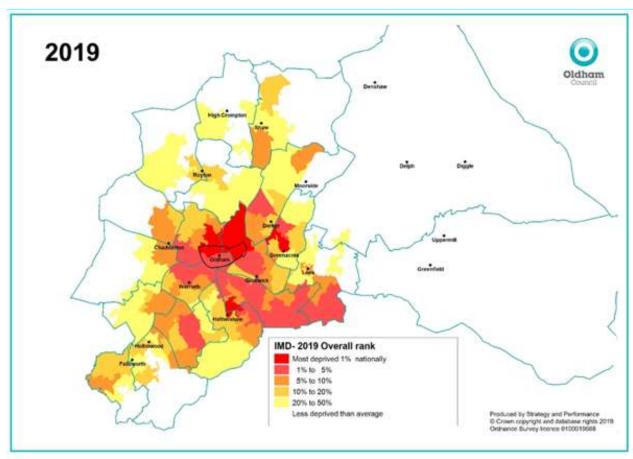

Figure 1: Oldham's Population Projections 2001 to 2041²⁴

- 2.14. It is expected that the number of older people in Oldham will grow by 30% in the next 20 years. This will bring major challenges for adult social care, specialist housing and health provision.
- 2.15. Also, changes in Oldham's ethnic composition are likely to affect patterns of residence within Oldham. There may be an increased need to support community relations, particularly within neighbourhoods where ethnic compositions are shifting rapidly.
- 2.16. Levels of deprivation across the borough are generally ranked amongst the highest in the country. Oldham currently has four areas within the borough which are among the top 1% of the nation's most deprived areas in the wards of St Mary's, Coldhurst and Alexandra. Only the wards of Crompton, Saddleworth North and Saddleworth South do not contain any areas that fall within the nation's top 20% most deprived.

²⁴ Source: Oldham in Profile 2024, Oldham Council - ONS Mid-Year Estimates, ONS SNPP 2020, Oldham Council Projections 2020

Figure 2: Oldham Areas of High Deprivation, 2019²⁵

- 2.17. In terms of income, Oldham has traditionally had low wage levels. This is likely due to the industry mix within the borough and the relative skill levels of the local workforce. Average incomes within Oldham are amongst some of the lowest in Greater Manchester²⁶.
- 2.18. Life expectancy in Oldham is two years shorter than life expectancy across England and Oldham's residents have worse health than England's average. High levels of deprivation in the borough have a significant impact on health outcomes. There are also significant social inequalities within Oldham 40% of people living in Coldhurst belong to an income-deprived household, whilst this is only around 5% in Saddleworth South. These social inequalities inevitably lead to health inequalities the difference in life expectancy between the most and the least deprived ward in Oldham is over 12 years²⁷.
- 2.19. In addition, the number of years and proportion of life Oldham residents are spending in poor health is increasing. This will impact on demands for services provided by the council, such as healthcare and Adult Social Care.

²⁵ Source: Oldham in Profile 2024, Oldham Council - Department for Levelling up, Housing and Communities (2021-Present), Ministry of Housing, Communities and Local Government (2018-2021), Department for Communities and Local Government (2006-2018), English indices of deprivation

²⁶ Oldham in Profile 2024, Oldham Council – ONS Annual Survey of Hours and Earnings 2022.

²⁷ Oldham in Profile 2024, Oldham Council

- 2.20. Oldham is estimated to have 93,152 households (as of 2021)²⁸. The borough has an unbalanced housing market with low proportions of detached properties and a very high proportion of terraced homes the highest in Greater Manchester.
- 2.21. Oldham has a need for larger family accommodation highlighted by the issues around over-crowding, particularly in South Asian communities, and this demand is expected to intensify over time. The 2021 Census identified that 7.5% of households in Oldham are overcrowded compared to 4.4% nationally. Large concentrations of overcrowded homes are located around the outskirts of the town centre, particularly in the wards of Coldhurst, St Mary's and Werneth²⁹.
- 2.22. Approximately 70.1% of occupied homes are owner-occupied; 21% are rented from a social housing provider; 7.3% are private rented and 0.6% are intermediate tenure dwellings (i.e. shared ownership)³⁰.
- 2.23. Housing tenure distribution varies considerably across the borough, with high concentrations of social housing in the more deprived communities and lower levels of affordable housing in more rural areas.
- 2.24. The private rented sector has expanded very quickly across Oldham as well as nationally due to rising house prices in relation to earnings and a dramatic fall in the number of homes being rented out by local authorities.
- 2.25. Oldham's LHNA outlined the median house price in Oldham as of March 2023 was £180,000 less than the Greater Manchester average (£219,000) and significantly lower than the England average (£290,000). House prices in Oldham are some of the lowest in Greater Manchester, likely impacted by the large proportion of terraced properties which make up Oldham's housing stock.
- 2.26. House prices, available housing stock and affordability (the ratio of earnings to house prices) vary significantly across Oldham. The median price paid in Saddleworth North, Oldham's most prosperous ward, was £298,750, in contrast to St Mary's one of Oldham most deprived wards at £115,000. Over the last decade, the median house price paid in Oldham has increased by 66.7% from £108,000 in March 2013 to £180,000 in March 2023, compared with 75.2% in Greater Manchester and 56.8% nationally³¹.
- 2.27. The average house price in Oldham was £197,000 in December 2024, a 6.6% increase from December 2023. This was higher than the rise in the North West (5.4%) over the same period. In the year December 2024, the average price for terraced properties in Oldham rose by 7.3%, while the average price for flats increased by 4.4%³².
- 2.28. While house prices remain low compared to Greater Manchester, regional and national levels, they are still unaffordable for many Oldham residents due to low wages and high deposit requirements. In 2023, Oldham's affordability ratio was

²⁸ ONS 2021 Census

²⁹ Oldham in Profile 2024, Oldham Council.

³⁰ Oldham Local Housing Needs Assessment Update 2023/24

³¹ Oldham in Profile 2024, Oldham Council – Land Registry data.

³² Housing Prices in Oldham ONS:

- 6.03, compared to 6.26 in 2022, 6.26 in 2021 and 5.1 in 2020³³. Meaning on average the price of a home in Oldham is now 6.03 times the average annual earnings. Oldham's affordability has been (on average) continually worsening since 2000, although it has improved slightly compared to 2022 and 2021.
- 2.29. In terms of renting, Oldham is amongst some of the 'most affordable' boroughs in Greater Manchester to rent a home, with the rental affordability ratio estimated at 31.08% (i.e. average rent costs are 31.08% of average monthly pay). However, the boroughs of Bury, Bolton, Rochdale and Wigan are all more affordable to rent in compared to Oldham³⁴. A large proportion of the affordable provision in Oldham is focussed on smaller property types (2-3 beds). The local demand for larger properties (4-5+ beds) is very high.
- 2.30. Also, rising energy prices and energy-inefficient housing means 15.4% of households in Oldham are in fuel poverty. This rate is higher than Greater Manchester (14.1%) and England (13.1%)³⁵. Living in a cold home can have serious health implications, particularly for the old, very young and for people with disabilities and can even play a role in premature deaths. Fuel poverty is closely associated with low income and is most common among those who live in privately rented accommodation.
- 2.31. The following section sets out housing needs for particular groups.

Affordable Housing Need

- 2.32. The LHNA Update (2024) has found that there is a considerable shortfall of affordable housing in the borough, with an annual need for 669 affordable homes a year (over the next 10 years). This is almost as high as our average housing requirement over the PfE plan period 680 homes a year. Whilst it will be difficult to meet this target, it highlights the importance of the council having a robust affordable housing policy in place to help deliver against this affordable housing need and ensure that we deliver as much as we are able to.
- 2.33. There is a need for a range of affordable housing types 37% should be 1 or 2 bedrooms, 43% should be 3-bedrooms and 21% should be 4-bedrooms.
- 2.34. We also need an appropriate tenure mix development of affordable housing needs to focus on social or affordable rented properties with some affordable home ownership properties. A tenure split of 50% social or affordable rented and 50% affordable home ownership may be appropriate in terms of planning policy requirements.
- 2.35. At present, Oldham is experiencing increasing demand for social housing which is outstripping supply.
- 2.36. Currently (February 2024) there is a need for 7,954 households on the Council's Housing Needs Register, but only 816 homes available (on average 68 homes

³³ ONS 'House price to workplace-based earnings ratio', March 2024: <u>House price to workplace-based earnings</u> ratio - Office for National Statistics (ons.gov.uk)

manchester/#:~:text=The%20rent%20affordability%20ratio%20of,their%20monthly%20salaries%20on%20rent.

35 DESNZ Sub regional fuel poverty 2023 - https://www.gov.uk/government/statistics/sub-regional-fuel-poverty-2023-2021-data

- become available per month). The largest demand (and available supply) is for 1-bed, 2-bed and 3-bed housing.
- 2.37. There is also a demand for 4-bed to 7-bed homes, but there is very limited supply of larger homes. In fact, there is currently no available supply of 5+ bed housing to meet the needs of 282 applicants.
- 2.38. There are increasing numbers of people in temporary accommodation between June 2020 and January 2025 the number of people in temporary accommodation increased by over 300% (219 households in June 2020 to 663 households in January 2025).

Specialist Housing Need

- 2.39. The LHNA Update (2024) has also looked at the need for specialist housing, including housing for older people and disabled people.
- 2.40. It has found that there is a need for 4,869 additional units of accommodation for older people by 2041, including 775 residential care bedspaces, 955 Extra Care units and 3,139 other types of accommodation, including leasehold sheltered. The LHNA update recommends strengthening policies to enable people to live in their own homes for longer with appropriate support and adaptation.
- 2.41. It sets out that all new homes should be accessible and adaptable (M4(2) Standard)³⁶, which would include bungalows and level access accommodation, in line with policy JP-H3 of Places for Everyone. Also, that 5 % of all new homes should be wheelchair accessible (M4(3) Standard)³⁷.
- 2.42. Further analysis of housing needs is available within the LHNA update, which will inform future Housing Delivery Action Plans as appropriate.

3 Housing Delivery

3.1. This section provides an analysis of housing delivery against our housing needs and identifies unmet need and deficiencies.

Housing Requirement

- 3.2. The HDT looks at the number of homes delivered compared to the number of homes required over the previous three complete years, from the date of publication. The most recent measurement therefore looks at the period of 2020/21, 2021/22 and 2022/23.
- 3.3. Oldham's housing delivery is tested against our local housing need figures for each year over that time, as shown in table 2 below. For the years 2020/21 and 2021/22 local housing need is calculated using the government's 'standard methodology' for calculating local housing need. For 2022/23, the housing requirement for Oldham (as relevant to that year) set out in Places for Everyone is used³⁸.
- 3.4. Oldham's Housing Delivery Test results for the 2023 measurement are set out in table 2.

Table 2: Oldham's Housing Delivery Test Results (2023 measurement)

Year	Number of	Number of Homes	
	Homes Required	Delivered	
2020/21	461	500	
2021/22	677	506	
2022/23	404	400	
Total (2020-2023)/ Average Delivery Rate %	1,542	1,406	91%

- 3.5. As shown in table 2, housing delivery has been variable over the previous three years, however overall Oldham has delivered 91% of the housing required. This is the same as the 2021 and 2022 HDT measurement result.
- 3.6. Since the introduction of the Housing Delivery Test in 2018, Oldham's housing delivery has improved. The results for this year compared to previous years are set out in table 3 below.

Table 3: Oldham's Housing Delivery Test Results (2018-2023)

³⁸ NPPF and the HDT rulebook requires that where a local authorities Local Plan is more than five years old, local housing need should be calculated using the governments 'standard methodology'. Oldham's current Local Plan – The Joint Core Strategy and Development Management Policies DPD – was adopted in 2011. During the years of 2020/21 and 2021/22, which are considered by the 2023 HDT measurement, Oldham's Local Plan was more than five years old. As such, the 'standard methodology' applied for calculating local housing need for this period. However, as Places for Everyone was adopted on 21 March 2024, and sets out Oldham's housing requirement, the HDT measurements uses the Places for Everyone housing requirement for Oldham (404 homes a year for 2022/23) for the calculating housing delivery for the year 2022/23.

HDT Measurement Year ³⁹	Delivery Rate % (HDT Result)
2018	64%
2019	65%
2020	80%
2021	91%
2022	91%
2023	91%

- 3.7. As shown in table 3, on average the housing delivery rate has increased by 27% since the measurement was introduced in 2018.
- 3.8. Where a new housing requirement is adopted through a Local Plan, the HDT calculation will be calculated using these new targets and any consequences for under-delivery will be applied.
- 3.9. As of 21 March 2024, Places for Everyone (PfE) now sets out Oldham's housing requirement for the plan period. PfE identifies a stepped housing requirement for Oldham of 404 homes per year for 2022-2025, 680 homes per year for 2025-2030, and 772 homes per year for 2030-2039. This equates to an annual average of 680 new homes per year.
- 3.10. Looking forward, based on the current methodology the 2024 HDT measurement, which is expected to be published in 2025, would look back at years 2021/22, 2022/23 and 2023/24 to identify the number of new homes required and delivered. The housing requirement of 404 homes per year would apply for 2022/23 and 2023/24 given that the plan period is 2022-2039. On this basis, and if delivery rates continue as they are or increase, performance would improve against the HDT 95% pass rate. However, the stepped housing requirement set out in Places for Everyone does mean that from 2025/26 this would increase to 680 homes a year.
- 3.11. Based on the identified housing land supply, as set out in the recently published Strategic Housing Land Availability Assessment (SHLAA) (2024), against the PfE stepped requirement, the housing land supply would be sufficient to meet the requirement for the first five years and the remainder of the plan period. However, whilst the SHLAA identifies land that may be suitable for housing, it does not in itself guarantee that planning permission will be granted or ensure that this housing is delivered. As such, supporting the delivery of housing to meet Oldham's housing needs will be critical going forward, and we will need to consider how through the Action Plan this is addressed.

Housing Completions

_

³⁹ Measuring housing delivery compared to housing required over the previous three years. I.e. the 2018 measurement looks at housing delivery over the years 2015-2018.

- 3.12. Over the last ten years (2013/14 2022/23), prior to and including the most recent HDT measurement year (2022/23), 4,392 (net) new homes have been completed. This represents an average of 439 homes per year.
- 3.13. The number of net completions has fluctuated over the last ten years. After falling in 2015/16, completions increased again from 2016/17 as several larger sites began construction. Prior to this there were high levels of clearance due to regeneration activity during 2003/4 to 2012/13 together with changing economic conditions witnessed since 2008/09 that may have had an effect.
- 3.14. Completions for 2020/21 (373 homes) were significantly lower than the previous year 2019/20 (728 homes). It is likely that the impact of the Covid-19 pandemic and wider socio-economic issues may have contributed to the lower level of completions.
- 3.15. Whilst it is not included within the most recently published HDT measurement (2023), 420 homes were completed in 2023/24.
- 3.16. In 2024/2025 the Council committed to delivering 500 social homes in the next 5 years. The pipeline projects that in the next 5 years, 729 social homes will be delivered on Council, Partner and Private sites. In addition to this, the Council committed to deliver 1000 TANZ homes over the next 5 years to meet the regional target of 10,000 homes.
- 3.17. Progress is being made in delivering social homes on Council sites. The current requirement is to provide 40% affordable properties, including social homes. On all sites under construction, it is estimated that 175 social homes are being delivered.
- 3.18. In 2024/25 578 homes were completed on Council owned, Delivered with Partners and Privately owned sites.

800 717 677 660 700 600 **Number of Dwellings** 500 446 404 400 289

Figure 3: Housing Completions 2013/14 to 2022/23

300

200

100

0

3.16. Over the period, 473 homes less than the required number of homes (4,865) have been delivered. As shown in figure 3, the number of completions has only exceeded the housing requirement five times in the ten-year period.

2013/14 2014/15 2015/16 2016/17 2017/18 2018/19 2019/20 2020/21 2021/22 2022/23 Year

Housing Requirement

3.17. In terms of affordable housing specifically, table 4 shows that over the ten-year period (2013/14 to 2022/23) there have been 1.337 new build affordable homes delivered. On average over this period affordable homes represent just under a third (30%) of all homes delivered. It should be noted that this is defined as per the definition of 'affordable housing' in NPPF⁴⁰ and can include several tenures.

Table 4: Affordable Housing Completions 2013/14 to 2022/23 (new-build)

■ Net Completions

Year	Total number of homes delivered	Number of affordable homes delivered	% of total homes delivered that were affordable tenure	
2013/14	363	202	56%	
2014/15	594	280	47%	
2015/16	296	20	7%	

⁴⁰ NPPF Annex 2: Glossary – 'Affordable housing': Housing for sale or rent, for those whose needs are not met by the market (including housing that provides a subsidised route to home ownership and/or is for essential local workers); and which complies with one or more of the following definitions. Including social rent, other affordable housing for rent, discounted market sales housing and other affordable routes to home ownership.

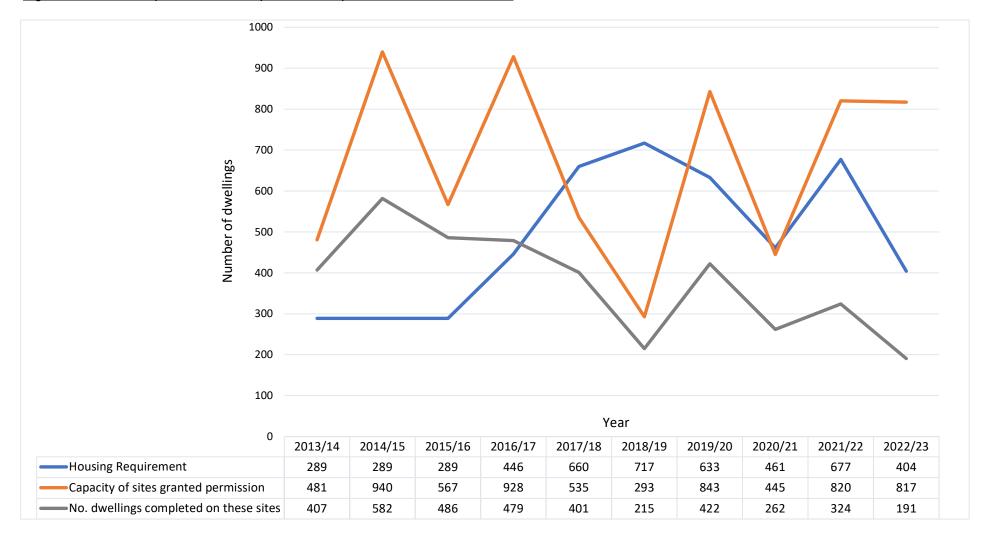

2016/17	374	60	16%
2017/18	345	42	12%
2018/19	410	90	22%
2019/20	728	176	24%
2020/21	373	129	35%
2021/22	506	173	34%
2022/23	403	165	41%
Total	4,392	1,337	30%

- 3.18. In addition, 121 (new build) affordable homes have been delivered in 2023/24 which represented 29% of all homes completed that year.
- 3.19. Affordable housing completions were lower for 2015/16 to 2018/19, following higher levels of affordable home development in years prior to 2015/16 because of Housing Market Renewal programmes, which have now completed.
- 3.20. Section 4 addresses the future supply of housing, including affordable housing.

Implementation of Planning Permissions

- 3.21. Figure 4 shows the rate of delivery compared to the number of homes granted planning permission each year over a ten-year period (2013/14 to 2022/23) against the requirement set out in the Local Plan and, more recently, the HDT requirement and Places for Everyone.
- 3.22. This has fluctuated over time and shows that:
 - the number of new homes granted permission has far exceeded the adopted Local Plan housing requirement of 289 dwellings per year;
 - during 2017/18 and 2018/19 the number of new homes granted permission was far less than the requirement for those years; and
 - during 2019/20, 2021/22 and most recently, 2022/23, the number of new homes granted permission far exceeded the requirement for that year, whilst during 2020/21 it was only 16 homes less.
- 3.23. Over the period, approximately 782 sites have been granted planning permission, generating a potential yield of 6,669 homes. Just over half (3,769 homes or 57%) have been completed, although it must be borne in mind that 166 sites (or 1,637 homes) are still within the extant planning permission period 3 years from date of permission at the time of monitoring as relevant to this Action Plan. As such, there is potentially still time for these to come forward.
- 3.24. Further analysis of the sites that have been granted permission for housing in the last ten years and the progress of these sites, shows that over this period an average of 11% have lapsed, meaning an equivalent of 603 homes cannot come forward unless a fresh application is submitted and granted. On average, every year since 2013/14 75 homes granted planning permission are not commenced.

Figure 4: Residential permissions compared to completions 2013/14 to 2022/23

Size of sites coming forward

- 3.25. Analysis of 'minor' and 'major' residential development sites⁴¹, shows that minor sites (of between 1 and 9 dwellings) make up 85% of the sites granted planning permission in the last ten years. Major sites (of more than 10 dwellings) make up 15%. Figure 5 illustrates this.
- 3.26. Despite the above, figure 6 shows that 75% of the total number of homes granted planning permission over the last ten years are on major sites. Therefore, whilst the number of major sites is relatively low, they form a significant proportion of our supply in terms of the number of new homes.
- 3.27. More detailed analysis shows that only 7% of dwellings granted permission on major sites have not been built and the planning permission has since expired, which is a lower lapse rate than the overall supply (11%). This includes two sites of over 50 dwellings, with a capacity for 251 new homes, where planning permission has expired without implementation.

⁴¹ For housing, major development is defined as that of 10 or more homes or a site area of 0.5 hectares of more. Minor residential development is that which falls below these thresholds (NPPF, Annex 2 – Glossary).

Figure 5: Number of sites with planning permission for residential uses by site size 2013/14 to 2022/23

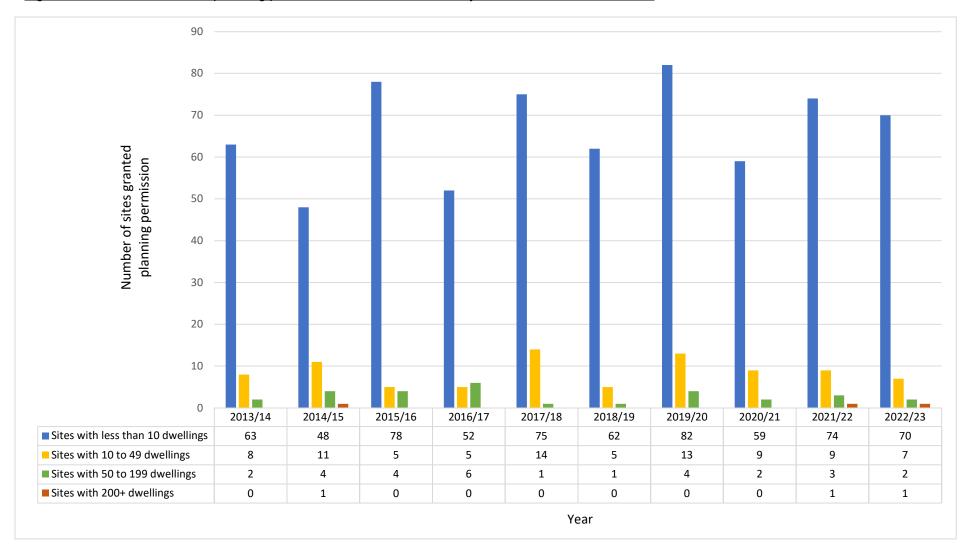

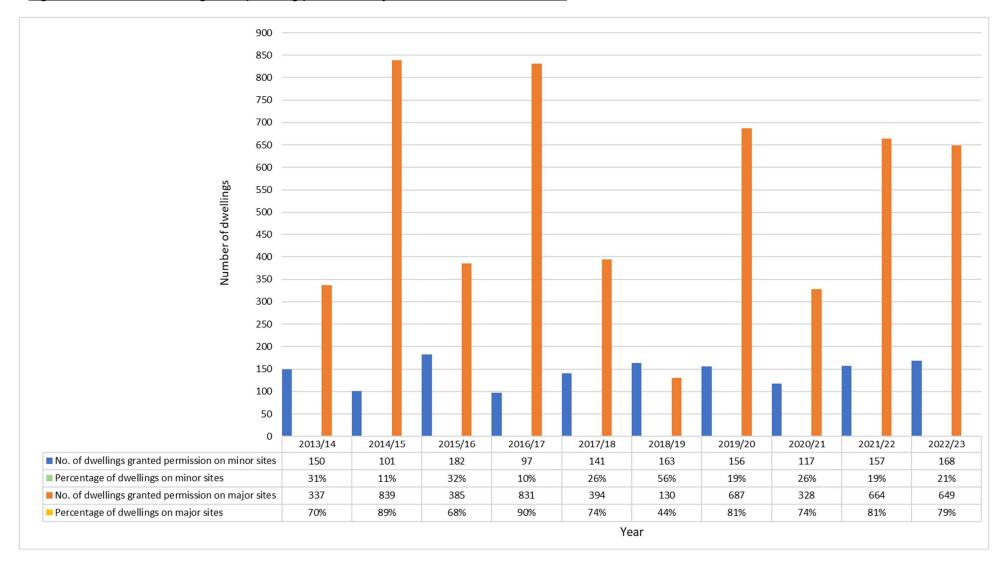

Figure 6: Number of dwellings with planning permission by site size 2013/14 to 2022/23

Build-out Rates

- 3.28. Analysis shows that on average larger schemes tend to be commenced faster than the smaller schemes as shown in table 5 below. This is possibly related to the fact that for larger schemes to come forward as an application in the first place there must be a certain level of investment and confidence in the deliverability of the site. There are also relatively few larger schemes so, again, any that do are more likely to be those where there is an active developer.
- 3.29. The build-out rates also show that larger sites tend to spend more time under construction, compared to smaller sites, however they deliver the greatest number of dwellings per year. This is likely due to phasing, build-out capacity and the need for supporting infrastructure to be constructed (such as roads).
- 3.30. Table 5 shows that all schemes which commence are built out within 4 years, and medium sites of 20-49 dwellings tend to be built out the quickest (within 1.6 years).
- 3.31. Table 5 indicates that if a scheme does commence, it tends to get built relatively quickly. However, the analysis shows that there is an issue with planning permission being implemented with a 11% overall lapse rate. In terms of the scale of development coming forward, only three large-scale major schemes (200+ homes) at Foxdenton (2014/15), Cowlishaw (2021/22) and Land at Rosary Road/ Hill Farm Close, Fitton Hill (2022/23) have received planning permission in recent years.
- 3.32. This may be due to the lack of large-scale allocations/ sites at the delivery stage and land availability. However, it is expected that the development of large-scale sites will improve in the next 5-10 years, with key development sites within Oldham Town Centre and several of the (remaining) PfE Strategic Allocations expected to begin to come forward. At the time of writing, planning applications have been submitted for several key sites within the town centre, including:
 - Former Magistrates Court, King Street, Oldham OUT/354323/25;
 - Manchester Chambers, West Street, Oldham, OL1 1LF OUT/354325/25;
 - Former Civic Centre & Queen Elizabeth Hall, West Street, Oldham, OL1 1UT

 OUT/354338/25;
 - Land At Prince's Gate, Prince Street, Oldham, OL1 3TL OUT/354326/25;
 and
 - Former Leisure Centre, Rock Street, Oldham OUT/354324/25.
- 3.33. With regards to minor sites, the build-out rates indicate that where they are for individual houses there may not be the impetus or the ability to deliver the dwelling quickly, owing to constraints such as cost or availability of construction materials and labour.

Table 5: Lead-in times and build-out rates

Size of Site (dwellings)	Time from PP to first commencement (range)	Time from PP to first commencement (average)	Average time from PP to site completion	Average time from commencement to completion	Average no. of dwellings completed p.a
100+	3-27	11	56	47	49
50-99	1-35	9	44	30	44
20-49	1-39	11	30	19	32
10-19	1-44	13	31	20	12
6-9	1-44	16	36	21	8
0-5	1-56	14	30	20	2

4 Housing Land Supply Analysis

Housing Land Supply

- 4.1. Analysis within this section is based on the housing land supply as of 1 April 2024 as identified in the council's SHLAA⁴² and Monitoring Report⁴³.
- 4.2. The SHLAA (as of 1 April 2024) identifies a baseline housing land supply of 12,910 homes. This increases to 13,475 homes when including small sites and clearance allowances. A breakdown of the housing land supply as of 1 April 2024 is shown in table 6.
- 4.3. Table 6 shows that 23% of the supply is on sites within the planning system. This includes those that are under construction and those which have extant planning permission (outline and full). A further 8% is on sites which have been considered within the planning system, including existing Saved UDP Housing Allocations and sites which have previously had planning permission but where the permission has since lapsed, or the site has stalled. Approximately 49% of the housing land supply is on potential sites (no planning history) and those which are pending a decision on a planning application for residential development.
- 4.4. The housing land supply for 2024 includes the PfE Strategic Allocations for residential (or mixed-use) development. This category includes 2,478 homes, which equates to 19% of the total housing land supply.
- 4.5. Two sites within PfE Allocation JPA14 Cowlishaw, are included within the housing land supply relative to their respective planning status as they have received planning permission in previous supply years (prior to adoption of PfE) and are under construction:
 - HLA3862 Cowlishaw Abbatoir, Shaw which received planning permission (RES/346720/21) in January 2022 for 201 dwellings; and
 - HLA3966 Land to the south of Denbigh Drive, Shaw which and received planning permission (FUL/346529/21) in May 2022 for 42 dwellings.
- 4.6. The remaining allocations (and the remaining undeveloped parcel at the Cowlishaw allocation) are included within their own category 'PfE Strategic Allocations' within the housing land supply. JPA11 Bottomfield Farm (Woodhouses) has recently gained planning permission for 27 dwellings (FUL/347760/21). This site had not started at the time of writing but is expected to start soon.

⁴² Strategic Housing Land Availability Assessment (SHLAA) (as at 1 April 2024), available at: https://www.oldham.gov.uk/info/201230/monitoring/2134/strategic housing land availability assessment shlaa
⁴³ Oldham's Monitoring Report and Infrastructure Funding Statements 2023 to 2024, available at: https://www.oldham.gov.uk/info/201230/monitoring/263/oldhams_monitoring_report

Table 6: Breakdown of the housing land supply as at 1 April 2024

SHLAA category	Total dwellings 2024-2029	Total dwellings 2029-2034	Total dwellings Years 11+	Total dwellings - all periods	% of supply (dwellings)	Total of number of sites	% of supply (sites)
Sites under construction	1,877	104	0	1981	15%	147	33%
Sites with extant planning permission	778	168	0	946	7%	151	34%
Saved UDP Phase 1 housing allocations	64	311	0	375	3%	8	2%
Saved UDP Phase 2 housing allocations	3	184	0	187	1%	5	1%
Lapsed and Stalled sites	51	427	109	587	5%	34	8%
Potential & pending sites	720	2,054	3,582	6356	49%	96	21%
PfE Strategic Allocations	27	1,463	988	2,478	19%	7	2%
SUBTOTAL	3,520	4,711	4,679	12,910	100%	448	100%
Current small sites allowance minus any small sites already identified in supply	0	320	320	640			
Current clearance allowance	25	25	25	75			
TOTAL	3,495	5,006	4,974	13,475			

Current Position of Housing Allocations

- 4.7. UDP Phase 1 and Phase 2 Housing Allocations have been saved as part of the Local Plan through Policy 3 'An Address of Choice' with the intention being at the time that these would be assessed as part of the preceding Site Allocations Development Plan Document (DPD). However, progress regarding the Site Allocations DPD was put on hold in light of commencing preparation of the Greater Manchester Spatial Framework (now Places for Everyone).
- 4.8. The UDP organised the housing allocations into two phases phase 1 sites which were intended to meet short- and medium-term needs, and phase 2 sites which form a pool of sites for the longer term or in circumstances where the monitoring process indicates that there is likely to be a sustained shortfall in the envisaged phase 1 supply. These phasing arrangements are no longer considered applicable.
- 4.9. Analysis of the phase 1 housing allocations indicates that 57%, or 12, of the 21 allocations have been completed. There are nine phase 1 housing allocations remaining:
 - Two form part of a wider mixed-use allocation which include active employment uses (land at Oldham Road / Hardman Street (M3) and Huddersfield Road / Dunkerley Street (M4). Part of the allocation at Oldham Road/ Hardman Street has extant planning permission for residential development (FUL/346821/21 14 homes). Part of the allocation at Huddersfield Road / Dunkerley Street (M4) has received planning permission (after the SHLAA 2024 monitoring period) in September 2024 for 53 homes.
 - Bailey Mill (H1.1.5) received planning permission in 2023 for 60 homes (FUL/350293/22);
 - Three are active employment sites (Pretoria Road (H1.1.23), Jowett Street (H1.1.25) and the remaining land of H1.1.24 fronting Rochdale Road, Royton; and
 - Two have received planning permission in the past, and either the S106 has not been signed (Springhey Mill (H1.1.21)) or the permission has lapsed (Blackshaw Lane (H1.1.29)) therefore their status has reverted to allocated.
- 4.10. Hartford Mill (H1.1.27) received planning permission for demolition and redevelopment in 2019 demolition has since been carried out. A detailed application for major residential development on the site is currently being prepared.
- 4.11. For the remaining phase 1 allocations, whilst it is considered these are developable post 5-year supply it is acknowledged that there may be issues preventing these sites from coming forward, whether it be site constraints, multiple ownerships or viability issues.
- 4.12. In terms of the phase 2 housing allocations, six out of the eight allocations remain within the housing land supply. Planning permission has been granted for 234 dwellings in total on Land at Knowls Lane (H1.2.10) (approximately 121 dwellings on the housing allocation). Three dwellings were granted planning permission and are under construction on a small part of Ashton Road, Woodhouses (H1.2.3). The remaining part of the allocation has also recently gained planning permission as part of FUL/352724/24 permissioned for 41 dwellings in March 2025. There is also an application pending a decision for residential development at Lilac View Close, Shaw (H1.2.6) (FUL/353940/25).

Lapsed and Stalled Sites

- 4.13. This category includes sites that have previously had planning permission for housing but where this has expired before being implemented. It also includes "stalled" sites which are classed as those that have been granted permission and construction has begun (or a material start has been made) but where there has been no development activity for at least five years.
- 4.14. In the lapsed and stalled category there are 34 sites with a capacity of 5 dwellings or more⁴⁴, which collectively are able to provide around 587 dwellings. Two of these sites have a capacity of between 50 to 100 dwellings:
 - Phoenix Mill, Cheetham Street, Failsworth, Manchester, M35 9DS brownfield site identified for around 89 dwellings; and
 - Land at North Werneth Zone 5, Land bounded by Hartford Mill to the west, Edward Street to the north, and Milne Street to the east brownfield site identified for around 72 dwellings.
- 4.15. There are no sites in this category with a capacity of 100+ dwellings.
- 4.16. HLA2664 Land at Derker (Abbotsford Road), a previously large, lapsed site, has received planning permission, as part of a wider development (FUL/350118/22) for 47 dwellings, after the SHLAA monitoring period (April 2024). This site will move to the permissioned category at the next SHLAA update.
- 4.17. Several other lapsed and stalled sites have been assessed and amended as part of the SHLAA 2024 update, including amending site capacity based on updated constraints/ density assumptions and amending site boundaries, for example.
- 4.18. The reasons for these lapsed sites are varied. They are all brownfield sites, and some are in active employment use and therefore may have issues regarding the viability and other constraints that need to be overcome. The former Hartford Mill was derelict and having a detrimental impact on the surrounding area and preventing some sites at North Werneth from coming forward. However, as set out above, demolition has since been carried out and as such it is anticipated that the remaining surrounding sites at North Werneth will start to come forward soon.
- 4.19. For these reasons, the majority of the sites are identified in the post five-year housing land supply as developable in years 6 to 10 and 11+ recognising the constraints that need to be overcome in order to secure their delivery. However, land at Derker (Abbotsford Road Site), was identified within the five-year supply (2024-2029) as it is council owned and at the time of assessment was the subject of a pending planning application (as part of wider development within the area FUL/350118/22). The application has since received planning permission (April 2024). In addition, land at Ward Lane, Diggle has been identified in the five-year supply as it is council owned and is being considered for development.

Housing Land Supply by Land Use

4.20. A significant proportion of the housing land supply as at 1 April 2024 includes sites that are currently in other uses, such as employment, but there are reasons to

⁴⁴ 5 and above dwellings is the threshold for consideration of sites within the SHLAA for those without extant planning permission/ under construction.

assume that housing could be achievable at some point in the future. A portion of the housing land supply is also on sites in key locations such as Oldham Town Centre, and on sites which are in council ownership. Table 7 overleaf sets out the supply by land use.

Table 7: Breakdown of Housing Land Supply by Land Use

	Total no. of sites	Total no. of dwellings	% of sites in active employment use (whole or in part)	% of dwellings on sites in active employment use (whole or in part)	% of sites on mill sites	% of dwellings on mill sites	% of sites within Oldham Town Centre	% of dwellings on sites within Oldham Town Centre	% of Council owned sites	% of dwellings on Council owned sites
% of supply			9%	21%	6%	16%	13%	27%	9%	29%
Number of sites/dwellings	448	12,910	40	2,723	25	2,123	58	3,441	41	3,742

- 4.21. Table 7 shows that 9% (40 sites) of the total number of sites in the housing land supply (448 sites) are in active employment use, which represents 21% (2,723 dwellings) of the total number of dwellings in the housing land supply (12,910 dwellings).
- 4.22. 6% (25 sites) of the total number of sites in the housing land supply are on mill sites, which represents 16% (2,123 dwellings) of the total number of dwellings in the housing land supply. In addition, to the 40 sites in active employment use, some of these mills are also in active employment use (at least in part of the mill building).
- 4.23. 13% (58 sites) of the total number of sites within the housing land supply are within Oldham Town Centre, representing 27% (3,441 dwellings) of the total number of dwellings in the housing land supply.
- 4.24. Finally, 9% (41 sites) of the total number of sites within the housing land supply are council-owned. This represents 29% (3,742 dwellings) of the total number of dwellings in the housing land supply. Several sites are also within the ownership of other public bodies and registered providers who work in partnership with the council.
- 4.25. For currently occupied sites, reasons which may make such a site suitable for inclusion within the housing land supply include:
 - the site has been suggested as potential housing land in the future through the Call for Sites process by the owner;
 - it is within an existing predominantly residential area;
 - land adjacent to or close to the site has been granted planning permission for housing and this may have changed the character of the area;
 - it is not fully occupied or is no longer fit for purpose to meet modern business needs or practices; or
 - circumstances have changed which means that a current or former use is no longer viable or appropriate.

Housing Land Supply by Type

4.26. Table 8 below shows that 61% of all homes identified as part of the housing land supply is on brownfield land. This does not include the brownfield element of 'mixed' sites, which are a mix of brownfield and greenfield land. A further 14% of the housing land supply is on mixed sites. As such, 75% of the housing land supply is on brownfield or mixed sites.

Table 8: Breakdown of Housing Land Supply as at 1 April 2024 by Land Type

Category	Brownfield	Greenfield	Mixed	Total
Under construction	1,213	88	680	1,981
Extant planning permission	428	508	10	946
Saved UDP Phase 1 housing allocations	360	0	15	375

Category	Brownfield	Greenfield	Mixed	Total
Saved UDP Phase 2 housing allocations	0	187	0	187
Lapsed and stalled sites	521	24	42	587
Potential & pending sites	5,329	280	747	6,356
PfE Strategic Allocations	0	2,118	360	2,478
Total	7,851	3,205	1,854	12,910

4.27. 84% of the new homes identified on potential and pending sites and 89% on lapsed and stalled sites fall on brownfield land. Therefore, there is a need to continue to ensure that brownfield sites come forward for development. As outlined below a significant proportion of these sites are for between 50 to 199 homes and 200+homes, offering opportunities to broaden the scale of development opportunities across the borough.

Housing Land Supply by Size

- 4.28. Table 9 shows that 46% of the supply is made of large-scale major sites (200 dwellings and above) and 33% on sites of between 50 and 199 dwellings. 15% of the supply is on sites with a capacity of 10 to 49 dwellings and 6% of the supply is on minor sites with a capacity to deliver less than 10 dwellings. In total, 94% of the supply is made up of major sites (10 dwellings and above).
- 4.29. The supply identifies that out of 159 major sites, only 16 of them are identified as large-scale major sites (200+ dwellings). Of the major sites, the average site size is 76 homes. This means that the average size of site is relatively small, however it is in keeping with the hectarage and physical characteristics of sites which make up the housing land supply in Oldham.
- 4.30. The PfE Strategic Allocations make up several of the large-scale major sites (200+dwellings) and sites of between 50-199 dwellings:
 - JPA10 Beal Valley 482 dwellings
 - JPA12 Broadbent Moss 1,374 dwellings⁴⁵
 - JPA13 Chew Brook Vale 138 dwellings
 - JPA14 Cowlishaw 222 dwellings⁴⁶
 - JPA15 Land south of Coal Pit Lane 175 dwellings

⁴⁵ The total allocation capacity was for around 1,450 dwellings. 77 dwellings were completed within the allocation (Hebron Street) in 2020.

⁴⁶ The total allocation capacity is for 460 dwellings. Two out of three parcels within the allocation are currently under construction (Cowlishaw Abbatoir and Land south of Denbigh Drive) and included within the 'Under Construction' category within the housing land supply. 222 dwellings is the remaining un-permissioned capacity within the allocation.

- JPA16 South of Rosary Road 60 dwellings
- 4.31. PfE Strategic Allocation JPA11 Bottom Field Farm is also included within the housing land supply but has an allocation capacity 30 dwellings (the site has extant planning permission for 27 dwellings).
- 4.32. The council will support the delivery of several of these allocations, including Beal Valley, Broadbent Moss, Chew Brook Vale, Land south of Coal Pit Lane and South of Rosary Road. Whilst the remaining allocations (Bottom Field Farm and Cowlishaw) will be delivered independently in line with landownerships.
- 4.33. The potential and pending site category include the most sites of between 50-199 dwellings and sites of 200+ dwellings. 84% of the total number of sites within this category are identified as being capable of delivering 50-200+ dwellings. The dwellings identified on sites of this size within the potential and pending category represent 41% of all dwellings identified within the housing land supply.
- 4.34. The potential sites provide an opportunity to respond to some of the issues identified by the evidence in relation to build-out rates and the lack of larger sites coming forward for development. However, a number of these sites are still identified within the long-term supply period, with some capacity even falling post-plan period (post-2039). As such, there is still a need to identify opportunities to bring large sites forward sooner.

Table 9: Breakdown of Housing Land Supply as at 1 April 2024 by Size

Category	Total no. of sites	Total no. of dwellings	No of sites <10 dwellings	No of dwellings on sites of <10 dwellings	No. of major sites of 10 to 49 dwellings	No. of dwellings on major sites of 10 to 49 dwellings	No. of major sites of 50 to 199 dwellings	No. of dwellings on major sites of 50 to 199 dwellings	No. large scale major sites (200+ dwellings)	No. of dwellings on large scale major sites (200+ dwellings)
Under construction	147	1,981	120	279	16	272	8	489	3	941
Extant planning permission	151	946	136	260	11	216	3	236	1	234
Lapsed and stalled sites	34	587	13	81	19	345	2	161	0	0

Potential & pending sites	96	6,356	20	134	41	872	26	2703	9	2647
PfE Strategic Allocations	7	2,478	0	0	2	87	2	313	3	2078
Total	448	12,910	289	754	97	1957	46	4299	16	5900

Oldham Town Centre

- 4.35. The large-scale major sites and sites of between 50-199 dwellings include key sites within Oldham Town Centre, which form part of the council's Town Centre Development Framework. The Development Framework is guided by the vision established in the 'Creating a Better Place' Strategic Framework which is outlined in section 1 of this report. A key part of the Development Framework is to support the delivery of development opportunity sites, which are within council-ownership, for housing and mixed-use development.
- 4.36. Whilst this is an emerging project and identified sites and indicative capacities may change as evidence develops, several of the development opportunity sites are identified within the housing land supply for 2024 (within the Potential and Pending site category), as set out below⁴⁷:
 - Civic Centre, West Street with an indicative capacity of around 600 homes;
 - Land between Prince Street, Oldham Way and Mumps, and Land at Wallshaw Street, with an indicative capacity of around 400 homes across both sites;
 - Former Magistrates Court and Manchester Chambers, Barn Street with an indicative capacity of 225 homes;
 - Former Leisure Centre Site, Lord Street with an indicative capacity of around 250 homes;
 - Land at Waterloo Street with an indicative capacity of around 250 homes;
 - Bradshaw Street with an indicative capacity of around 150 homes; and
 - Henshaw House with an indicative capacity of 45 homes.
- 3.34. As set out in section 3 above, since the publication of the SHLAA (January 2025) planning applications have been submitted in April 2025 for several key sites (listed above) within the town centre, including Former Magistrates Court, King Street, Oldham OUT/354323/25; Manchester Chambers, West Street, Oldham, OL1 1LF OUT/354325/25; Former Civic Centre & Queen Elizabeth Hall, West Street, Oldham, OL1 1UT OUT/354338/25; Land At Prince's Gate, Prince Street, Oldham, OL1 3TL OUT/354326/25; and Former Leisure Centre, Rock Street, Oldham OUT/354324/25.
- 4.37. The Town Centre Development Framework will support the master planning and delivery of these large-scale sites, which coupled with the delivery of the PfE Strategic Allocations, will directly respond to an issue identified within the previous Housing Delivery Test Action Plan of a limited number of large-scale sites coming forward for development.

⁴⁷ Since the publication of the SHLAA further scoping/ refining work has been carried out and will inform capacities on these sites as appropriate in future SHLAA updates.

Housing Land Supply by Owner

- 4.38. As table 10 shows 27% of the housing land supply is on local authority owned sites. These sites offer significant opportunities to boost housing delivery across the borough in line with the council's priorities. In addition to this, a proportion of the mixed ownership category includes sites which are also part-owned by the local authority, which presents an opportunity for new ways of partnership working to bring these sites forward.
- 4.39. There is also a proportion of sites owned by Registered Affordable Housing Providers enabling new ways of partnership working and the delivery of new affordable homes.

Table 10: Breakdown of housing land supply as at 1 April 2024 by landowner

	Local Authority	Registered Provider	Other public body	Private	Mixed	Total
Under construction	468	88	0	1,425	0	1,981
Extant planning permission	0	0	0	946	0	946
Saved UDP Phase 1 housing allocations	15	0	0	202	158	375
Saved UDP Phase 2 housing allocations	78	0	0	109	0	187
Lapsed and stalled sites	62	0	0	453	72	587
Potential & pending sites	2,889	0	0	3,467	0	6,356
PfE Strategic Allocations	0	0	0	2,478	0	2,478 ⁴⁸
Total	3,512	88	0	9,080	230	12,910

Five-year Housing Land Supply Position

- 4.40. The SHLAA as at 1 April 2024 sets out the council's latest five-year housing land supply position. The housing land supply is constantly evolving with new sites gaining permission, sites being completed and potential land coming forward.
- 4.41. Paragraph 78 of the revised NPPF (December 2024) sets out that local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing

⁴⁸ Oldham Council also owns a small portion of land within the Beal Valley PfE Strategic Allocation, although it is not identified for development.

- requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old.
- 4.42. PfE was adopted on 21 March 2024. As PfE is less than five years old, JP-H1 continues to set out Oldham's housing requirement until 2029.
- 4.43. Policy JP-H1 identifies a stepped housing requirement (minimum) for Oldham of 404 homes per year for 2022-2025, 680 homes per year for 2025-2030, and 772 homes per year for 2030-2039. This equates to an annual average of 680 new homes per year.
- 4.44. For the five-year housing land supply looking forward from 1 April 2024, Oldham's housing requirement is calculated as an average of one year of 404 homes per year (which applies to 2024-2025) and four years of 680 homes per year (which applies to 2025-2029), as per JP-H1. This equates to an average annual requirement of 624.8 homes per year for the five-year period of 2024-2029 or a total requirement of 3,124 homes.
- 4.45. As of 1 April 2024, the five-year supply contains sufficient land to accommodate 3,520 dwellings. Compared to the housing requirement, this represents a 5.6-year supply or 112% of the housing required for the five-year period (taking clearance allowance into account).
- 4.46. As such, the council can currently demonstrate a five-year supply of housing against our adopted housing requirement (as set out in policy JP-H1 of PfE) and provide a buffer (or flexibility allowance) as is required by paragraph 78 of the NPPF. Therefore, the presumption in favour of sustainable development (paragraph 11 (d)) does not apply.
- 4.47. However, in line with the stepped housing requirement set out in PfE, the increase in housing requirement at each 'step' presents a challenge in ensuring the delivery of housing can be maintained in line with the requirement. Whilst the requirement has been devised based on identified housing land supply over the plan period, the actual delivery of the identified supply remains important in ensuring this is met in a timely manner.
- 4.48. The five-year housing land supply position is updated annually and is published as part of the SHLAA and authorities Monitoring Report.
- 4.49. The post five-year housing land supply identifies a further 9,980 dwellings which are expected to be delivered beyond 2029 (including 756 dwellings expected to be delivered beyond 2039). These are on sites that would either require a full or reserved matters application, a new planning application, construction would need to resume or, for potential and pending sites, be granted planning permission for housing.

5 Engagement

- 5.1. As set out in section 1, in February 2024 Oldham Council held a Housing Roundtable event⁴⁹. Senior representatives from all of Oldham's major social housing providers were at the event, along with private landlords, letting agents, developers and housebuilders, charities and more.
- 5.2. Some of the main issues discussed include:
 - the national problem of a shortage of housing supply, driven by factors such as the high costs of renting and home ownership;
 - the lack of Government funding to invest in social homes;
 - differences in the definition of truly "affordable" homes, and a reduction in the supply of social and affordable housing.
- 5.3. Nationally, the Government has stopped incentivising developers to build truly affordable homes, with funding provided through the Government's Affordable Homes Programme (AHP) being slashed, which intensifies the need further.
- 5.4. At the same time, demand for those homes is increasing, as people are affected by the cost-of-living crisis and are struggling with rising mortgage interest rates meaning they may not be able to afford to pay or get on the housing ladder at all.
- 5.5. Risks of further increasing housing demand pressures were also identified as population growth, people living independently for longer, increasing risk of homelessness and the lack of properties available.
- 5.6. Local issues such as housing standards, housing demand and supply were discussed and the council and the partners considered how they could work together to tackle the issues locally.
- 5.7. As part of this Roundtable event, the council with the support of its partners pledged to build 500 new social homes over the next five years for residents to meet local housing needs.
- 5.8. Following on from this event, a workstream of actions was developed. The actions are a shared responsibility across various teams at the council and each action relates to distinct issue areas, such as housing supply, including affordable and social housing.
- 5.9. Actions related to housing supply include, tackling empty homes, bringing them back into use and identifying a residential pipeline a live database which clearly sets out a supply of future housing and includes a breakdown of housing tenure and indicative delivery period.
- 5.10. Further information and progress on these actions are included within part 2 of this Action Plan.
- 5.11. In addition to the Roundtable event, regular engagement with key housing delivery stakeholders is carried out through the Strategic Housing Group. This group meets

⁴⁹ Oldham Council Housing Roundtable Event (2024): https://www.oldham.gov.uk/news/article/2618/tackling the housing crisis 500 new social homes coming to o ldham announced at oldham housing roundtable event

- around every 3 months and brings to together Registered Providers, Developers, Council Officers, elected Members and other key stakeholders. It provides strategic direction and advice on key housing issues facing the borough and oversees the delivery of the Housing Strategy Action Plan, which includes ways to increase housing delivery and supply.
- 5.12. The Council plans to hold a further engagement event in early 2025/26. Senior representatives from Oldham's social housing providers, and developers will be accompanied by the Housing Delivery team to discuss barriers to housing delivery in the borough.
- 5.13. Furthermore, as part of the engagement carried out for previous HDT Action Plans, several potential reasons for the under-delivery of housing were found and potential solutions identified. Many of these are still applicable and the evidence continues to inform actions identified for improving housing delivery within this Action Plan (as identified in part 2).
- 5.14. For example, to inform the preparation of the HDT Action Plan in 2021 a housing delivery developer questionnaire was sent to identified developers, housebuilders, registered providers and agents operating in the borough. The questionnaire sought views and comments on housing delivery issues and opportunities in Oldham.
- 5.15. The main findings in terms of how prolific housing delivery issues are in Oldham compared to other Greater Manchester authorities, were that in general housing delivery issues affecting Oldham were not unique to the borough and indeed it is considered that the issues are apparent across Greater Manchester boroughs. However, some respondents noted that the tightly defined Green Belt in Oldham, particularly to the east of the borough, is an issue for Oldham in particular.
- 5.16. It was also noted that generally low house prices, viability and difficult brownfield sites were an issue in Oldham. Although respondents highlighted those issues of low house prices were an issue across the east of Greater Manchester housing market area, in particular.
- 5.17. Ongoing engagement with key housing delivery stakeholders is important to support housing delivery within the borough and will continue to be carried out.

6 Summary of housing delivery and supply issues in Oldham

- 6.1. Analysis of housing delivery and the make-up of the housing land supply identifies several issues, which may impact housing delivery within the borough. In summary, these are:
 - Delivery of Oldham's housing requirement, as set out in PfE. The housing requirement is stepped over three periods and will increase significantly from 2025/26 onwards. It is important that housing delivery is maintained in line with the housing requirement.
 - There is a need to deliver affordable housing to meet local housing needs, including social homes. The council, and its partners, have committed to delivering 500 social homes over the next five years.
 - There is a need to continue to ensure that brownfield sites come forward for development - 75% of the housing land supply is on brownfield or mixed land, with a significant proportion (79% of the supply) on sites of between 50 to 199 dwellings and 200+ dwellings, offering opportunities to broaden the breadth of development opportunities across the borough.
 - Scale of development coming forward minor sites (of less than 10 dwellings) make up 85% of sites granted planning permission in the last ten years. However, whilst the number of major sites coming forward is more limited (15% of sites granted planning permission in the last ten years), they continue to form a significant proportion of the supply, accounting for 75% of dwellings granted planning permission over the last ten years.
 - 'Major' sites in Oldham are still relatively small with most sites within the housing land supply (97 sites out of a total 159 major sites) having a capacity of under 50 dwellings, and the average site size of major sites is for 76 dwellings. However, the SHLAA identifies 16 large-scale major sites (of over 200 dwellings)⁵⁰. The number of major sites identified in the housing land supply are as follows:
 - Number of major sites of 10 to 49 dwellings 97
 - Number of major sites of 50 to 199 dwellings 46
 - Number of large-scale major sites of 200+ dwellings 16
 - We need to continue to increase the number of major sites coming forward and support them in delivery where appropriate, in particular those with a capacity of 100 to 200+ dwellings as the analysis indicates that these are more attractive for housebuilders and appear to be developed faster.
 - Build-out rates larger schemes are being commenced faster than smaller ones. Yet, as outlined above the number of major sites coming forward is relatively limited at present. However, the number of large-scale sites is expected to increase in line with the identified future housing land supply,

⁵⁰ See SHLAA (2024) Appendix 1a for breakdown of sites: https://www.oldham.gov.uk/downloads/download/1350/appendix 1a shlaa schedule of sites by category

including large-scale sites within Oldham Town Centre and the PfE Strategic Allocations expected to come forward over the next 5-15 years.

- Delivery of minor sites evidence indicates that for minor sites where they are for individual houses there may not be the impetus or the ability to deliver the dwelling quickly, owing to constraints such as cost or availability of construction materials and labour.
- Over-reliance on sites outside the planning system with 77% of the housing land supply (as at 1 April 2024) made up of potential housing sites that do not currently have any planning permission (although some may have been considered for housing through the planning system such as those with lapsed permissions and identified allocations).
- Issues around the implementation of planning permissions which may, for example, be due to viability and deliverability.
- Availability of grant support to help bring sites forward, such as GMCA Brownfield Land Fund and One Public Estate Brownfield Funding, are geared towards larger sites. There is a need for dedicated support for SME⁵¹ developers to bring smaller sites forward.
- 6.2. Actions to tackle these housing delivery and supply issues will be considered in part 2 of this Action Plan.

_

⁵¹ Small and medium enterprises (SME)

7 Appendix
